ROBERTS ABBEY

Bollettino bibliografico Princeton University Press

This book addresses pattern-making through a comprehensive presentation of both basic and elaborate dresses, jackets, vests, overalls, lingerie, and corsetry.

Antologia della critica goldoniana e gozziana CRC Press

Fashion is at once a familiar yet mysteriously elite world that we

all experience, whether we're buying a new pair of jeans, reading Vogue, or watching the latest episode of Project Runway. Lars Svendsen dives into that world in *Fashion*, exploring the myths, ideas, and history that make up haute couture, the must-have trends over the centuries, and the very concept of fashion itself. *Fashion* opens with an exploration of all the possible meanings encompassed by the word "fashion," as Svendsen probes its elusive place in art, politics, and history. Ultimately, however, he focuses on the most common use of the term: clothing. With his trademark dry wit, he deftly dismantles many of the axioms of the industry and its supporters. For example, he points out that

some of the latest fashions shown on runways aren't actually "fashionable" in any sense of the word, arguing that they're more akin to modern art works, and he argues against the increasingly prevalent idea that plastic surgery and body modification are part of a new wave of consumerism. Svendsen draws upon the writings of thinkers from Adam Smith to Roland Barthes to analyze fashion as both a historical phenomenon and a philosophy of aesthetics. He also traces the connections between the concepts of fashion and modernity and ultimately considers the importance of evolving fashions to such fields as art, politics, and philosophy. Whether critiquing a relentless media culture that promotes perfect bodies or parsing the never-ending debate over the merits of conformity versus individual style, Lars Svendsen offers an engaging and intriguing analysis of fashion and the motivations behind its constant pursuit of the new.

Proceedings of the 1st International Textile Design Conference (D_TEX 2017), November 2-4, 2017, Lisbon, Portugal

FrancoAngeli

D_TEX presents itself as a starting point at a crossroads of ideas and debates around the complex universe of Textile Design in all its forms, manifestations and dimensions. The textile universe, allied to mankind since its beginnings, is increasingly far from being an area of exhausted possibilities, each moment proposing important innovations that need a presentation, discussion and maturation space that is comprehensive and above all inter- and transdisciplinary. Presently, the disciplinary areas where the textile area is present are increasing and important, such as

fashion, home textiles, technical clothing and accessories, but also construction and health, among others, and can provide new possibilities and different disciplinary areas and allowing the production of new knowledge. D_TEX proposes to join the thinking of design, with technologies, tradition, techniques, and related areas, in a single space where ideas are combined with the technique and with the projectual and research capacity, thus providing for the creation of concepts, opinions, associations of ideas, links and connections that allow the conception of ideas, products and services. The interdisciplinary nature of design is a reality that fully reaches the textile material in its essence and its practical application, through the synergy and contamination by the different interventions that make up the multidisciplinary teams of research. The generic theme of D_TEX Textile Design Conference 2017, held at Lisbon School of Architecture of the University of Lisbon, Portugal on November 2-4, 2017, is Design the Future, starting from the crossroads of ideas and debates, a new starting point for the exploration of textile materials, their identities and innovations in all their dimensions.

A Contemporary Practical Treatise on Quattrocento Painting
Milano, Igap

A tour de force of scholarship and book production: an essential reference for anyone interested in costume history, Renaissance studies, theater, and ethnography.

Fashion Patternmaking Techniques [Vol. 3] Critical Guides to Spanish & L

This latest edition helps aspiring fashion designers understand demographics, psychographics, and the role of advertising; learn how to create a unique design vision through ethnographic

research; develop a collection from first concept to finished project on the runway; see how to build a career in fashion, and more.

Fashion at the Time of Fascism Trattato di confezione moderna. Moda maschile. Tradizione del su misura italiano Textiles, Identity and Innovation: Design the Future Proceedings of the 1st International Textile Design Conference (D_TEX 2017), November 2-4, 2017, Lisbon, Portugal

Articolata in due parti ben distinte, riservate rispettivamente a Carlo Goldoni e a Carlo Gozzi, questa antologia della critica intende però rispondere a una medesima esigenza di affiancare, con precisa focalizzazione storiografica, due personalità che una plurisecolare tradizione critica aveva impoverito in giustapposizioni e semplificazioni tanto efficaci quanto poco veritiere. Così la rassegna critica goldoniana allestita da Michele Bordin, dalle prime testimonianze contemporanee all'autore fino agli interventi più recenti, ci presenta un ritratto non convenzionale del commediografo che, pur partendo dalla centralità dell'idea e della prassi della riforma nella sua lunga e feconda avventura drammaturgica, evidenzia piuttosto le difficoltà, le incertezze e le disillusioni di un itinerario teatrale percorso da Venezia a Parigi. Innovativa è anche l'angolazione dalla quale Anna Scannapieco ha ricostruito l'accidentata, bizzarra, e istruttiva storia della ricezione critica di Carlo Gozzi, da cui emerge il carattere squisitamente antagonista della sua personalità e insieme lo spessore della sua multiforme produzione artistica e saggistica, a lungo condizionata dal pregiudizio che la voleva determinata e alimentata solo dallo scontro con Carlo Goldoni.

B.E.S. Publishing

Considered by many to be Abraham Robinson's magnum opus, this book offers an explanation of the development and applications of non-standard analysis by the mathematician who founded the subject. Non-standard analysis grew out of Robinson's attempt to resolve the contradictions posed by infinitesimals within calculus. He introduced this new subject in a seminar at Princeton in 1960, and it remains as controversial today as it was then. This paperback reprint of the 1974 revised edition is indispensable reading for anyone interested in non-standard analysis. It treats in rich detail many areas of application, including topology, functions of a real variable, functions of a complex variable, and normed linear spaces, together with problems of boundary layer flow of viscous fluids and rederivations of Saint-Venant's hypothesis concerning the distribution of stresses in an elastic body.
