In the new digital age everything is
destined to revolve around information
technology, be it man or machine.
People gather information directly by
observing and experiencing events but
as organizations become larger and
more complex, it becomes impossible for
management, particularly in the middle
and higher levels, to observe or
experience all operations. It is an
information system using formalized
procedures to provide managers at all
level in all functions with appropriate
information from all relevant sources to
enable them make timely and effective
decisions for planning, directing and

controlling the activities for which they are responsible. This book offers a comprehensive analysis of management information system. It will serve as a complete reference tool to students, policy-makers and business managers.

It is widely recognized that the knowledge of information systems is very much essential in today's business organizations to survive and prosper. This book, in its second edition, provides students with a conceptual framework to understand information systems. The focus of information systems (irrespective of the level of use of information) is on producing quality information needed to facilitate decision making. The objective of this book is to capture the material on information systems and organize it around a framework that offers a current and relevant knowledge based on

information system by providing just the adequate amount of material in a concise format. The book is organized in three parts: Information systems basics, Managing with information and Managing information resources. Though the main structure of the second edition remains the same, the chapters have been updated and revised as per the recent development in the fields of information technology. Besides this, a new chapter is added to explain the concepts like e-business, Customer relationship management (CRM), Enterprise resources and planning (ERP) and Supply chain management (SCM), comprehensively. Intended for the students of computer applications (BCA and MCA) and management (BBA and MBA), and the undergraduate students

of Computer Science engineering, the book is equally useful for the busy professionals who wish to grasp the essentials of management information systems, without attending a formal instructional course.
