"I too am not a bit  
tamed—I too am  
untranslatable / I sound  
my barbaric yawp over  
the roofs of the

world."—Walt Whitman,  
"Song of Myself," Leaves  
of Grass The American  
Yawp is a free, online,  
collaboratively built  
American history  
textbook. Over 300  
historians joined together  
to create the book they  
wanted for their own  
students—an accessible,  
synthetic narrative that  
reflects the best of recent

historical scholarship and  
provides a jumping-off  
point for discussions in  
the U.S. history classroom  
and beyond. Long before  
Whitman and long after,  
Americans have sung  
something collectively  
amid the deafening roar  
of their many individual  
voices. The Yawp  
highlights the dynamism  
and conflict inherent in

the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp* incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between

maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume II opens in the Gilded Age, before moving through the twentieth century as the country reckoned with economic crises, world wars, and social, cultural, and political upheaval at home. Bringing the narrative up to the present, *The American Yawp* enables students to

ask their own questions about how the past informs the problems and opportunities we confront today.

"This book is the first modern scholarly monograph on the emperor Jovian (363-364). It offers a new assessment of his reign and argues that Jovian's reign was of more importance than assumed by most (ancient and

modern) historians. This study argues that Jovian restored the Roman empire after the failed reign of Julian by returning to the policies of Constantius II and Constantine the Great. Jovian's general strategies were directed to get the Roman empire on its feet again militarily, administratively and religiously after the failed reign of his predecessor Julian (361-363) as well as to establish more peaceful relations with the Sasanid empire. For an emperor who ruled only eight

months Jovian had an unexpected and surprising afterlife. The rarely studied and largely unknown Syriac Julian Romance offers a surprising and different perspective on person and reign of Jovian. In the Romance Jovian is presented as the ideal Christian emperor and a new Constantine. But the Romance is also an important source for Roman-Persian relations and the positioning of Syriac Christianity in the late antique world of Christendom"--

The inspirational success story of the first 100 years of Hutchinson Builders. What started out as a one-man band in 1912, when an English immigrant builder arrived with his family to start a new life in Australia, has grown into the country's largest privately owned

construction company. The Hutchies' story straddles a century that witnessed two world wars, the great depression and tumultuous cycles of financial crises against the back drop of the rough and tumble world of construction. As well as tracking the survival and eventual growth of Hutchies into the dynamic and well respected company of today, the book outlines its evolution through successive generations of Jack Hutchinsons at the helm with a fifth generation

poised to take on that role. That story is told by way of a historical account as well as captured through the republication and inclusion of every back issue of "Hutchies' Truth", the company's colourful, tabloid-style newsletter covering those years. [More Than the Truth](#) Historic England Publishing Anglo-American Exchange in Postwar Sculpture, 1945-1975 redresses an important art historical oversight. Histories of American and British

sculpture are usually told separately, with artists and their work divided by nationality; yet such boundaries obscure a vibrant exchange of ideas, individuals, and aesthetic influences. In reality, the postwar art world saw dynamic interactions between British and American sculptors, critics, curators, teachers, and institutions. Using works of art as points of departure, this book explores the international movement of people, objects, and ideas, demonstrating the

importance of Anglo-American exchange to the history of postwar sculpture.

The British country house has long been regarded as the jewel in the nation's heritage crown. But the country house is also an expression of wealth and power, and as scholars reconsider the nation's colonial past, new questions are being posed about these great houses and their links to Atlantic slavery. This book, authored by a range of

academics and heritage professionals, grew out of a 2009 conference on 'Slavery and the British Country house: mapping the current research' organised by English Heritage in partnership with the University of the West of England, the National Trust and the Economic History Society. It asks what links might be established between the wealth derived from slavery and the British country house and what implications such links should have for the way such properties are

represented to the public today. Lavishly illustrated and based on the latest scholarship, this wide-ranging and innovative volume provides in-depth examinations of individual houses, regional studies and critical reconsiderations of existing heritage sites, including two studies specially commissioned by English Heritage and one sponsored by the National Trust.

This succinct, accessible two-volume set covers all aspects of Celtic historical life, from prehistory to the present day. The study of Celtic history has a wide international appeal, but unfortunately many of the available books on the subject are out-of-date, narrowly specialized, or contain incorrect information. Online information on the Celts is

similarly unreliable. This two-volume set provides a well-written, up-to-date, and densely informative reference on Celtic history that is ideal for high school or college-aged students as well as general readers. The Celts: History, Life, and Culture uses a cross-disciplinary approach to explore all facets of this ancient society. The book introduces the archaeology, art history, folklore, history, linguistics, literature, music, and mythology of the Celts and examines

the global influence of their legacy. Written entirely by acknowledged experts, the content is accessible without being simplistic. Unlike other texts in the field, The Celts: History, Life, and Culture celebrates all of the cultures associated with Celtic languages at all periods, providing for a richer and more comprehensive examination of the topic.

The enlightening, best-selling book on

understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from – and where it could come from – but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. Sustainable Energy – without the hot air addresses the energy

crisis objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale - for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear

energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to

encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book - it's an honest, realistic, and humorous discussion of all our energy options. *Slavery and the British Country House* University of Arizona Press

This book is written at a time when our own field of adult education is under assault from a variety of capitalist and neoconservative forces pressuring us... to turn away from the causes of criticality, lifelong learning, and education for freedom. Rather than succumb to these pressures, we have hope that our long term goals of education for life and living can and will be accomplished alongside professional and vocational education. This book offers new insight

into what is a very dark moment of our human civilization. From the preface by Dr Carlos Alberto Torres, Professor, GSEIS, Director, Paulo Freire Institute, University of California at Los Angeles The book offers decidedly critical and international perspectives on various aspects of adult education, especially on state, citizenship and neoliberal policies. Critical in both content and method, it is at the same time the part of the collective work needed to advance the

Belém call to action by furthering awareness and capacity in the field of adult education. Dr Katarina Popovic, Professor, Universität Duisburg-Essen, University of Belgrade & DBB International, In the midst of diminishing resources and growing inequalities, English and Mayo provide an incisive and much needed critique of adult education in ways that highlight not only its historical and philosophical roots but also its major significance to the practice of

democracy. In a direct challenge to the neoliberal accountability craze, *Learning with Adults* offers a rigorous political reading of the field—one that systematically challenges oppressive educational policies and practices, while affirming an emancipatory vision of civic engagement. Truly an informative treatise that sheds new light on the education of adults. Dr Antonia Darder Professor & Leavey Presidential Endowed Chair in Education Loyola

Marymount University Los Angeles Leona English and Peter Mayo challenge hegemonic assumptions and ideas, while offering a constructive alternative based on the principle of working with learners and not just for them. Their analysis is accessible enough for newcomers to the field, while the authors' wide-ranging coverage and radical approach provide refreshing and challenging messages for the most experienced adult educator. Up-to-date, genuinely

international and passionately committed, *Learning with Adults* is a great book. Dr John Field, Professor, University of Stirling Cover design by Annemarie Mayo The Publisher Penguin Transference of orientalist images and identities to the American landscape and its inhabitants, especially in the West—in other words, portrayal of the West as the “Orient”—has been a common aspect of American cultural history. Place names, such as the Jordan River or Pyramid

Lake, offer notable examples, but the imagery and its varied meanings are more widespread and significant. Understanding that range and significance, especially to the western part of the continent, means coming to terms with the complicated, nuanced ideas of the Orient and of the North American continent that European Americans brought to the West. Such complexity is what historical geographer Richard Francaviglia unravels in

this book. Since the publication of Edward Said's book, *Orientalism*, the term has come to signify something one-dimensionally negative. In essence, the orientalist vision was an ethnocentric characterization of the peoples of Asia (and Africa and the "Near East") as exotic, primitive "others" subject to conquest by the nations of Europe. That now well-established point, which expresses a postcolonial perspective, is critical, but Francaviglia suggest that

it overlooks much variation and complexity in the views of historical actors and writers, many of whom thought of western places in terms of an idealized and romanticized Orient. It likewise neglects positive images and interpretations to focus on those of a decadent and ostensibly inferior East. We cannot understand well or fully what the pervasive orientalism found in western cultural history meant, says Francaviglia, if we focus only on its role as an

intellectual engine for European imperialism. It did play that role as well in the American West. One only need think about characterizations of American Indians as Bedouins of the Plains destined for displacement by a settled frontier. Other roles for orientalism, though, from romantic to commercial ones, were also widely in play. In *Go East, Young Man*, Francaviglia explores a broad range of orientalist images deployed in the context of European settlement of

the American West, and he unfolds their multiple significances.

Oxford University Press 'Counterculture' emerged as a term in the late 1960s and has been re-deployed in more recent decades in relation to other forms of cultural and socio-political phenomena. This volume provides an essential new academic scrutiny of the concept of 'counterculture' and a critical examination of the period and its heritage. Recent developments in

sociological theory complicate and problematise theories developed in the 1960s, with digital technology, for example, providing an impetus for new understandings of counterculture. Music played a significant part in the way that the counterculture authored space in relation to articulations of community by providing a shared sense of collective identity. Not least, the heady mixture of genres provided a socio-cultural-political backdrop for

distinctive musical practices and innovations which, in relation to counterculture ideology, provided a rich experiential setting in which different groups defined their relationship both to the local and international dimensions of the movement, so providing a sense of locality, community and collective identity. Building News Bloomsbury Publishing Folklore and archaeology are traditionally seen as taking very different approaches to the

interpretation of the past. This book explores the complex relationship between the disciplines to show what they might learn from each other. LEARNING WITH ADULTS Routledge Quaternary Paleoenvironments examines the drowned landscapes exposed as extensive and attractive territory for prehistoric human settlement during the Ice Ages of the Pleistocene, when sea levels dropped to 120m-135m below their current levels. This

volume provides an overview of the geological, geomorphological, climatic and sea-level history of the European continental shelf as a whole, as well as a series of detailed regional reviews for each of the major sea basins. The nature and variable attractions of the landscapes and resources available for human exploitation are examined, as are the conditions under which archaeological sites and landscape features are

likely to have been preserved, destroyed or buried by sediment during sea-level rise. The authors also discuss the extent to which we can predict where to look for drowned landscapes with the greatest chance of success, with frequent reference to examples of preserved prehistoric sites in different submerged environments. Quaternary Paleoenvironments will be of interest to archaeologists, geologists, marine scientists, palaeoanthropologists, cultural heritage

managers, geographers, and all those with an interest in the drowned landscapes of the continental shelf.

*Against the Galileans* (where "Galileans" meant the followers of the man from Galilee, or Christians) was written by the last pagan Emperor of Rome, Flavius Claudius Julianus, who lived from 331-363 AD, as part of his attempts to reverse the Empire's conversion to Christianity started by Emperor Constantine in 313 AD. This work was acknowledged by one of Julian's greatest critics, Cyril, the Patriarch of

Alexandria, as one of the most powerful books of its sort ever written. Even though Cyril was Patriarch nearly 90 years after Julian's death, he was motivated to write a refutation titled *Contra Iulianum* ("Against Julian"). For more than 200 years, Julian's book remained the standard criticism of Christianity. Finally, in an attempt to suppress the work, the Emperor Justinian I (527-565) ordered all copies of the book destroyed. As a result, the only record of Julian's

book remained in the parts quoted from it in Cyril's criticism. It was only more than 1,200 years later that the English classical scholar Thomas Taylor (1758-1835) first translated Cyril's work into English-and from that, attempted a reconstruction of Julian's book based on Julian's quotes from Cyril's work. Taylor titled this manuscript "The Arguments of the Emperor Julian against the Christians, translated

from the Greek fragments preserved from the Greek fragments preserved by Cyril Bishop of Alexandria, to which are added, Extracts from the other works of Julian relative to the Christians" and privately published his reconstruction in 1809 for a very limited circle of friends. Taylor's reconstruction was finally published for a larger audience by William Nevis in 1873. This new edition contains the full Taylor reconstruction, along with his original appendices. From 1913 to 1923,

British-American classical philologist and Professor of Greek at Bryn Mawr College, Pennsylvania, Wilmer Cave Wright, retranslated all of Julian's works. Wright included a new translation of the exact quotes only from Julian, as reproduced by Cyril, and some other remaining fragments. Wright's original manuscript is also included in this new edition, making it to be the most complete reconstruction of Julian's book ever printed.
