The Daily Show (The Book) Simon and Schuster

Finalist for the Los Angeles Times Book Prize From the man who Oliver Sacks hailed as “one of the best scientist/writers of our time,” a collection of sharply observed, uproariously funny essays on the biology of human culture and behavior. In the tradition of Stephen Jay Gould and Oliver Sacks, Robert Sapolsky offers a sparkling and erudite collection of essays about science, the world, and our relation to both. “The Trouble with Testosterone” explores the influence of that notorious hormone on male aggression. “Curious George’s Pharmacy” reexamines recent exciting claims that wild primates know how to medicate themselves with forest plants. “Junk Food Monkeys” relates the adventures of a troop of baboons who stumble upon a tourist garbage dump. And “Circling the Blanket for God” examines the neurobiological roots underlying religious belief. Drawing on his career as an evolutionary biologist and neurobiologist, Robert Sapolsky writes about the natural world vividly and insightfully. With candor, humor, and rich observations, these

essays marry cutting-edge science with humanity, illuminating the interconnectedness of the world’s inhabitants with skill and flair.

A Memoir Simon and Schuster

The inspiring, instructive, and ultimately triumphant memoir of a man who used hard work and a Master Plan to turn a life sentence into a second chance. Growing up in a tough Washington, D.C., neighborhood, Chris Wilson was so afraid for his life he wouldn't leave the house without a gun. One night, defending himself, he killed a man. At eighteen, he was sentenced to life in prison with no hope of parole. But what should have been the end of his story became the beginning. Deciding to make something of his life, Chris embarked on a journey of self-improvement--reading, working out, learning languages, even starting a business. He wrote his Master Plan: a list of all he expected to accomplish or acquire. He worked his plan every day for years, and in his mid-thirties

he did the impossible: he convinced a judge to reduce his sentence and became a free man. Today Chris is a successful social entrepreneur who employs returning citizens; a mentor; and a public speaker. He is the embodiment of second chances, and this is his unforgettable story.

A Story of Memory, Madness, and Family Secrets Simon and Schuster

Written by the pioneering scientist, theorist and activist J. D. Bernal, this futuristic essay explores the radical changes to human bodies and intelligence that science may bring about, and suggests the impact of these developments on society. Bernal presents a far-reaching vision of the future that encompasses space research and colonization, material sciences, genetic engineering, and the technological hive mind. In his view, it will be possible for the conditions of civilization to reach a state of materialist utopia. For all three realms—the world, the flesh, and the devil—Bernal attempted to map out the utmost limit of technoscientific progress, and found that there are almost no limits. With a new introduction by McKenzie Wark.

Melanie Stryder refuses to fade away. The earth has been invaded by a species that takes over the minds of their human hosts while leaving their bodies intact, and most of humanity has succumbed. Wanderer, the invading 'soul' who has been given Melanie's body, knew about the challenges of living inside a human: the overwhelming emotions, the too-vivid memories. But there was one difficulty Wanderer didn't expect: the former tenant of her body refusing to relinquish possession of her mind. Melanie fills Wanderer's thoughts with visions of the man Melanie loves - Jared, a human who still lives in hiding. Unable to separate herself from her body's desires, Wanderer yearns for a man she's never met. As outside forces make Wanderer and Melanie unwilling allies, they set off to search for the man they both love.

A Series of Catastrophes and Miracles Simon and Schuster

Longlisted for the Wellcome Book Prize 2019 Arnold Thomas Fanning had his first experience of depression during adolescence, following the death of his mother. Some ten years later, an up-and-coming playwright, he was overcome by mania and delusions. Thus began a terrible period in which he was often suicidal, increasingly disconnected from family and friends, sometimes in trouble with the law, and homeless in London. Drawing on his own memories, the recollections of people who knew him when he was at his worst, and medical and police records, Arnold Thomas Fanning has produced a beautifully written, devastatingly intense account of madness - and recovery, to the point where he has not had any serious illness for over a decade and has become an acclaimed playwright. Fanning conveys the consciousness of a person living with mania, psychosis and severe depression with a startling precision and intimacy. *Mind on Fire* is the gripping, sometimes harrowing, and ultimately uplifting testament of a person who has visited hellish regions of the mind. "Mind on Fire is a truly powerful, arresting, haunting account. Arnold Thomas Fanning has reckoned with the darkest matter of his heart and mind, and I challenge anyone not to be moved by that." Sara Baume, author of *Spill* *Simmer Falter* *Wither* and *A Line Made by Walking* "In this strange and singular book, Arnold Thomas Fanning mercilessly excavates the infernal underworld of his own years of madness. As reminiscent as it occasionally is of John Healy's *The Grass Arena*, and even of Orwell's *Down and Out in Paris and London*, the book is ultimately not quite like anything else I've read, and brought me as close to the lived reality of mental illness as I have ever been. It's a significant achievement: a painful, inexorable work of autobiography, whose existence is its own form of redemption." Mark O'Connell, *Baillie Gifford Prize-shortlisted author of To Be a Machine* "[A] painfully intense, courageous and gripping account of [Fanning's] journey to the underworld of madness and back. This is a brave and instructive book." Irish Times "This is an extraordinary memoir about how it feels to be depressed, delusional, desperate" *The Observer* "Incredibly important" Emilie Pine, author of *Notes to Self* "A ratcheting pace, a tight first-person immediacy, and utterly staggering to be a passenger over its entire warped course ... An indelible, ground-shaking account" Hilary A White, *Irish Independent*, *Memoir of the Year*, *Best Reads of 2018* "A spellbinding memoir that should prove both moving and hopefully cathartic for the reader." *RTE Culture* "Told in tight and immediate first-person, and imbued with a startling momentum that ratchets unnervingly, Fanning's publishing debut ... is a significant achievement and should be a talking point in publishing this year." *Irish Independent* "Extraordinary. An account of mental illness, grief, delusions, homelessness, a fractured family relationship ... and all while trying to recover and create. Superb writing on a frequently difficult subject." Sinéad Gleeson "Fanning's debut book lays it on the line in a deeply personal and compelling chronicle of his descent into depression and his way back out." *RTE Guide* "Wonderful" Joseph O'Connor, *Irish Times Books of the Year* "Unsparingly direct, searing and honest ... It is gripping to read and must have been exhausting to live" *Medical Independent* "One of the most gripping and revealing memoirs I've read in a long time. A controlled and artful exploration of absolute loss of control, an unsettling and at times very moving reconstruction of a period of serious mental illness, *Mind on Fire* is a beautiful book about a terrifying thing." Mark O'Connell, *Irish Times Books of the Year* "Gripping" Sinéad Gleeson, *Irish Times Books of the Year* "Shocking" Liz Nugent, *Irish Times Books of the Year* "Poignant, beautifully detailed memoir" Sarah Gilmartin,

Irish Times, *Best debuts of 2018* "Brave and illuminating" *Sunday Business Post* "This is the type of account that not only grips you wholesale as the pages flutter past, it also changes your very perception of psychology" Hilary A White, *Sunday Independent* *Memoir of the Year*

NOW A MAJOR MOTION PICTURE STARRING CHLOË GRACE MORETZ An award-winning memoir and instant New York Times bestseller that goes far beyond its riveting medical mystery, *Brain on Fire* is the powerful account of one woman's struggle to recapture her identity. Days earlier, she had been on the threshold of a new, adult life: at the beginning of her first serious relationship and a promising career at a major New York newspaper. Now she was labeled violent, psychotic, a flight risk. What happened? In a swift and breathtaking narrative, Susannah tells the astonishing true story of her descent into madness, her family's inspiring faith in her, and the lifesaving diagnosis that nearly didn't happen. "A fascinating look at the disease that...could have cost this vibrant, vital young woman her life" (People), *Brain on Fire* is an unforgettable exploration of memory and identity, faith and love, and a profoundly compelling tale of survival and perseverance that is destined to become a classic.

Based on an ethnographic study of the traditional medicine of African Americans in the rural southern United States, this work concentrates on the original Louisiana Territory, with its Native and African American indigenous traditions, and the French migration and Black Haitian freed and enslaved population influx during the 1700s and 1800s. Fontenot finds strong ties between rural Louisiana practices and Haitian and West African medicine. The ethnographer, a native of the region where she did her research, is respected among local practicing secret doctors and is able to give a unique insider's view. Aside from documenting a rare treasure of our American cultural diversity, this study has a wider purpose in the field of health practices and policy. The high cost of Western medicine, lack of access to quality care, and the patient-doctor ratio are areas of major national concern, and rural residents and people of color are recognized to be the most at-risk populations. The alternative health-care system presented here can strengthen mainstream medicine's understanding of such patient populations while preserving valuable knowledge of healing plants and culturally sensitive therapies.

Are morals always relative? Are private actions--among consenting adults--always beyond the law? Or are there some behaviors which so weaken a society that common beliefs about right and wrong must be enforced to protect the common good? In opposing the decriminalization of private acts of homosexuality in Britain, Patrick Devlin maintained that not only is it reasonable to allow popular morality to influence lawmaking, it is imperative: ". . . For a society is not something that is kept together physically; it is held by the invisible bonds of common thought." Some sidestep this controversial issue by asserting that the law should not be used to enforce any morality. Others invoke John Stuart Mill's doctrine that the only purpose for laws governing any member of society is to prevent harm to others, chiefly physical harm. But, Devlin argued, while breaches of shared morality do not cause harm to other individuals in the way that murder and assault do, they do harm society by undermining its moral structure. Patrick Devlin (1905-1992) studied history and law at Cambridge University and became a successful lawyer.

A simple guide to a smarter strategy for the individual investor A *Wealth of Common Sense* sheds a refreshing light on investing, and shows you how a simplicity-based framework can lead to better investment decisions. The financial market is a complex system, but that doesn't mean it requires a complex strategy; in fact, this false premise is the driving force behind many investors' market "mistakes." Information is important, but understanding and perspective are the keys to better decision-making. This book describes the proper way to view the markets and your portfolio, and show you the simple strategies that make investing more profitable, less confusing, and less time-consuming. Without the burden of short-term performance benchmarks, individual investors have the advantage of focusing on the long view, and the freedom to construct the kind of portfolio that will serve their investment goals best. This book proves how complex strategies essentially waste these advantages, and provides an alternative game plan for those ready to simplify. Complexity is often used as a mechanism for talking investors into unnecessary purchases, when all most need is a deeper understanding of conventional options. This book explains which issues you actually should pay attention to, and which ones are simply used for an illusion of intelligence and control. Keep up with—or beat—professional money managers Exploit stock market volatility to your utmost advantage Learn where advisors and consultants fit into smart strategy Build a portfolio that makes sense for your particular situation You don't have to outsmart the market if you can simply outperform it. Cut through the confusion and noise and focus on what actually matters. A *Wealth of Common Sense* clears the air, and gives you the insight you need to become a smarter,

more successful investor.

'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. Brain on Fire is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, Brain on Fire is a searingly personal yet universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. Brain on Fire is a mesmerizing story' -Mira Bartók, New York Times bestselling author of The Memory Palace Susannah Cahalan is a reporter on the New York Post, and the recipient of the

2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.
