Simple Science: Kid Made Chromatography Paper chromatography is a technique that involves placing a small dot or line of sample solution onto a strip of chromatography paper. The paper is then placed in a jar containing a shallow layer of solvent and sealed. As the solvent rises through the paper, it meets the sample mixture which starts to travel up the paper with the solvent. Amy Brown Science: Paper Chromatography In paper chromatography, the solid in question is a filter paper, and the stationary phase is water in the pores of the filter paper. The following are the steps to perform paper chromatography. Step 1: Take a
