RUSH SYLVIA

The Instructional Design Knowledge Base Kumon Pub North America Limited

Introduce your child to science through fun activities including stickering, coloring, mazes, and more.

Division Grade 4 Kumon Pub North America Limited

A multidisciplinary forum for communicating new information, new interpretations, and recent research results concerning Japan to the English-reading world.

Word Problems, Grade 1 American Mathematical Soc.

Word Problems, Grade 1 is in the 'Kumon Math Workbooks: Word Problems' series designed for grades 1-6. This workbook will introduce students to word problems dealing with early addition and subtraction. Exercises use visual illustrations before moving on to problems with illustrations and questions that are only written. Designed for students to self-score their work, pages provide the number of points to assign per problem, and there's room at the top to write in how many problems they got right alongside their name and the date.

Barnyard Banter Kumon Pub North America Limited

"This workbook will help your child learn addition sums beyond 20."--cover.

Humble Math - 100 Days of Telling the Time - Practice Reading Clocks Kumon Pub North America Limited

Your child's favourite workbooks just got upgraded -- with new content and a new look! We took our Kumon Basic Skills Series and revised the content and covers after over 15 years of producing bestselling early learning materials. All of the revised Basic Skills workbooks will feature new activities, full-colour images, and the same trusted Kumon learning method. Kumon Basic Skills workbooks ensure that children master pencil control skills with ease, so that they learn to love learning independently. Everything in our Basic Skills workbooks -- from the sturdy paper to the engaging content -- is designed with the best interests of your child in mind.

Intro to Geometry (Grades 6-8) Kumon Pub North America Limited

Serves as an index to Eric reports [microform].

Practice Makes Perfect Pre-Algebra Kumon Pub North America Limited

This is a brief exploration of running records, explaining why to use them, how they relate to teaching, and how to administer them.

The Lawyer's Guide to Collaboration Tools and Technologies Kumon Publishing North America

"Use this book to help your child learn how to subtract the numbers 1 through 5 from whole numbers up to 20"--Cover.

Word Problems Grade 5 Kumon Pub North America Limited

This first-of-its-kind legal guide showcases how to use the latest Web-based and software technologies, such as Web 2.0, Google tools, Microsoft Office, and Acrobat, to work collaboratively and more efficiently on projects with colleagues, clients, co-counsel and even opposing counsel. The book

provides a wealth of information useful to lawyers who are just beginning to try collaboration tools, as well as tips and techniques for those lawyers with intermediate and advanced collaboration experience.

Word Problems, Grade 4 Kumon Pub North America Limited

This workbook is meant to introduce your child to the skills her or she will need in kindergarten. By practicing each of the skills taught in this workbook, your child will be ready for academic success.

Let's Cut Paper! Macmillan

All the farm animals are where they should be, clucking and mucking, mewing and cooing, except for the missing goose. On board pages.

Addition Carson-Dellosa Publishing

Math Essentials: Finding and Filling the Gaps is a 13 part book created to help find and fill the gaps that hinder algebra studies. The program assumes a student has mastered basic addition, subtraction and multiplication, but it addresses division, if needed, as this was commonly found to be weak. It isn't designated for use with a specific age or grade, but is addressed to students preparing to study algebra, and has most often been used with teens. The program includes a variety of tools an instructor can use to tailor the program to a student's needs. Diagnostic tests identify which math skills the student hasn't already mastered. The individual learning guide for each unit allows the student to study just what is needed. A variety of exercises allow the student to practice as much as needed and to stay sharp on skills learned. Each of the skills covered in the program are provided in individual books as well as all together in one full book. Learning guides and exams are provided for each skill, and may be used with both the appropriate individual books and the full book.

Mathematical Reasoning Level B (B/W) Kumon Middle School Geometry

Pre-algebra skills come easy with plenty of practice! If you are looking for extra pre-algebra help for your child, this invaluable resource has it all.

Featuring hundreds of exercises, Practice Makes Perfect: Pre-Algebra offers plenty of opportunities for practice, practice, practice on the math found in sixth, seventh, eighth, and ninth grade curriculums. It will help your student build confidence in his or her schoolwork and get better grades!

Appropriate for students in grades 6 through 9, Practice Makes Perfect: Pre-Algebra gives your child the tools to master: Integers Rational numbers Patterns Equations Graphing Functions And more

Grade 1 Reading Rockridge Press

Give 3rd, 4th, and 5th graders a math boost--no tutor required Bring classroom skills home with this 3-grades-in-1 math book. The Multiplication Workbook for Grades 3, 4, and 5 is the perfect way to supplement what kids are learning in school and give them an easy way to practice multiplication and division anytime. The lessons progress in difficulty, helping kids learn each concept and develop the confidence to tackle the more challenging problems that follow. Set your child up for elementary school success--3 years in a row. Organized by grade level--This math workbook is divided into sections for 3rd, 4th, and 5th grade exercises, with easy color-coding for quick navigation. Plenty of practice--Kids will work through a range of multiplication and division problems, including mixed problems, and word problems, and times tables from 0 to 12. Fun and engaging--A colorful format and a wide variety of exercises keep kids interested as they tackle important math skills. Help kids build their math skills while having fun with The Multiplication Workbook for Grades 3, 4, and 5.

Math from Three to Seven Kumon Pub North America Limited

This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s. As anyone who has taught or raised young children knows, mathematical education for little kids is a real mystery. What are they capable of? What should they learn first? How hard should they work? Should they even "work" at all? Should we push them, or just let them be? There are no correct answers to these questions, and the author deals with them in classic math-circle style: he doesn't ask and then answer a question, but shows us a problem--be it mathematical or pedagogical--and describes to us what happened. His book is a narrative about what he did, what he tried, what worked, what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half-dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual development in young children will find this book to be an invaluable, inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

Word Problems, Grade 6 American Bar Association

"This workbook will help your child perform multiple-digit vertical form division with remainders."--Cover.

Geometry, Grades 6 - 8 Kumon Pub North America Limited

Stars, Squares, Triangles and Circles...the world is full of shapes and so is this unique Tub Time Poster.

Kumon Publishing North America

Teach basic math skills like negative numbers, percentages, and decimals using word problems! Your students' reading skills will be strengthened as they learn basic math operations and critical thinking skills. The word problems included in this book are interesting enough to hold student attention, yet challenging enough to strengthen math skills. This book is designed to be completed by the student with little or no help from a parent or teacher which makes it a great resource for use at home or school.
