Books

Smoke billows up. Cool water flows. Whose boat is that? Do you know? This nonfiction ode to boats features six kinds of workers and their boats—a patrol boat, a tugboat, a car ferry, a lobster boat, a lifeboat, and a fireboat—with important parts properly labeled. The answer to each inquiring refrain lies under a gatefold, engaging the

reader in an informative guessing game. With lyrical (and factual!) text by New York Times–bestselling author Toni Buzzeo, and the stylized art of Tom Froese, this sturdy board book is perfect for curious and playful young readers.

Crucial Conversations: Tools for Talking When Stakes are High, Third Edition
Penguin UK

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition

includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued. Crucial Conversations Tools for Talking When Stakes Are High, Second Edition

Penguin

Gives readers the tools to plan less and play more in their everyday lives using the principles of improvisational comedy. Written for non-performers, it features true stories of people whose lives have been improved by practicing improv. Includes simple games to help build confidence and adaptability. Ideal for public and high school libraries.

Tools of Titans Crown

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-

regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

Race After Technology John Wiley & Sons
#1 NATIONAL BESTSELLER #1
INTERNATIONAL BESTSELLER What does

everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. *12 Rules for Life* shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its

readers.

Kirkpatrick's Four Levels of Training Evaluation Houghton Mifflin

Collecting several key documents and policy statements, this supplement to the ninth edition of the Intellectual Freedom Manual traces a history of ALA's commitment to fighting censorship. An introductory essay by Judith Krug and Candace Morgan, updated by OIF Director Barbara Jones, sketches out an overview of ALA policy on intellectual freedom. An important resource, this volume includes documents which discuss such foundational issues as The Library Bill of Rights Protecting the freedom to read ALA's Code of Ethics How to respond to challenges and concerns about library resources Minors and internet activity Meeting rooms, bulletin boards, and exhibits Copyright Privacy, including the retention of library usage records

12 Rules for Life Alhabet Publishing

This book takes a look at the various kinds of tools that workers use, including lifeguards, doctors, and a field biologist. Me and White Supremacy Harry N. Abrams The New York Times and Washington Post bestseller that changed the way millions

communicate "[Crucial Conversations] draws our attention to those defining moments that literally shape our lives, our relationships, and our world. . . . This book deserves to take its place as one of the key thought leadership contributions of our time." —from the Foreword by Stephen R. Covey, author of The 7 Habits of Highly Effective People "The quality of your life comes out of the quality of your dialogues and conversations. Here's how to instantly uplift your crucial conversations." —Mark Victor Hansen, cocreator of the #1 New York Times bestselling series Chicken Soup for the Soul® The first edition of Crucial Conversations exploded onto the scene and revolutionized the way millions of people communicate when stakes are high. This new edition gives you the tools to: Prepare for high-stakes situations Transform anger and hurt feelings into powerful dialogue Make it safe to talk about almost anything Be persuasive, not abrasive

Weapons of Math Destruction McGraw Hill Professional

Soon to be a major motion picture, starring Carey Mulligan and Zoe Kazan "An

instant classic of investigative journalism... 'All the President's Men' for the Me Too era." — Carlos Lozada, The Washington Post From Pulitzer Prize-winning journalists Jodi Kantor and Megan Twohey, the untold story of their investigation of Harvey Weinstein and its consequences for the #MeToo movement For years, reporters had tried to get to the truth about Harvey Weinstein's treatment of women. Rumors of wrongdoing had long circulated, and in 2017, when Jodi Kantor and Megan Twohey began their investigation for the New York Times, his name was still synonymous with power. But during months of confidential interviews with actresses, former Weinstein employees, and other sources, many disturbing and long-buried allegations were unearthed, and a web of onerous secret payouts and nondisclosure agreements was revealed. When Kantor and Twohey were finally able to convince sources to go on the record, a dramatic final showdown between Weinstein and the New York Times was set in motion. In the tradition of great investigative journalism, She Said tells a thrilling story about the power of truth and reveals the

inspiring and affecting journeys of the women who spoke up—for the sake of other women, for future generations, and for themselves.

Surrounded by Idiots St. Martin's Press

An ode to building a house from the ground up profiles six kinds of craftsmen and the 24 tools they use, with the answer to each question about "whose tools" being revealed under seven gatefolds designed to promote curiosity and learning. By the Caldecott Honor-winning author of *One Cool Friend*. 30,000 first printing.

That All May Read Capstone

Do you ever think you're the only one making any sense? Or tried to reason with your partner with disastrous results? Do long, rambling answers drive you crazy? Or does your colleague's abrasive manner rub you the wrong way? You are not alone. After a disastrous meeting with a highly successful entrepreneur, who was genuinely convinced he was 'surrounded by idiots', communication expert and bestselling author, Thomas Erikson dedicated himself to understanding how people function and why we often struggle to connect with certain types of people.

Surrounded by Idiots is an international phenomenon, selling over 1.5 million copies worldwide. It offers a simple, yet ground-breaking method for assessing the personalities of people we communicate with - in and out of the office - based on four personality types (Red, Blue, Green and Yellow), and provides insights into how we can adjust the way we speak and share information. Erikson will help you understand yourself better, hone communication and social skills, handle conflict with confidence, improve dynamics with your boss and team, and get the best out of the people you deal with and manage. He also shares simple tricks on body language, improving written communication, advice on when to back away or when to push on, and when to speak up or shut up. Packed with 'aha!' and 'oh no!' moments, *Surrounded by Idiots* will help you understand and communicate with those around you, even people you currently think are beyond all comprehension. And with a bit of luck you can also be confident that the idiot out there isn't you!

The Associated Press Stylebook 2015 John Wiley & Sons

SWOT, PESTLE & PRIMO-F analysis are amongst the most commonly misused tools in business. This book sets out the myths and practical applications of these and other diagnostic approaches in a robust but practical way.

Taming Idiopathic Toe Walking John Wiley & Sons

A fully revised and updated edition of the bible of the newspaper industry
Get to What Matters Sourcebooks, Inc.
WINNER: The 2018 McGannon Center Book Prize and shortlisted for the Goddard Riverside Stephan Russo Book Prize for Social Justice The New York Times Book Review: "Riveting." Naomi Klein: "This book is downright scary." Ethan Zuckerman, MIT: "Should be required reading." Dorothy Roberts, author of *Killing the Black Body*: "A must-read." Astra Taylor, author of *The People's Platform*: "The single most important book about technology you will read this year." Cory Doctorow: "Indispensable." A powerful investigative look at data-based discrimination—and how technology affects civil and human rights and economic equity The State of Indiana denies one million applications for

healthcare, foodstamps and cash benefits in three years—because a new computer system interprets any mistake as “failure to cooperate.” In Los Angeles, an algorithm calculates the comparative vulnerability of tens of thousands of homeless people in order to prioritize them for an inadequate pool of housing resources. In Pittsburgh, a child welfare agency uses a statistical model to try to predict which children might be future victims of abuse or neglect. Since the dawn of the digital age, decision-making in finance, employment, politics, health and human services has undergone revolutionary change. Today, automated systems—rather than humans—control which neighborhoods get policed, which families attain needed resources, and who is investigated for fraud. While we all live under this new regime of data, the most invasive and punitive systems are aimed at the poor. In *Automating Inequality*, Virginia Eubanks systematically investigates the impacts of data mining, policy algorithms, and predictive risk models on poor and working-class people in America. The book is full of heart-wrenching and eye-opening stories, from a

woman in Indiana whose benefits are literally cut off as she lays dying to a family in Pennsylvania in daily fear of losing their daughter because they fit a certain statistical profile. The U.S. has always used its most cutting-edge science and technology to contain, investigate, discipline and punish the destitute. Like the county poorhouse and scientific charity before them, digital tracking and automated decision-making hide poverty from the middle-class public and give the nation the ethical distance it needs to make inhumane choices: which families get food and which starve, who has housing and who remains homeless, and which families are broken up by the state. In the process, they weaken democracy and betray our most cherished national values. This deeply researched and passionate book could not be more timely. [The Effective Manager](#) Abrams
NEW YORK TIMES BESTSELLER • A former Wall Street quant sounds the alarm on Big Data and the mathematical models that threaten to rip apart our social fabric—with a new afterword “A manual for the twenty-first-century citizen . . . relevant and urgent.”—Financial Times NATIONAL BOOK

AWARD LONGLIST • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • The Boston Globe • Wired • Fortune • Kirkus Reviews • The Guardian • Nature • On Point We live in the age of the algorithm.

Increasingly, the decisions that affect our lives—where we go to school, whether we can get a job or a loan, how much we pay for health insurance—are being made not by humans, but by machines. In theory, this should lead to greater fairness:

Everyone is judged according to the same rules. But as mathematician and data scientist Cathy O’Neil reveals, the mathematical models being used today are unregulated and uncontestable, even when they’re wrong. Most troubling, they reinforce discrimination—propping up the lucky, punishing the downtrodden, and undermining our democracy in the process. Welcome to the dark side of Big Data.

Whose Tools? Harry N. Abrams

[The Swiss Family Robinson \(Diversion Illustrated Classics\)](#) Random House

A beloved adventure classic, *The Swiss Family Robinson* is a tale of courage in the

face of the unknown that has endured the test of time. Trapped on a remote island after a storm leaves them shipwrecked, a Swiss pastor, his wife, and their four sons must pull together if they want to survive. Hunting, farming, and exploring a strange land for the first time, each son not only tests his own bravery, but discovers a skill all his own as they each adapt to this new, wild place. Full of wonder, revelation, and invention, this timeless adventure story has sparked imaginations of readers young and old for generations. Featuring an appendix of discussion questions, this Diversion Classics edition is ideal for use in book groups and classrooms. Imagined Communities Diversion Books
A Non-Invasive, Efficient and Effective Sensory Treatment Strategy for Children and Adolescents that Display Atypical Toe Walking. "Taming Idiopathic Toe Walking: A Treatment Guide for Parents and Therapists" serves as a definitive manual for children and adolescents that display atypical toe walking behaviors. Inspired by the overcoming of toe walking by

numerous children during her years of practice, McCaigue's professional expertise and experiences are fused into a vitally powerful resource. TAMING IDIOPATHIC TOE WALKING... is an easy-to-read guide for parents and pediatric, rehabilitation therapists with information on the categories and treatment of atypical toe walking behaviors. This manual explains when toe walking is considered developmentally unusual for a child's age, and idiopathic or done for no known reason. Idiopathic toe walking is often associated with Autism Spectrum Disorders, ADHD, Specific Learning Disabilities, Developmental Delays and other disabilities with sensory processing difficulties, but can occur with typical children, as well. This book serves as a thorough resource for use of an alternative treatment strategy to "calm" the toes, and enable a typical walking pattern in those challenged with this problem behavior. The ultimate goal is the prevention of tendon shortening and resultant limited motions of the ankles and feet from prolonged toe walking that can ultimately lead to the need for injections, bracing or at worst, surgery, to repair the muscular

imbalance. TAMING IDIOPATHIC TOE WALKING... provides step-by-step instruction of how to make "Toe Tamers", a unique remediation tool that provides the sensory input that a child or adolescent with idiopathic toe walking needs to overcome this potentially serious problem behavior. A protocol and usage guide is available for: 1) How heavy to make the Toe Tamers, 2) How to apply them, 3) How often they should be worn, and 4) How long to use them to calm the toes. This would enable relaxation of the feet to stand with full weight bearing on the floor with or without socks and shoes. In addition... a HOME Program sheet is included in English and Spanish to instruct parents on the rationale for applying the Toe Tamers, as well as when and how to effectively use them. Additionally, forms are available for logging the impact of the Toe Tamers. A record and graphs are included to track progress on the length of time, as well as the reduction of heel height, as the Toe Tamers effectively help the toes to lower the entire foot onto a flat surface. As the author explains, her book introduces a sensory treatment strategy for idiopathic toe walking that all should

consider exploring."Children with idiopathic toe walking whose feet are always bouncing on their toes, seem to calm their bodies down after their feet are relaxed. If you think about it, when your feet hurt or figuratively scream at you internally, you cannot relax your body. So, it would make sense that by calming the toes and relaxing the feet, that these children's bodies would relax overall, as well! It is by providing the sensory input needed by these children's feet, that their toes can lower and enable a typical pattern of walking. Using a holistic, sensory strategy in lieu of more traditional interventions will give their feet the input needed to help them overcome this problem behavior," says McCaigue. The book is unique in the marketplace due to the author's own successful use of its methods over a lifetime of experience. "I personally implemented the strategies

outlined in this book over the past 27 of my 40 years as an Occupational Therapist working with children. I hope this easy-to-make, therapeutic, sensory strategy will help many children with idiopathic toe walking, and prevent the need for surgery or other more invasive treatment techniques. My goal is to help children with the least restrictive, most effective and efficient way to remediate atypical toe walking," McCaigue explains.

Human Rights McGraw Hill Professional From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and

deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the "New Jim Code," she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social divisions; or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide [here](#).
