 Public relations and the media are in a time of major change. The rise of social media, altered media platforms, evolving legislative environments and new models of communication have altered not only the working environments of public relations and the news and entertainment media, but also many aspects of how these industries work together. Media Relations provides a practical and thorough introduction to media work in this changing environment. Based on a solid understanding of media culture and theory, Jane Johnston shows how to steer a path between the technical and human elements of media relations. She drills down into the different types of media, analysing their applications, strengths and weaknesses, and shows how to target your message to the right media outlets, whether national television, community radio, celebrity magazines or influential blogs. This second edition has been revised throughout and includes new case studies, and new chapters on digital and social media, media campaigns, and legal and ethical considerations. 'Media Relations: Issues and Strategies is written in an engaging, easy to understand style. It provides excellent examples and cases of media relations.' - Global Media Journal

 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

It's South Africa 1990. Two major events are about to happen: the release of Nelson Mandela and, more importantly, it's Spud Milton's first year at an elite boys only private school. Cursed with parents from well beyond the lunatic fringe, a senile granny, and a dormitory full of strange characters, Spud has his hands full trying to adapt to his new home. Surrounded by names such as Gecko, Rambo, Rain Man and Mad Dog, Spud takes his first tentative steps along the path to manhood. (The path, it seems, could be a rather long road.) Armed with only his wits and his diary, Spud takes us from illegal night swimming to the red-hot furnace of the cricket pitch, from ghostbusting to a catastrophic family vacation. He also invites us into the mind of a boy struggling to come to terms with a strange new world; a boy whose eyes are being opened to love, friendship and complete insanity.

This is the memoir of a journey from the hills of the Ozark Mountains to the Marble Halls of National Geographic's Washington, D.C. headquarters and the world beyond it. It takes place during the Golden Age of photojournalism just prior to the digital photography revolution. Growing up dreaming of becoming a "Life" magazine photographer, the author felt his way along an uncertain career path that would eventually take him to some of the most remote corners of the planet. From the moment he discovered photography through his years of working for the student and alumni publications of his high school, various colleges, and finally the University of Missouri Graduate School of Journalism, the author stubbornly followed his dream. His early professional experience involved photographing babies, weddings, horse shows and amateur baseball teams. While working on his BFA at Ohio University he was a stringer for both United Press International and the Associated Press. His early feature stories dealt with subjects ranging from the Ku Klux Klan, The American Nazi Party, and famous authors to the Serpent Handlers of West Virginia. His big break came with a summer internship as a photographer for "National Geographic." Later he became a contract photographer for that publication and his assignments included chasing bleeding ice bergs with the International Ice Patrol, working as a still photographer on a "National Geographic" television special about the Amazon River, and doing a coverage of Libya and the Great Libyan Desert in North Africa. He traveled to 23 different countries in just three years. Come, travel along with the author on a dream-come-true adventure where real-life mini-adventures were the stuff of everyday life. See how a dream was turned into reality through hard work, perseverance and good luck.
