E-business In The 21st Century: Essential Topics And Studies (Second Edition) IGI Global

In an age when innovative scholarly work is at an all-time high, the academy itself is being rocked by structural change. Funding is plummeting. Tenure increasingly seems a prospect for only the elite few. Ph.D.'s are going begging for even adjunct work. Into this tumult steps Cary Nelson, with a no-holds-barred account of recent developments in higher education. Eloquent and witty, Manifesto of a Tenured Radical urges academics to apply the theoretical advances of the last twenty years to an analysis of their own practices and standards of behavior. In the process, Nelson offers a devastating critique of current inequities and a detailed proposal for change in the form of A Twelve-Step Program for Academia.

Essential Topics Of Managing Information Systems World Scientific

As we move through the Fourth Industrial Revolution, people are becoming more concerned about the potential benefits and risks of digital technology and its impact. People are worried about the extent, the implementation, and the effect digital transformation will have on their privacy, jobs, and welfare. Business managers will be expected to navigate organizations and employees through this unknown territory of digital transformation and disruption. Imagination, Creativity, and Responsible Management in the Fourth Industrial Revolution is an essential reference source that uses a multidisciplinary approach to examine the concepts of imagination and creativity, as well as responsible management practices, and their application to the development and use of innovative technologies. This book intends to help readers understand the importance of continuously developing their cognitive skills and to remain responsible and accountable in the new digital era—the Fourth Industrial Revolution. Featuring research on topics that include modes of interaction in the digitalized era, cognitive skills needed and creative tools to shape the future of work, and knowledge sharing, this book is ideally designed for managers, leaders, decision makers, directors, executives, engineers, entrepreneurs, IT specialists, academics, researchers, students, consultants, and industry professionals.

Exemplifies the struggles of scholars to work toward a more shared agenda for social change. In an effort to rethink the left, this interdisciplinary collection weaves together some of today's most powerful voices in contemporary left critical thought as they examine the fragmentation of American

movements for social change, evaluate what critical scholarship might contribute to the task of renewing (or creating) a more unified and efficacious left, and explore the left's possibly inadequate dealings with many marginalized groups. Representing a diverse range of theoretical perspectives within several "textual" disciplines, the essays assess historical, practical, or speculative models for a "whole left"—a left constituted by a broad range of complexly interwoven interests, including issues of class, environment, gender, sexuality, disability, race, and ethnicity. The book exemplifies the struggles of scholars to work toward a more shared agenda for social change. At Northern Arizona University, Laura Gray-Rosendale and Steven Rosendale are Associate Professors of English. Gray-Rosendale is the coeditor (with Gil Harootunian) of *Fractured Feminisms: Rhetoric, Context, and Contestation* and the coeditor (with Sibylle Gruber) of *Alternative Rhetorics: Challenges to the Rhetorical Tradition*, both also published by SUNY Press. Rosendale is the editor of *The Greening of Literary Scholarship: Literature, Theory, and the Environment*.

Artificial Intelligence (AI) is reality. The Fourth Industrial Revolution, or a Robot Apocalypse depending on whom you ask, is already underway. The transition has already started. But what it

means in terms of leadership? How to prepare for the dramatic shifts in the global workforce? In *The Future of Leadership in the Age of AI* Marin Ivezic and Luka Ivezic, emerging technology risk researchers and practitioners, demystify the processes behind this revolution. Rather than offering another sensationalistic, panic-inducing view on AI – or its overly-optimistic alternative – authors explain the reality of AI implementation in business environments. The age of AI brings new paradigms in economy, business, and workforce. In addition to the workers with obviously obsolete skills, the change will also affect executives and managers. But you can still thrive if you develop your distinctly human skills. While AI and machines are undoubtedly superior in the tasks that involve data, rules, and processes, they lack the ability to go beyond a specific set of purposes. Humans are still unbeatable when it comes to creativity, vision, and collaboration. Rather than managing operations and processes, the leaders of tomorrow will need to focus on their interpersonal skills. The transformed economy will need some new sorts of executives – motivators, innovators and social experimenters – those that have, paradoxically, developed their distinctly human skills. Machines will run the processes. You'll need to take care of agility and motivations of the employees. *The Future of Leadership in the Age of AI* clarifies those new roles and makes the transition easier. Prepare for new challenges. Get ready and find your place in the age of AI.

This book is a translation and celebration of Slovenian politician France Bučar's seminal work. Divided into two parts, the book first contains several studies of Bučar's arguments. As Bučar applied his system theory to a variety of issues, so too the conglomerate of scholars and issues critically assessed is interdisciplinary, ranging from political science and economics, to law and philosophy, as well as to natural sciences. The contributors and the questions of their essays in the edited volume are as follows. Peter Verovsek (University of Sheffield) examines different branches of Critical Theory and classifies Bučar within them. Mark Hamilton (Inter-American Defense College) discusses system dynamics of Bučar's system theory. Urška Velikonja (Georgetown University) applies Bučar's system theory to the question of the ethics, rules, and regulations in financial economics. Finally, Matej Drev (Georgia Institute of Technology) connects Bučar to the issue of artificial intelligence and inequality. The second part is the English translation of Bučar's book *At A New Crossroads*, which addresses the role of ethics in society. Bučar normatively redefines national identity as the crux of his novel understanding of ethics. Using system theory, he addresses the problems of globalization and governance, presenting a post-modern synthesis of the logic of free flow of capital and global citizenship, with national and cultural identity. Speaking to contemporary society, he shows how society and ethical life are reproduced. Bučar provides the reader with new tools to think about national identity and global politics. Bringing an important work on ethics, government, and identity to an entirely new readership, this book will appeal to a broad academic audience, namely students and practitioners in the fields of economics, social sciences, and humanities.

Glasgow, April 1820. The last armed uprising on British soil, intent on severing the Union and establishing a radical Scottish republic, ended in executions, imprisonments, transportations and 85 trails for high treason. Yet despite its political and social importance, the story of this working-class revolution vanished from the historical record. This book restores the radical rising to its rightful place in history, offering an incisive analysis of the rising itself and the events which led up to it, vividly recapturing the extraordinary heroism of its leaders, John Baird and Andrew Hardie, and the savagery with which the movement was crushed by the forces of the British state.

Cartography has a troubled history as a technology of power. The production and distribution of maps, often understood to be ideological representations that support the interests of their developers, have served as tools of colonization, imperialism, and global development, advancing Western notions of space and place at the expense of indigenous peoples and other marginalized communities. But over the past two decades, these marginalized populations have increasingly turned to participatory mapping practices to develop new, innovative maps that reassert local concepts of place and space, thus harnessing the power of cartography in their struggles for justice. In twelve essays written by community leaders, activists, and scholars, *Radical Cartographies* critically explores the ways in which participatory mapping is being used by indigenous, Afro-descendant, and other traditional groups in Latin America to preserve their territories and cultural

identities. Through this pioneering volume, the authors fundamentally rethink the role of maps, with significant lessons for marginalized communities across the globe, and launch a unique dialogue about the radical edge of a new social cartography.

The Allies take the fight to the enemy in this vivid historical account by the British prime minister and recipient of the Nobel Prize in Literature. In this fifth volume of his magnificent history of World War II, Winston Churchill recounts the story of the Allied forces going on the offensive. Mussolini falls, Hitler is besieged on three sides, and the Japanese find it near impossible to maintain a grip on the territories they had recently overtaken. Stalin, Churchill, and Roosevelt work toward keeping their uneasy partnership moving in concert, and much of this volume is dedicated to describing the intricate negotiations that went on to sustain this partnership toward one single goal. This six-volume account of the struggle between the Allied Powers in Europe against Germany and the Axis during World War II, told from the unique viewpoint of a British prime minister, it is also the story of one nation's heroic role in the fight against tyranny, enriched with fascinating primary sources. We are presented with not only Churchill's retrospective analysis of the war, but also memos, letters, orders, speeches, and telegrams, day-by-day accounts of reactions as the drama intensifies.

Throughout these volumes, we listen as strategies and counterstrategies unfold in response to Hitler's conquest of Europe, planned invasion of England, and assault on Russia, in a mesmerizing account of the crucial decisions made as the fate of the world hangs in the balance.

A bold, revisionist history and political biography of the polarizing Founding Father, Alexander Hamilton, that reframes the founding of the United States and the history of capitalism. In retelling the story of the radical Alexander Hamilton, Parenti rewrites the history early America and global economic history writ large. For much of the twentieth century, Hamilton—sometimes seen as the bad boy of the founding fathers or portrayed as the patron saint of bankers—was out of fashion. In contrast his rival Thomas Jefferson, the patrician democrat and slave owner who feared government overreach, was claimed by all. But more recently, Hamilton has become a subject of serious interest again. He was a contradictory mix: a tough soldier, austere workaholic, exacting bureaucrat, yet also a sexual libertine, and a glory-obsessed romantic with suicidal tendencies. As Parenti argues, we have yet to fully appreciate Hamilton as the primary architect of American capitalism and the developmental state. In exploring his life and work, Parenti rediscovers this gadfly as a path breaking political thinker and institution builder. In this vivid historical portrait, Hamilton emerges as a singularly important historical figure: a thinker and politico who laid the foundation for America's ascent to global supremacy—for better or worse. “Wide-ranging, carefully researched, and forcefully written.” —Alan Taylor, author of *Thomas Jefferson's Education*

A WALL STREET JOURNAL BEST-SELLING BOOK NAMED BY THE WASHINGTON POST AS ONE OF THE 11 LEADERSHIP BOOKS TO READ IN 2018 **Radical Inclusion: What the Post-9/11 World Should Have Taught Us About Leadership** examines today's leadership landscape and describes the change it demands of leaders. Dempsey and Brafman persuasively explain that today's leaders are in competition for the trust and confidence of those they lead more than ever before. They assert that the nature of power is changing and should not be measured by degree of control alone. They offer principles for adaptation and bring them to life with examples from business, academia, government, and the military. In building their argument, Dempsey and Brafman introduce several concepts that illuminate both the vulnerability and the opportunity in leading today: **Radical Inclusion**. Fear of losing control in our fast-paced, complex, highly scrutinized environment is pushing us toward exclusion—exactly the wrong direction. Leaders should instead develop an instinct for inclusion. The word “radical” emphasizes the urgency of doing so. The Era of the Digital Echo. The speed and accessibility of information create “digital echoes” that make facts vulnerable, eroding the trust between leader and follower. **Relinquishing Control to Preserve Power**. Power and control once went hand in hand, but no longer. In today's environment, control is seductive but unlikely to produce optimum, affordable, sustainable solutions. Leaders must relinquish and share control to build and preserve power. The principles discussed in **Radical Inclusion** are memorable

and the book is full of engaging stories. From a young vegan's confrontation with opponents in Berkeley to a young lieutenant's surprising visitor during the Cold War, from a reflection on the

significance of Burning Man to a discussion of challenges faced in the Situation Room, Radical Inclusion will provide you with leadership tools to address real leadership challenges.
