Designed for undergraduate students of set theory, *Classic Set Theory* presents a modern perspective of the classic work of Georg Cantor and Richard Dedekind and their immediate successors. This includes: The definition of the real

numbers in terms of rational numbers and ultimately in terms of natural numbers Defining natural numbers in terms of sets The potential paradoxes in set theory The Zermelo-Fraenkel axioms for set theory The axiom of choice The arithmetic of ordered sets Cantor's two sorts of transfinite number - cardinals and ordinals - and the arithmetic of these. The book is designed for students studying on their own, without access to lecturers and other

reading, along the lines of the internationally renowned courses produced by the Open University. There are thus a large number of exercises within the main body of the text designed to help students engage with the subject, many of which have full teaching solutions. In addition, there are a number of exercises without answers so students studying under the guidance of a tutor may be assessed. Classic Set Theory gives students sufficient grounding in a

rigorous approach to the revolutionary results of set theory as well as pleasure in being able to tackle significant problems that arise from the theory.

This book is the third of four volumes presenting the standard text of, and commentary on, the inscriptions that have come to be known as the "Athenian Tribute Lists." Through the tribute lists, historians have been able to study the extent and nature of the Athenian empire that grew out of the Delian League established to combat the Persians in 478/7 B.C. The inscriptions provide evidence of the money paid to Athens by other

members of the League after the tribute treasury was moved from Delos to Athens in 454 B.C. The texts persist from the 450s through to the 430s, after which the evidence is very fragmentary and often undatable. This volume provides a historical commentary on the inscriptions presented in detail in Volumes I and II, tying them into a history of the Athenian empire in narrative form. *Florida Flambeau; 1943*
