This book examines
women's activism in
the early years of
independent Indonesia
when new attitudes to
gender, nationalism,
citizenship and
democratization were
forming. It questions
the meaning of
democratization for
women and their
relationship to national
sovereignty within the
new Indonesian state,

and discusses women's organizations and their activities; women's social and economic roles; and the different cultural, regional and ethnic attitudes towards women, while showing the failure of political change to fully address women's gender interests and needs. The author argues that both the role of nationalism in defining gender identity and the role of gender in defining national identity need equal recognition.

Full coverage of technical terms is included, as is the structure of exam questions and their interpretation. By running through examples of real exam

questions in a step-by-step fashion, this book explains how to decode the questions and examine the answer choices in order to get to the correct answers. This book is ideal for all electricians, regardless of their experience, who need a testing qualification in order to take the next step in their career.

 During the 1990s, as the Internet in general and e-mail in particular grew in popularity as a means of communication, a number of Cameroonians residing in various parts of the world established a

vibrant and lively electronic forum for the discussion of various issues related to their native land. The forum, known as Camnet, demonstrated that Cameroonians living abroad could actively participate in the political, economic and social processes taking place at home. This ability to remain actively engaged in the development of ones nation through the Internet is what Endeley calls virtual activism. Camnet thus distinguished itself as the first and most influential breeding ground for Cameroonian virtual activism. Although Camnet appeared to be dominated by political discussions, it was a truly multi-dimensional forum. No topic was explicitly

forbidden and on some occasions the participants conducted extensive debates on issues that had nothing to do with Cameroon or with politics. In this publication, however, the author has chosen to present only a representative sample of his own contributions from the late 1990s with a direct bearing on Cameroons development. Some of the contributions are in French and in order to reflect the bilingual nature of the debates that took place on Camnet, these have not been translated into English. The informed reader will be struck by the issues which were being debated over 15 years ago as well as by the fact that some of the predictions the author made in the 1990s are

a reality today.
