This book is primarily written for students of nursing and is relevant to all branches of Project 2000. The book covers some of the key issues in public health and epidemiology which are relevant to nursing. The chapters are written in a study guide format, and each poses a series of questions and exercises which the reader is encouraged to think about and work

through. The aim is to introduce the reader to some of the key concepts in public health and epidemiology in a way which stimulates them to think through many of the issues for themselves. It is hoped that An Introductory Study Guide to Public Health and Epidemiology will prove a useful resource to nursing students, tutors, and to qualified nurses entering the areas of community and public health.

Leifer's Study Guide for Introduction to Maternity and Pediatric Nursing is a rich resource that enhances your comprehension and application of material from every chapter of the textbook. With a variety of learning activities, critical thinking exercises, case studies, and review questions, this

study guide reinforces your mastery of the essential maternity and pediatric nursing concepts and skills you need to pass the NCLEX-PN® Examination and succeed in your nursing career. NCLEX exam-style multiple-choice review questions at the end of each chapter test basic chapter knowledge as well as ask for appropriate nursing actions, what the nurse should expect in terms of medical care of the patient, and what complications the patient is at risk of developing. Case Studies and Applying Knowledge activities provide additional opportunities to apply learned information to clinical care. Thinking Critically activities require you to apply what you've learned in the textbook to new situations and draw conclusions based on that knowledge. Learning

activities include matching, labeling, and completion exercises to help you learn basic concepts of maternity and pediatric nursing. Crossword puzzles in selected chapters are a nice way to change up the format when testing comprehension of terms and concepts. Answer key is located on the student's Evolve website.
