Active Radar Cross Section Reduction Theory And Applications

ESMERALDA DARION

Active Radar Cross Section Reduction by Hema Singh Active Radar Cross Section ReductionRadar cross-section (RCS) is a measure of how detectable an object is by radar.Therefore, it is called electromagnetic signature of the object. A larger RCS indicates that an object is more easily detected.. An object reflects a limited amount of radar energy back to the source.Radar cross-section - WikipediaThis book discusses the active and passive radar cross section (RCS) estimation and techniques to examine the low observable aerospace platforms. It begins with the fundamentals of RCS, followed by the dielectric, magnetic and metamaterials parameters of the constituent materials and then explains various methods and the emerging trends followed in this area of study.Active Radar Cross Section Reduction by Hema SinghThis book discusses the active and passive radar cross section (RCS) estimation and techniques to examine the low observable aerospace platforms. It begins with the fundamentals of RCS, followed by the dielectric, magnetic and metamaterials parameters of the constituent materials and then explains various methods and the emerging trends followed in this area of study.Active Radar Cross Section Reduction: Theory and ...1. Introduction to radar cross section reduction--2. RAM analysis for low observable platforms--3. RCS of phased antenna arrays--4. Active RCS reduction in phased arrays--5. Mutual coupling effects in phased arrays--6. RCS of dipole array including mutual coupling effects--7. Performance of sidelobe cancellers in active RCS reduction--8.Active Radar Cross Section Reduction : Theory and ...Amazon.in - Buy Active Radar Cross Section Reduction: Theory and Applications book online at best prices in India on Amazon.in.
