Transportation Wentworth Press

Lavishly illustrated and a joy to read, this authoritative reference work on the North

American continent's railroads covers the U.S., Canadian, Mexican, Central American, and Cuban systems. The encyclopedia's over-arching theme is the evolution of the railroad industry and the historical impact of its progress on the North American continent. This thoroughly researched work examines the various aspects of the industry's development: technology, operations, cultural impact, the evolution of public policy regarding the industry, and the structural functioning of modern railroads. More than 500 alphabetical entries cover a myriad of subjects, including numerous entries profiling the principal companies, suppliers, manufacturers, and individuals influencing the history of the rails. Extensive appendices provide data regarding weight, fuel, statistical trends, and more, as well as a list of 130 vital railroad books. Railfans will treasure this indispensable work.

Bulletin 2570 Government Printing Office Pursuant to a congressional request, GAO evaluated Amtrak's training programs for new locomotive engineers, assistant conductors, signal maintainers, and mechanics (carmen) and foremen in the Amtrak Mechanical Department. GAO found that: (1) the engineer training program is centrally designed and managed, mandatory for all new engineers, and designed to be consistently delivered to all trainees; (2) the assistant conductor training is centrally developed and mandatory for all new assistant conductors; (3) Amtrak promotes trainees to positions as signal maintainers without ensuring that they complete important classroom training; (4) Amtrak's training programs for most of its carmen and mechanical foremen are not centrally designed and managed or consistently applied; (5) Amtrak does not routinely train its foremen in the multiple crafts they

supervise; and (6) foremen are expected to decide whether carman trainees have the skills to become fully qualified carmen when they may not have the technical skills to make this determination.
