The use of creative writing as a route to personal development is a powerful therapeutic tool - a fact that is recognized in the growing numbers of workshops and writing groups within professional contexts, including clinical, health and criminal justice settings. Writing Works is a guide for writers or therapists working with groups or individuals and is full of practical advice on everything from the equipment needed to run a session to ideas for themes, all backed up by the theory that underpins the methods explained. Experienced practitioners in the field contribute detailed illuminating accounts of organizing writing workshops for a wide range of different clients, together

with examples of their outcomes. This book will be an invaluable start-up reference for arts therapists and professionals working across the health, social care and caring professions, and one that will be referred to again and again.

How would the humanities change if we grappled with the ways in which digital and virtual places are designed, experienced, and critiqued? In *Rethinking Virtual Places*, Erik Malcolm Champion draws from the fields of computational sciences and other place-related disciplines to argue for a more central role for virtual space in the humanities. For instance, recent developments in neuroscience could improve our understanding of how people experience, store, and recollect place-related encounters. Similarly, game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient. In addition, Champion provides a brief introduction to new and emerging software and devices and explains how they help, hinder, or replace our traditional means of designing and exploring places. Perfect for humanities scholars fascinated by the potential of virtual space, *Rethinking Virtual Places*

challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those

instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Divided into three parts, the first of which provides a linguistic definition of professional documents, describing their different types and genres. This definition necessarily takes into account both the formal characteristics of these types of document (e.g. nature of linguistic units involved) and their functional goals (the way these linguistic units are used to fulfill the text's communicative aim). The second part focuses on the mental mechanisms involved in written production in the workplace. One of the aims of a professional writer is to compose a text which can be understood. Text composition involves specific processes and strategies that can be enhanced. One way of doing this is to give the writer suitable instructions, while another is to provide him/her with a suitable writing environment. This last aspect leads us to devote the third and final section to the comprehension of written documents in the workplace. Awareness of the strategies implemented by different readers (with more or less domain expertise) in order to understand technical and professional documents can enhance the latter's readability.

*Contributions from linguists, psychologists and ergonomists from various countries ensure international scope and comprehensiveness *Bridges the gap between fundamental research into writing and reading and the issue of the efficiency of written communication in the workplace

*Enables better content creation for professional writers

This methodologically oriented collection brings together higher education diary research studies from international contexts to showcase the versatility of the method and its adaptability to higher education research. While keeping a diary is a familiar personal practice, diary method is a neglected form of research in higher education studies as well as the social sciences more broadly. This book showcases the range of options within diary method, as well as the benefits and challenges that this fascinating but mysterious method may bring to students and academic researchers alike. The benefits and the risks and challenges of diary research are discussed across the empirical studies included in the volume. Using a variety of solicited diary techniques, including audio, written and photo diaries, and focusing on different aspects of higher education including undergraduate and postgraduate students and academics, these studies include salient topics such as: LGBTQ identities, faith, caring responsibilities, international students, socioeconomically disadvantaged students and employability. This important contribution to methodological innovation in the higher education research field promotes diary method as a viable option in social sciences and beyond. Whether new to the method or a seasoned diary researcher, this book is ideal reading for anyone who would like to learn the fundamentals of diary research and explore its feasibility in empirical contexts.

This book guides the student reader in preparing their dissertation or major project, including both report and presentation, and explains how to use them as a bridge to the "next big thing" - the graduate's first job, or their next degree. The dissertation is the single most important component of an engineering degree, not only carrying the most marks, but bridging from academic study to professional practice. *Achieving Success with the Engineering Dissertation* describes the different types of dissertation, how to pick the best project and how a student can prepare themselves to succeed with their own dissertation. The authors explain how best to plan and execute the project, including the roles of the student, supervisor and project sponsor, and what they should expect from each other. Further material includes details of competitions that can be entered with dissertation projects, presentation of data, using the dissertation in job interviews, and creating research publications. *Achieving Success with the Engineering Dissertation* will be of use to both undergraduate and postgraduate students in all fields of Engineering, and to their supervisors.

A seminal text in the field, this new edition of *The Routledge Handbook of Health Communication* provides students and scholars with a comprehensive survey of the subject's key research foundations and trends, authored by the discipline's leading scholars. The third edition has been completely updated and reorganized to guide both new researchers and experienced scholars through the most critical and contemporary topics in health communication today. There are eight major sections covering a range of issues, including interpersonal and family health communication; patient-provider communication; healthcare provider and organizational health communication; mediated health communication; campaigns, interventions, and technology applications; and broad issues such as health literacy, health equity, and intercultural communication. Attention also is devoted to foundational issues in health communication, such as theory and method; multidisciplinary, interdisciplinary, and transdisciplinary communication research; research translation, implementation, and dissemination; and narrative health communication. There is new attention to policy and NGOs, the environment, public health crises, global health, mental health and mental illness, and marginalized populations such as Black, Latinx (a/o), Native/First People, and LGBTQ+ individuals, as well as the multiple challenges health communication researchers face in conducting research. The handbook will continue to serve as an invaluable resource for students, researchers, scholars, policymakers, and healthcare professionals doing work in health communication.

"This is the best textbook about writing an M.A. thesis available in the market." --Hsin-I Liu, University of the Incarnate Word The Third Edition of *How to Write a Master's Thesis* is a comprehensive manual on how to plan and write a five-chapter master's thesis, and a great resource for graduate students looking for concrete, applied guidance on how to successfully complete their master's degrees. While research methods and statistics courses may teach students the basic information on how to conduct research, putting it all together into a single project and document can be a challenge. Author Yvonne Bui demystifies this process by integrating the language learned in prerequisite methods and statistics courses into a step-by-step guide for developing a student's own thesis or project.

2012 First Place AJN Book of the Year Award Winner in Nursing Research! "This is a resource for success and should be a part of any researcher's library."--Doody's Medical Reviews This book is a practical, user-friendly guide for health care researchers across multiple disciplines who are involved in intervention research. It provides all of the essential elements needed for understanding how to design, conduct, analyze, and fund intervention studies that are replicable and can withstand the scrutiny of the Institutional Review Board and peer review. Developed from an annual continuing education workshop on intervention studies conducted by Dr. Melnyk, this text is the most comprehensive body of information available on this topic. Contributors address the design of interventions that are ethically considerate and sensitive to culture, race/ethnicity, and gender, minimizing threats to external and internal validity, measurement, and budgeting. The guide explores such implementation issues as subject recruitment and retention, data management, and specialized settings, cost analysis, and explaining intervention effects. The text also guides readers in writing grant applications that fund, and addresses how to move intervention study findings into the real world. A unique addition to the book is the availability of digital examples of progress reports, final reports, and research grant applications that have received funding from the National Institutes of Health and other relevant organizations. This text is a valuable resource for all health care professionals conducting research and for doctoral students in health care studies. Key Features: Presents the essential tools for designing, conducting, analyzing, and funding intervention studies Designed for use by health care professionals conducting intervention research Provides comprehensive, accessible guidelines for doctoral students across all health care disciplines Instructs readers on writing grant applications that fund Includes digital examples of funded research grants, progress reports, and final reports
