Conciliation in the Qur'an addresses an existing imbalanced focus in Islamic Studies on conflict in the Qur'an, and moves beyond a restrictive approach to *ṣulḥ* (reconciliation) as a mediation process in fragmented social contexts. The book offers a critical analysis of conciliation as a holistic concept in the Qur'an, providing linguistic and structural insight based on the renowned pre-modern Arabic exegesis of Al-Rāzī (d. 1209) and the understudied contemporary Urdu exegesis of Iṣlāḥī (d. 1997). This ambitious thematic study of the entire Qur'an includes an innovative examination of the central ethical notion of *iḥsān* (gracious conduct), and a challenging discussion of notorious passages relating to conflict. The author offers solutions to unresolved issues such as the significance of the notion of *iṣlāḥ* (order), the relationship between conciliation and justice, and the structural and thematic significance of Q.48 (Sūrat Al-Faḥ) and Q.49 (Sūrat Al-Ḥujurāt). Conciliation in the Qur'an offers a compelling argument for the prevalence of conciliation in the Islamic scripture, and will be an essential read for practitioners in

Islamic studies, community integration, conflict-resolution, interfaith dialogue and social justice.

This book is a one stop guide to all your research methods needs. It is tailored specifically towards business and management courses, and central to this edition is the balanced coverage of qualitative and quantitative methods to clearly and concisely lead students through the research process, whatever their project may be. Now in its much anticipated fifth edition, Business Research Methods has been revised and updated to reflect all the latest trends in research methodology. The integration of statistical issues, as well as coverage of web-based surveys, qualitative interviews, big data, and content analysis of social media, aims to support the current student experience. A Running Case Study charts the progression of two student research projects - one qualitative and one quantitative - and shows how the content of each chapter can be used to develop their projects. Thought provoking questions are included to help students consider the issues and decisions involved, and how these might be applied to their own project. Deeper Insight into Research Methods boxes delve further into particular research issues, offering a detailed description to increase understanding of these areas, whilst Real Life examples put research methods into context, by showing how they have been applied in real world situations. New pedagogy features include: Research in Practice boxes provide an insight into situations and research decisions that students may encounter in real life projects. They contain hints, tips and sometimes questions to help think through a project. Theory Explained highlights key theories and demonstrates how these can be applied in practical research examples. Statistics in Action provides practical alternatives to qualitative research methods and gives examples of how statistical data can be presented, analyzed and interpreted to improve students data insights skills. The Online Learning Centre contains a vast amount of extra resources to support lecturers and student, including power points, instructor manuals, and a question bank. New to this edition are short case studies with teaching notes covering current topics and key theories, and worked examples and videos with associated questions for further practical exercises and real world examples. While researchers have commonly used event studies in other research areas, the use in supply chain management research is limited—but growing. However, there remain several important research design considerations that must be accounted for over the process of planning, executing, and writing event studies. Because of this, many issues and sources of uncertainty emerge among students and early researchers. There is a need for a comprehensive guide to these common issues and how to address them, delving into the nuances and steps to take.

Applied Guide for Event Study Research in Supply Chain Management supports graduate students and researchers to understand how to develop, execute, and publish event studies, specifically in the area of supply chain management, with valuable support for wider management studies. This book anticipates many reviewer and editorial concerns and questions and explores how to design a study that addresses issues before they arise, or how to tackle the issue during the review process. Covering topics such as alternative study designs, event study methods, and interpreting research results, this premier reference source is an indispensable resource for students and faculty of higher education, business executives and managers, librarians, government officials, researchers, and academicians.

Management Academic Conferences and publishing limited Have you ever wondered what happens to you when you die? When you are dead, are you really "dead?" What did Jesus mean when He said that Lazarus was asleep? Will we be unconscious when we die? Is there an intermediate place, a purgatory that I will go to if I am not quite good enough? What does the Bible say? What did Jesus teach about hell when He spoke of the experiences of a real person who was sent there? What will our new bodies be like when Jesus comes for us? What will the New Jerusalem be like, and how can I make sure I am going to be a part of it? What is the Bride of Christ, and how can I be sure I will go to heaven? If you are interested in having answers to these questions and many more, this series is for you. This Bible study series is focused on exploring and explaining the Scriptures concerning what happens to believers and unbelievers after they leave this life.

It's impossible to pass through life without experiencing some kind of hurt or loss. We all need healing at different points in our lives—and often the path to healing is paved in some form of forgiveness and grace. In *Healing Waters*, the first study in the new Faith and Fiction Bible study series, popular Christian fiction author Melody Carlson draws upon her novels in the *Inn at Shining Waters* trilogy to invite women on an exciting journey toward healing. Using the stories, themes, and characters of the novels as a backdrop, this eight-week study explores the need for forgiveness and mercy in our lives and the role that second chances and new beginnings play in healing our spirits and our relationships. Through careful study of Psalm 103 and other selected Scriptures, women will · gain new understanding and appreciation for God as the Lord who heals · recognize that God makes the journey with them, inviting them to experience divine love and mercy every step of the way. · walk the roads of forgiveness and grace, learning how to embrace these gifts for themselves and their relationships. · learn how to restore broken relationships and live in life-giving community.celebrate the God who loves second chances and who is devoted to transforming and blessing us with surprises and new beginnings. The Leader Guide provides leader helps and step-by-step session plan outlines for leading eight group sessions.

This book contains a collection of studies that have been conducted among older residents in Singapore. Different methods, from surveys to crowd sourcing, have been used to investigate the older adults' lived experiences and social participation in the residential environment. The findings reveal that older residents interact with the built environment in ways that reflect their changing capabilities and lifestyles. Since the built environment - where we live and go - can have an important impact on our daily lives, especially among older people, understanding these experiences and perceived needs is important to help older individuals age within their community.

How to Study the Bible's Use of the Bible: Seven Hermeneutical Choices for the Old and New Testaments by Gary Edward Schnittjer and Matthew S. Harmon is an essential resource aimed at teaching a hermeneutic for understanding the Bible's use of the Bible. Intended for students of both testaments, the book's innovative approach demonstrates how the Old Testament use of Scripture provides resources for the New Testament authors' use of Scripture. The authors provide students with a clear approach to handling the Bible's use of itself through seven key hermeneutical choices organized into individual chapters. Each chapter introduces a hermeneutical choice and then provides several examples of the Old Testament use of Old Testament and the New Testament use of Old Testament. The plentiful examples model for students the need to ground hermeneutics in biblical evidence and provide insight into understanding why the Bible's use of the Bible is important.
