 2kw Air Heater The main  
 equipment of Model 2KW  
 air parking heater  
 (referred to as the heater)  
 is a small fuel furnace  
 controlled by a single-chip  
 micro- processor. Its  
 furnace body (the heat  
 exchanger) is located in  
 the hood-shape case,  
 which serves as  
 independent air passage.  
 Cold air is sucked into the  
 air passage by the heat  
 supplying Installation

Always follow the instructions in the installation manual and heed all warnings. It is the installers responsibility to ensure that the installation of the heater, combustion air

and exhaust system, fuel system and air ducting is performed according to all country specific regulations. To repair the heater systems, you need to have completed a CTH Technologies AB training course and have the appropriate technical documentation, special tools and equipment. 2kW Calaer air heater 4kW Calaer air heater If the heater is operating with air recirculation, avoid sucking the flow of heated air into the air intake heater, Fig.13.
