Transnational Land Grabs
and Restitution in an Age
of the (De-)Militarised
New Scramble for Africa:
A Pan African Socio-Legal

Prometheus Books

Nearly four thousand
entries cover terms in all
disciplines contributed by
experts in each field, with
suggestions for further
reading

A Mental Theater Langaa
RPCIG

One of the fundamental
challenges in
deconstructing, rethinking
and remaking the world
from a Pan African
vantage point is that
some captives have
tended to delight in the
warmth of the [imperial]
predator's mouth. In other
words, some captives
forget that the imperial
predator's mouth gets
warm because empire is

eating and heating up
from prey on the
continent. (De-
)Militarisation,
Transnational Land Grabs
and Restitution in an Age
of the New Scramble for
Africa: A Pan African
Socio-Legal Perspective is
a book that knocks on key
aspects relating to land,
militarisation, a
PostAfrican World Order
and a chaotic Post-God

require critical scholarly
and policy attention in the
quest to free Africa from
centuries-old imperial
depredations. The book
carefully navigates the
imperial entrapments
which are designed to
focus African attention
only on decolonising
African minds without also
engaging in the
[imperially more
unsettling] decolonisation
of African materialities.

*A Cultural-historical
Investigation of the Dark
Side in the Pre-modern
World* African Books
Collective
From Freud to the new
atheists, it is widely
assumed that science is
the enemy of religious
faith. The idea is so
pervasive that whole
industries of religious
apologetics converge
around the challenge of
Darwin, evolution, and the
"secular worldview." This
book challenges such
assumptions by proposing
a different cause of
unbelief in the West: the
Christian conscience.
Tracing a history of doubt
and unbelief from the
Reformation to the age of
Darwin and Karl Marx, *The
Soul of Doubt* argues that
the most powerful
solvents of religious
orthodoxy have been
concepts of moral equity
and personal freedom
generated by Christianity
itself. The book
demonstrates that the
radical criticism of
philosophers as influential
as Spinoza, Voltaire and
Ludwig Feuerbach was

not the product of science. It emerged from a collision between religious values and religious practices, preeminently acts of persecution. This study offers a bold interpretation of the Enlightenment as a movement of vigorous spirituality, and it turns on its head conventional wisdom about the impact of Darwin and scientific naturalism. The "nemesis of faith" was not science or secular reason: it was an ethical intuition that a dangerous God cannot be real.

Magazine Routledge
"The book is readable and challenging; readers will never see psychiatry in the same way again." -- Choice Reviews Originally called mad-doctoring, psychiatry began in the seventeenth century with the establishing of madhouses and the legal empowering of doctors to incarcerate persons denominated as insane. Until the end of the nineteenth century, every relationship between psychiatrist and patient was based on domination and coercion, as between master and slave. Psychiatry, its emblem the state mental hospital, was a part of the public

sphere, the sphere of coercion. The advent of private psychotherapy, at the end of the nineteenth century, split psychiatry in two: some patients continued to be the involuntary inmates of state hospitals; others became the voluntary patients of privately practicing psychotherapists. Psychotherapy was officially defined as a type of medical treatment, but actually was a secular-medical version of the cure of souls. Relationships between therapist and patient, Thomas Szasz argues, was based on cooperation and contract, as is relationships between employer and employee, or, between clergyman and parishioner. Psychotherapy, its emblem the therapist's office, was a part of the private sphere, the contract. Through most of the twentieth century, psychiatry was a house divided-half-slave, and half-free. During the past few decades, psychiatry became united again: all relations between psychiatrists and patients, regardless of the nature of the interaction between them, are now based on actual or potential coercion. This situation is

the result of two major "reforms" that deprive therapist and patient alike of the freedom to contract with one another: Therapists now have a double duty: they must protect all mental patients-involuntary and voluntary, hospitalized or outpatient, incompetent or competent-from themselves. They must also protect the public from all patients. Persons designated as mental patients may be exempted from responsibility for the deleterious consequences of their own behavior if it is attributed to mental illness. The radical differences between the coercive character of mental hospital practices in the public sphere, and the consensual character of psychotherapeutic practices in the private sphere, are thus destroyed. At the same time, as the scope of psychiatric coercion expands from the mental hospital to the psychiatrist's office, its reach extends into every part of society, from early childhood to old age. Thomas Szasz is professor of psychiatry emeritus at the State University of New York Health Science Center in Syracuse, New York and Adjunct Scholar

at the Cato Institute, Washington, DC. He is the author of over two dozen books in fifteen languages, including *The Myth of Mental Illness* and most recently, *Pharmacocracy: Medicine and Politics in America*. "The book is readable and challenging; readers will never see psychiatry in the same way again."--Choice "Szasz now appears to have been transformed into an ally rather than an enemy of the National Health Service general adult psychiatrist. Szasz's project has always been to argue passionately for a boundary of demarcation around the responsibility and power of psychiatry....But what saves this book from being just another mugging of psychiatry is that Szasz does raise a fundamental question at the core of our discipline. If we restricted our attention only to those clients who wanted to see a psychiatrist, and disengaged from all those who really didn't, how different might our professional practice and experience be?"--*The British Journal of Psychiatry*

The Mechanical Universe
Imagine a world where a majority of the people on the planet have been hypnotized. Imagine that virtually all the important world leaders have been hypnotized. In their hypnotized state they still do have a degree of functionality. They are not totally out of touch with reality, but their perception of the world is slightly amiss. They can still walk and talk. They still enjoy human relationships. They breathe, eat and drink. But their distorted perception causes them to act in ways that are destructive. Their distorted perception causes them to feel less joy in life. They are harming themselves, other people and the environment because of their distorted perception. And the basis of this distorted perception is that on a subconscious level of mind they have been programmed to believe themselves to be in a mechanical universe. Subconsciously they believe that they are surrounded by a giant machine. Subconsciously they believe that they are a machine within a machine. And these subconscious distortions are always there. On a

conscious level of mind they are not aware of how they have been hypnotized. They have no conscious awareness of the fact that they are in a persistent hypnotic state. This is the nature of subconscious programming - the hypnotized person is simply not aware of the programming. This book is about deprogramming this mechanical universe. This book is unique, you won't find any other book on deprogramming that is quite like this one. I describe a system of mind control that was developed by other persons. These persons were former MK Ultra researchers who had become disillusioned with the CIA and the MK Ultra research program. So they began to covertly help those persons who were the victims of Satanic Ritual Abuse and MK Ultra. I'm the only person who is willing to publicly describe their system of therapy. I don't give advice on how to perform therapy, I only share information. In some cases the information comes from therapists who have treated MK Ultra and Monarch mind control. In this book I tell stories and share unique insights. I'm

am a survivor of Satanic Ritual Abuse and some MK Ultra techniques. I want to give hope to other survivors who are trying to recover. And I want to give some new viewpoints for therapy to those who are trying to help recovering survivors. This book was written as a sequel of sorts to my two previous books: *Angelic Defenders and Demonic Abusers - Memoirs of a Satanic Ritual Abuse Survivor*, and *Cannibalism, Blood Drinking & High Adept Satanism*.

An in-depth look into the foundations of mysticism and alchemy, this book describes both physical and spiritual aspects of the various theories and practices of transformation, with attention to the beliefs of Buddhism, Christianity, Hinduism, Islam, Judaism, Sufism, Tantrism, Taoism and Yoga. The connection between early mystical pursuits and the development of alchemy from ancient China, India, and Egypt through Moorish Spain and into Latin Europe are illuminated, along with the activities of early alchemists. The book, which is heavily

illustrated, describes the beliefs, experiments, and secret messages that drew the believers and dreamers of the world together in search of wealth and immortality. Stages of Meditation Oxford University Press
One of the fundamental challenges in deconstructing, rethinking and remaking the world from a Pan African vantage point is that some captives have tended to delight in the warmth of the [imperial] predator's mouth. In other words, some captives forget that the imperial predator's mouth gets warm because empire is eating and heating up from prey on the continent. focus African attention only on decolonising African minds without also engaging in the [imperially more unsettling] decolonisation of African materialities. *Forms of Empire* Rowman & Littlefield
It never ceases to amaze me when Africa and the world outside of Africa are brought up for discussion. Africa is home to most of the natural resources, and this is the most important fact that I intend to share throughout this entire book. Given these two facts, one must come to appreciate the people who started it all, and the land that makes it possible for the world to function. However, in our current reality, this is not so. But this is where, we the adults, the parents, the teachers, the people who can influence the children come into play. We have a responsible, and it is necessary to treat the children just as we treat those materialistic items we cherish! Imagine being introduced to a particular culture during the age whereas you are developing a sense of who you are as a person, and your character is now being orchestrated by the environment in which you inhabit? You are your

child's first teacher(s), and whatever you teach them whether it is direct or indirect, they will pick up on your behavior. With that being said, keep your child in an environment that pushes their ambitions to learn more and more!

Movies in the Age of Obama Transaction Publishers

This ground-breaking book examines inequalities experienced by LGBT people and considers the role of social work in addressing them. The book is organised in three parts: the first provides a policy context in four countries, the second examines social work practice in tackling health inequalities, and part three considers research and pedagogic developments. The book's distinctive approach includes international contributions, practice vignettes and key theoretical perspectives in health inequalities, including social determinants of health, minority stress, ecological approaches and human rights. Lesbian, gay, bisexual and trans health inequalities is relevant to social work educators, practitioners and students, alongside an

interdisciplinary audience interested in LGBT health inequalities.

A positive, optimistic, and convincing case that the biotechnology revolution will improve our lives and the future of our children, while preserving and enhancing the natural environment. The 21st century will undoubtedly witness unprecedented advances in understanding the mechanisms of the human body and in developing biotechnology. With the mapping of the human genome, the pace of discovery is now on the fast track. By the middle of the century, we can expect that the rapid progress in biology and biotechnology will utterly transform human life. What was once the stuff of science fiction may now be within reach in the not-too-distant future: 20-to-40-year leaps in average life spans, enhanced human bodies, drugs and therapies to boost memory and speed up mental processing, and a genetic science that allows parents to ensure that their children will have stronger immune systems, more athletic bodies, and cleverer brains. Even the prospect

of human immortality beckons. Such scenarios excite many people and frighten or appall many others. Already biotechnology opponents are organizing political movements aimed at restricting scientific research, banning the development and commercialization of various products and technologies, and limiting citizens' access to the fruits of the biotech revolution. In this forward-looking book Ronald Bailey, science writer for Reason magazine, argues that the coming biotechnology revolution, far from endangering human dignity, will liberate human beings to achieve their full potentials by enabling more of us to live flourishing lives free of disease, disability, and the threat of early death. Bailey covers the full range of the coming biotechnology breakthroughs, from stem-cell research to third-world farming, from brain-enhancing neuropharmaceuticals to designer babies. Against critics of these trends, who forecast the nightmare society of Huxley's Brave New World, Bailey persuasively shows in lucid and well-

argued prose that the health, safety, and ethical concerns raised by worried citizens and policymakers are misplaced. Liberation Biology makes a positive, optimistic, and convincing case that the biotechnology revolution will improve our lives and the future of our children, while preserving and enhancing the natural environment. Ronald Bailey (Charlottesville, VA) is the science correspondent for Reason magazine, a former television producer, and the author of Global Warming and Other Eco-Myths and Eco-Scam: The False Prophets of the Apocalypse. His articles and reviews have appeared in the New York Times Book Review, the Washington Post, the Wall Street Journal, Smithsonian, National Review, Forbes, and many other publications.

Why Guattari? A Liberation of Cartographies, Ecologies and Politics

Martinus Institute
A history of how Norway and Sweden became the envy of the modern world This is the history of how two countries on the northern edge of Europe built societies in the twentieth century that

became objects of inspiration and envy around the world. Francis Sejersted, one of Scandinavia's leading historians, tells how Norway and Sweden achieved a rare feat by realizing grand visions of societies that combine stability, prosperity, and social welfare. It is a history that holds many valuable lessons today, at a time of renewed interest in the Scandinavian model. The book tells the story of social democracy from the separation of Norway and Sweden in 1905 through the end of the century, tracing its development from revolutionary beginnings through postwar triumph, as it became a hegemonic social order that left its stamp on every sector of society, the economy, welfare, culture, education, and family. The book also tells how in the 1980s, partly in reaction to the strong state, a freedom and rights revolution led to a partial erosion of social democracy. Yet despite the fracturing of consensus and the many economic and social challenges facing Norway and Sweden today, the achievement of their welfare states remains largely intact.

The Young men's magazine [afterw.] The Association, or Young men's magazine

CreateSpace
This book examines Félix Guattari, the French psychoanalyst, philosopher, and radical activist, renowned for an energetic style of thought that cuts across conceptual, political, and institutional spheres. Increasingly recognised as a key figure in his own right, Guattari's influence in contemporary social theory and the modern social sciences continues to grow. From the ecosophy of hurricanes to the micropolitics of cinema, the book draws together a series of Guattarian motifs which animate the complexity of one of the twentieth century's greatest and most enigmatic thinkers. The book examines techniques and modes of thought that contribute to a liberation of thinking and subjectivity. Divided thematically into three parts - 'cartographies', 'ecologies', and 'micropolitics' - each chapter showcases the singular and pragmatic grounds by which Guattari's signature concepts can be found to be both disruptive to traditional modes of

thinking, and generative toward novel forms of ethics, politics and sociality. This interdisciplinary compendium on Guattari's exciting, experimental, and enigmatic thought will appeal to academics and postgraduates within Social Theory, Human Geography, and Continental Philosophy. The Tao of Mental Health and Stability Routledge

A translation of the ancient classic *Stages of Meditation*, by Kamalashila, with commentary from everyone's favorite Buddhist teacher, the Dalai Lama. The Dalai Lama explains the principles of meditation in a practice-oriented format especially suited to Westerners. Based upon the middle section of the *Bhavanakrama* by Kamalashila--a translation of which is included--this is the most extensive commentary given by the Dalai Lama on this concise but important meditation handbook. It is a favorite text of the Dalai Lama, and he often takes the opportunity to give teachings on it to audiences throughout the world. In his words, "This text can be like a key that opens the door to all other major Buddhist

scriptures." Topics include the nature of mind, how to develop compassion and loving-kindness, calm abiding wisdom, and how to establish a union of calm abiding and special insight.

Transnational Land Grabs and Restitution in an Age of the (De-) Militarised New Scramble for Africa: A Pan African Socio-Legal
McFarland

This collection of essays looks at how films in the last few years have reflected and juxtaposed the ascent of Barack Obama and his administration. The films examined here include *The Help*, *Django Unchained*, *Lincoln*, *The Mist*, *Invictus*, *Black Dynamite*, and *The Great Gatsby*. Winter Clothes Us in Shadow and Pain Rowman & Littlefield

Certain works of Romantic drama--Prometheus Unbound, *Cain*, *The Cenci*--have received a good deal of critical attention, by as a whole the genre has been misunderstood and only slightly considered. Alan Richardson redresses a tradition of critical neglect by considering the works of Romantic drama not as failed stage-plays ("closet drama") but as

constituting a new, distinctively Romantic genre. In turning from the contemporary stage--which was marked by spectacle, rant, and melodrama--the Romantic poets developed an altogether new kind of drama, one which they hoped could recapture the intensity of Shakespearean tragedy that Neoclassical writers had scarcely approached. Richardson calls this genre (after Byron) "mental theater," both because its works are concerned with portraying the development of self-consciousness and because it fuses the subjectivity of lyric with the interaction of dramatic poetry. Moreover, these works are addressed directly to the mind of the reader, bypassing the medium of stage representation. This study places Romantic self-consciousness in a fundamentally new light. Far from uncritically pursuing an egoistic stance, the Romantics criticize through their poetic drama the attempt to attain psychic autonomy. The protagonists of Romantic drama are seduced by their antagonists into entering such a condition

only to find in it a hollow, deathly isolation. They find in self-consciousness not their promised liberation, but a tormented fate modeled after that of their betrayers. Wordsworth, Byron, and Shelley delineate the limitations of "Romantic" self-consciousness in their works of mental theater; Shelley alone envisions their transcendence through his radical transformation of consciousness in the conclusion to Prometheus Unbound. This interpretation of mental theater will lead to a new evaluation of the Romantics as dramatic poets. It brings back to critical attention neglected but challenging works such as Byron's *Heaven and Earth* and Beddoes's *Death's Jest-Book*, and provides vital new perspectives on undervalued texts like Wordsworth's *The Borderers* and Byron's *Manfred and Cain*. It qualifies decades of critical speculation on "Romantic individualism" and "Romantic consciousness," and helps return the ideal of imaginative sympathy to the central position held in the critical writings of

the Romantics themselves. Finally, in emphasizing the dramatic quality of mental theater, it challenges the still-prevalent view that Romantic poetry is inherently lyrical in character. Scholars concerned with English Romantic drama, Romantic literature, and the Romantic period as well as English drama will find this work to be an important contribution to their understanding.

In Search of Wisdom in a Secular Age London : Chapman & Hall

In *Forms of Empire*, Nathan K. Hensley shows how the modern state's anguished relationship to violence pushed writers to expand the capacities of literary form. The Victorian era is often imagined as an "age of equipoise," but the period between 1837 and 1901 included more than two hundred separate wars. What is the difference, though, between peace and war? *Forms of Empire* unpacks the seeming paradoxes of the Pax Britannica's endless conflict, showing that the much vaunted equipoise of the nineteenth-century state depended on physical force to guarantee it. But the violence hidden in the

shadows of all law—the violence of sovereign power itself—shuddered most visibly into being at the edges of law's reach, in the Empire, where emergency was the rule and death perversely routinized. This book follows some of the nineteenth century's most astute literary thinkers—George Eliot, Charles Dickens, Wilkie Collins, A.C. Swinburne, H. Rider Haggard, and Robert Louis Stevenson among them—as they wrestled with the sometimes sickening interplay between order and force, and generated new formal techniques to account for fact that an Empire built on freedom had death coiled at its very heart. In contrast to the progressive idealism we have inherited from the Victorians, the writers at the core of *Forms of Empire* moved beyond embarrassment and denial in the face of modernity's uncanny relation to killing. Instead they sought effects—free indirect discourse, lyric tension, and the idea of literary "character" itself—that might render thinkable the conceptual vertigoes of liberal violence. In the process, they touched up to the dark core of our post-

Victorian modernity. Drawing on archival work, literary analyses, and a theoretical framework that troubles the distinction between "historicist" and "formalist" approaches, *Forms of Empire* links the Victorian period to the present and articulates a forceful vision of why literary thinking matters now.

The Road To Paradise

National Academies Press
The Lama Yeshe Wisdom Archive (LYWA) is the collected works of Lama Thubten Yeshe and Kyabje Lama Thubten Zopa Rinpoche. The Archive was founded in 1996 by Lama Zopa Rinpoche, its spiritual director, to make available in various ways the teachings it contains. This book contains the teachings and meditations Lama gave at a five-day retreat he led near Melbourne, Australia, which he introduced by saying: "Whether or not this five-day meditation course becomes beneficial is up to you; it depends on

your own mind. It's not a lama thing; I'm not going to bring you to enlightenment in this short time. Instead of having too many expectations of the lama, it's better that you generate a pure motivation for being here. Expectations cause mental problems; instead of being positive, they become negative..."If over the next five days you can begin to recognize the reality of your own nature, this meditation course will have been worthwhile. Therefore, dedicate your actions during this time to discovering inner freedom through recognizing the negative characteristics of your own uncontrolled mind."In line with Lama's intentions, this book is dedicated to the awakening of inner freedom within the minds of its readers and all other sentient beings.

The Norton Dictionary of Modern Thought

Psychology Press
In this volume, scholars of pre-modern Europe and

the Arab world examine the issues of incarceration and slavery. The emphasis rests on religious, literary, philosophical, and historical narratives, buttressed by art-historical evidence, all of which demonstrates the true importance of these painful problems.

The Eclectic Magazine of Foreign Literature, Science, and Art

Routledge

"Growing Old in the Middle Ages draws a comprehensive picture of medieval old age, describing how it was perceived by different groups in society; what help was given to the ageing; the desire to increase longevity; the consolation offered to the elderly; and the growing concern with physiology. With the increased interest in old age as a subject for historical study, this timely overview is an invaluable contribution to the social history of the whole of medieval Europe"--
