Seminar paper from the year 2005 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 2,0, University of Wuppertal, course: Teaching English to very young children, 10 entries in the bibliography, language: English, abstract: In 1999, Rea-Dickens and Rixon conducted a survey about the relationship between assessment and learning. 120 European teachers and teacher trainers were asked if the main purpose of their assessment was to help their teaching, and 97% answered in the affirmative. Rea-Dickens and Rixon examined afterwards what the teachers really assessed and how they did so. They found a

strong "mismatch between curricular aims, pedagogy and test content" (Cameron, Lynne. Teaching languages to very young learners. Cambridge University press. 2001. page 217). The assessment focused mainly on the children's achievements but neglected on other curricular aims such as language and social awareness. The assessment of young learners should serve teaching by providing feedback on the children's learning progress, so that the content and the difficulty of subsequent teaching units can be effectively adjusted to the learners' needs. This paper offers the reader an overview about the theoretical ideas and principles which should be kept in mind when implementing an assessment. Furthermore the guidelines of lower Saxony are introduced. They illustrate the expectations of the German school system towards assessment in class. Afterwards the paper gives an overview about psycholinguistic tests such as "Blitztest" and "F-Test." Additionally, the paper answers the question of origin and purpose of the Cambridge Young Learners Test. Finally, material which should support the teacher in the efficiency assessment of the pupils is represented, considering the example of "Ginger."

**Getting Started I** Allyn & Bacon

This edited book uses the concept of diversity in child foreign language education as a major organizing principle. Since a foreign language, most typically English, is taught globally to an increasing number of children, the variability in the process and

varied learning outcomes are inescapable phenomena. This book has been constructed on the premise that heterogeneity, first, concerns young language learners, who due to the disparity in the pace of development need appropriately tailored educational solutions, and, second, it refers to a diversity of contexts in which learning takes place. The contexts can be defined on a macroscale (e.g. different countries), mesoscale (e.g. different institutions), and microscale (e.g. specific learner groups). The book consists of four thematic strands. In Part One the learner-internal causes of heterogeneity of young language learners are clarified. Part Two presents a sample of classroom studies in which learner variables, such as gender, learner preferences, and special needs are taken into account. Part Three looks at teaching materials and how they meet learners' needs. Finally, Part Four highlights diversity issues that teachers should be prepared to face.

#### Languages and Learners Bloomsbury Publishing

Literacy has traditionally been associated with the linguistic and functional ability to read and write. Although literacy, as a fundamental issue in education, has received abundant attention in the last few decades, most publications to date have focused on monolingual classrooms. Language teacher educators have a responsibility to prepare teachers to be culturally responsive and flexible so they can adapt to the range of settings and variety of learners they will encounter in their careers while also bravely questioning the assumptions they are encountering about multilingual literacy development and instruction. The Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms is an essential scholarly publication that explores the

multifaceted nature of literacy development across the lifespan in a range of multilingual contexts. Recognizing that literacy instruction in contemporary language classrooms serving diverse student populations must go beyond developing reading and writing abilities, this book sets out to explore a wide range of literacy dimensions. It offers unique perspectives through a critical reflection on issues related to power, ownership, identity, and the social construction of literacy in multilingual societies. As a resource for use in language teacher preparation programs globally, this book will provide a range of theoretical and practical perspectives while creating space for pre- and in-service teachers to grapple with the ideas in light of their respective contexts. The book will also provide valuable insights to instructional designers, curriculum developers, linguists, professionals, academicians, administrators, researchers, and students.

Nicholas Allen has plenty of ideas. Who can forget the time he turned the classroom into a tropical island, or the times he has fooled the teacher by chirping like a blackbird? But now it looks like his days as a troublemaker are over. Now Nick is in Mrs Granger's class - she who has X-ray vision - and everyone knows

that nobody gets away with anything in her classroom. To make matters worse, Mrs Granger is also fanatical about the dictionary - which Nick thinks is so boring. But then inspiration strikes and Nicholas invents his greatest plan yet: to create a new word. From now on, a pen is no longer a pen - it's a frindle. It doesn't

take long to catch on and soon the excitement has spread well beyond the school and town . . . but frindle doesn't belong to Nick anymore, it has a life of it's own, and all Nick can do now, is sit back and watch what happens.
