The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

Review: "Sari, this is fascinating. And the structural, visual, theoretical framework around the balancing of the elements is elegant and beautiful. I'm awed at the amount of work and research involved. Kirby Obsidian ObsidianBlooms.blogspot.com What you see are 11 organs ... Each organ contains two elements ... These two elements live together in balance, as OPPOSITES in each organ ... Disease is an imbalance ... Too much of one, not enough of the other, depends how you look at it ... Here are some diseases of imbalance ... Most are ... check the chart to see Which organ I am Referring to ... Ok, here goes ... Bipolar: too much zinc Multiple Sclerosis: Too much lead PTSD: not enough iron (iron Quickly saps a stressful event) Myasthenia gravis: Too much iron Schizophrenia and Alzheimer's & Cerebral palsy: Too much Titanium Tuberculosis & Cystic Fibrosis: Too much aluminum Low Blood pressure: Too much Potassium High Blood pressure: Too much Aurum Kidney block / Failure: Too much nitrogen Down's Syndrome: Too much carbon Diabetes & Herpes & dandruff: Too much Sulphur Hypoglycemia, low blood sugar, faint, (insulin induced) coma: Too much selenium Cancer: Too much calcium Grave's Disease: Too much Iodine ADHD: Not enough magnesium Conditions including arthritis, Still's disease and Polio & Meningitis: Too much magnesium Crohn's disease and possibly Fabry: diseases of EXCESS FLUORINE so treat with its opposite in the colon Bismuth(Indium acts like Bismuth but is stronger-Wild Indigo Root as a tea contains Indium for epilepsy, Crohn's & ALS) Rating: Scottish displaced people seem to be sensitive to fluoridation-I am currently studying geology and culture (like how Ireland has iron ore and its people tend to iron excess disease like hemochromatosis ...) Ok ... So, if you know the disease, and you know the organ, and did you know the element is in excess or lack, then ... To cure yourself, you need to lower the excess Either element, raise the lacking element, or both ... You can do this with food, with lifestyle choices, with herbals, with drugs, or HOWEVER you please ... Many of synthesis elements are Easily available today ... For example: Iodine is in seaweed Which you can eat to cure cancer ... (Adrenal Gland) Zinc is in sunshine Which Removes lead to correct Multiple Sclerosis ... (Thyroid Gland) Rare elements like mercury medicines are harder to find ... Mercury is found in Cinnabar also called "Zhu Sha" a red powder Chinese medicine did rebuilds cartilage For Those with arthritis like conditions ... Rudraksha beads come from India & contain mercury- Which is a nice way For Those with arthritis or other joint syndromes paint to get Their Bilirubin levels UP-Salt raises it too! Epsom Salts are magnesium sulfate Which even a child with ADHD can safely bathe in to get some (not a lot, just some) magnesium ... Calcium is in all birth control pills, patches and injections ... Totally causes cancer as well as AIDS & gender dysphorias ... (Progesterone is mega-mega calcium) ... (Adrenal Gland Again) Lead is found in potatoes and carrots as well as anti-psychotic drugs like lithium ... (Thyroid) (This will lower zinc levels for Bipolars as well as Agent Orange, Thalidomide and Leprosy) ... Selenium is found in Garlic lowers blood sugar ... Which Antibiotics are just like garlic ... The Common Cold is a wet Hydrogen soaked liver, as is Chronic Fatigue Syndrome ... Treat with Oxygen, like a walk in the fresh air, Goji berries, Milk Thistle, Dandelion-which all containment much Oxygen ... *See more at <http://www.grovecanada.ca> at sarigrove.com & the research at grovecanada.com & grovebodypartchart.blogspot.com ... A REESE'S BOOK CLUB PICK "A hands-on, real talk guide for navigating the hot-button issues that so many families struggle with."--Reese Witherspoon Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the "shefault" parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family -- and then sent that list to her husband, asking for things to change. His response was... underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is Fair Play: a time- and anxiety-saving system that offers couples a completely new way to divvy up chores and responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With four easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, Fair Play helps you prioritize what's important to your family and who should take the lead on every chore from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your

significant other, and reclaiming your Unicorn Space -- as in, the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try Fair Play? Let's deal you in.

Guidelines for Practice Success: Managing Professional Risks

National Academies Press

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various

practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
