SANTIAGO OCONNELL

Hachette UK

This new edition, which is being reissued in a more artistic format and with many additional illustrations, updates the original text and adds a chapter showing what progress has been made in the ecological management of landscapes over the past decade."--BOOK JACKET.

Suburban Space Simon and Schuster

A NEW YORK TIMES BESTSELLER! In his first major book on the subject of income inequality, Noam Chomsky skewers the fundamental tenets of neoliberalism and casts a clear, cold, patient eye on the economic facts of life. What are the ten principles of concentration of wealth and power at work in America today? They're simple enough: reduce democracy, shape ideology, redesign the economy, shift the burden onto the poor and middle classes, attack the solidarity of the people, let special interests run the regulators, engineer election results, use fear and the power of the state to keep the rabble in line, manufacture consent, marginalize the population. In *Requiem for the American Dream*, Chomsky devotes a chapter to each of these ten principles, and adds readings from some of the core texts that have influenced his thinking to bolster his argument. To create *Requiem for the American Dream*, Chomsky and his editors, the filmmakers Peter Hutchison, Kelly Nyks, and Jared P. Scott, spent countless hours together over the course of five years, from 2011 to 2016. After the release of the film version, Chomsky and the editors returned to the many hours of tape and transcript and created a document that included three times as much text as was used in the film. The book that has resulted is nonetheless arguably the most succinct and tightly woven of Chomsky's long career, a beautiful vessel--including old-fashioned ligatures in the typeface--in which to carry Chomsky's bold and uncompromising vision, his perspective on the economic reality and its impact on our political and moral well-being as a nation. "During the Great Depression, which I'm old enough to remember, it was bad--much worse subjectively than today. But there was a sense that we'll get out of this somehow, an expectation that things were going to get better . . ." --from *Requiem for the American Dream*

Redesigning the American Dream Rowman & Littlefield

How architecture and urbanism can help to care for and repair a broken planet: essays and illustrated case studies. Today, architecture and urbanism are capital-centric, speculation-driven, and investment-dominated. Many cannot afford housing. Austerity measures have taken a

disastrous toll on public infrastructures. The climate crisis has rendered the planet vulnerable, even uninhabitable. This book offers an alternative vision in architecture and urbanism that focuses on caring for a broken planet. Rooted in a radical care perspective that always starts from the given, in the midst of things, this edited collection of essays and illustrated case studies documents ideas and practices from an extraordinarily diverse group of contributors. Focusing on the three crisis areas of economy, ecology, and labor, the book describes projects including village reconstruction in China; irrigation in Spain; community land trust in Puerto Rico; revitalization of modernist public housing in France; new alliances in informal settlements in Nairobi; and the redevelopment of traditional building methods in flood areas in Pakistan. Essays consider such topics as ethical architecture, land policy, creative ecologies, diverse economies, caring communities, and the exploitation of labor. Taken together, these case studies and essays provide evidence that architecture and urbanism have the capacity to make the planet livable, again. Essays by Mauro Baracco, Sara Brolund de Carvalho, Jane Da Mosto, Angelika Fitz, H el ene Frichot, Katherine Gibson, Mauro Gil-Fournier Esquerra, Valeria Graziano, Gabu Heindl, Elke Krasny, Lisa Law, Ligia Nobre, Meike Schalk, Linda Tegg, Ana Carolina Tonetti, Kim Trogal, Joan C. Betty Friedan argues that once past the initial stages of describing and working against political and economic injustices, the women's movement should focus on working with men to remake private and public tasks and attitudes.

The Second Stage Philadelphia, Pa. ; Gabriola Island, B.C. : New Society Publishers

Are we living the good life--and what defines 'good', anyway? Americans today are constructing a completely different framework for success than their parents' generation, using new metrics that TEDWomen speaker and columnist Courtney Martin has termed collectively the "New Better Off". The New Better Off puts a name to the American phenomenon of rejecting the traditional dream of a

9-to-5 job, home ownership, and a nuclear family structure, illuminating the alternate ways Americans are seeking happiness and success. Including commentary on recent changes in how we view work, customs and community, marriage, rituals, money, living arrangements, and spirituality, *The New Better Off* uses personal stories and social analysis to explore the trends shaping our country today. Martin covers growing topics such as freelancing, collaborative consumption, communal living, and the breaking down of gender roles. *The New Better Off* is about the creative choices individuals are making in their vocational and personal lives, but it's also about the movements, formal and informal, that are coalescing around the "New Better Off" idea—people who are reinventing the social safety net and figuring out how to truly better their own communities.

Breaking Barriers The Floating Press

"With job opportunities in decline for youth with no postsecondary degree, and college completion rates especially for students of color stagnating, a high school diploma is no longer enough. To solve this large-scale global problem. High school must be completely redesigned and reinvented providing all students real opportunity with both equity and excellence. P-TECH (Pathways in Technology Early College High School) has done just that by combining public high schools and community colleges in partnership with employers, providing both opportunity and support for all students, regardless of income, race or any screen for admission. Unlike many school models, this innovative and effective approach has spread across the US and around the world, eliminating barriers to replication by engaging all stakeholders. The first P-TECH, opened in a low-income Brooklyn neighborhood, across from a public housing project, and served 100% students of color. It has become the model for school reform across over a dozen US states and nearly twenty countries. Praised by President Obama, governors in red and blue states, and heads of nations, its story is told in this book through the personal stories of students who have destroyed the myths about which students can succeed. Their stories demonstrate that all students, if given the opportunity and support, can reach great heights in high school, college, and career"--

Municipal Dreams W. W. Norton & Company

A Fortune journalist examines why suburbs are transforming and losing their appeal in society-improving ways, citing such factors as shrinking birth and marriage rates, environment-driven preferences for smaller homes and a renaissance in urbanized housing that promotes healthier lifestyles.

Main Street Gato Press

The shopping mall is both the most visible and the most contentious symbol of American prosperity. Despite their convenience, malls are routinely criticized for representing much that is wrong in America—sprawl, conspicuous consumption, the loss of regional character, and the decline of Mom and Pop stores. So ubiquitous are malls that most people would be surprised to learn that they are the brainchild of a single person, architect Victor Gruen. An immigrant from Austria who fled the Nazis in 1938, Gruen based his idea for the mall on an idealized America: the dream of concentrated shops that would benefit the businessperson as well as the consumer and that would foster a sense of shared community. Modernist Philip Johnson applauded Gruen for creating a true civic art and architecture that enriched Americans' daily lives, and for decades he received praise from luminaries such as Lewis Mumford, Winthrop Rockefeller, and Lady Bird Johnson. Yet, in the end, Gruen

returned to Europe, thoroughly disillusioned with his American dream. In *Mall Maker*, the first biography of this visionary spirit, M. Jeffrey Hardwick relates Gruen's successes and failures—his work at the 1939 World's Fair, his makeover of New York's Fifth Avenue boutiques, his rejected plans for reworking entire communities, such as Fort Worth, Texas, and his crowning achievement, the enclosed shopping mall. Throughout Hardwick illuminates the dramatic shifts in American culture during the mid-twentieth century, notably the rise of suburbia and automobiles, the death of downtown, and the effect these changes had on American life. Gruen championed the redesign of suburbs and cities through giant shopping malls, earnestly believing that he was promoting an American ideal, the ability to build a community. Yet, as malls began covering the landscape and downtowns became more depressed, Gruen became painfully aware that his dream of overcoming social problems through architecture and commerce was slipping away. By the tumultuous year of 1968, it had disappeared. Victor Gruen made America depend upon its shopping malls. While they did not provide an invigorated sense of community as he had hoped, they are enduring monuments to the lure of consumer culture.

The Big Rig Knopf

The 13 ideas in this book were identified by a group of national leaders as the most significant ideas impacting the contemporary community college. The book is designed for trustees, administrators, faculty, policy makers, legislators, and community leaders who want to be better informed about the issues affecting our students and our nation.

Seven American Utopias Yale University Press

When Paige Guthrie Hodges lost her job as an executive assistant due to the 2008 economic downturn, she decided it was high time to change her beliefs about what it meant to be wealthy. She started to write it all down and as a result *Redefining the Meaning of Wealth: Discovering Prosperity and Fortune in the Unemployment Line* was born. The opening part of the book details her personal story of getting out of debt, questioning our precarious monetary system, and surviving unemployment. The chapters that follow offer optimistic yet thought provoking essays such as "Luxuries we take for Granted," "Quality vs. Quantity," and "Redesigning the American Dream." Throughout the book, the author questions hackneyed societal beliefs and status-quo thinking. For example, does one really need to own a home to experience the American Dream and how much more "stuff" can we continue to go into debt for when our closets are already overflowing with items we never use? It's time to start focusing on accumulating a more nourishing notion of wealth—one that offers time, freedom, and joy. It's time to get back in balance with the things that really matter. No matter what your financial situation, this book based on the author's own story will inspire you to come up with your own definition of wealth and invest in your life in an empowering new way.

Geography Of Nowhere MIT Press

In this book, Dolores Hayden examines ingenious alternative models of housing and community development under way in the United States and abroad.

Street Lives Pitroda Group LLC

In these essays the author draws on ideas in art history, literature, philosophy and the study of visual culture to subvert the traditional 'positivist' model of cartography and replace it with one grounded in an iconological and semiotic theory of the nature of maps.

The New Nature of Maps John Wiley & Sons

Building on the success of its second edition, the third edition of the Sustainable Urban Development Reader provides a generous selection of classic and contemporary readings giving a broad introduction to this topic. It begins by tracing the roots of the sustainable development concept in the nineteenth and twentieth centuries, before presenting readings on a number of dimensions of the sustainability concept. Topics covered include land use and urban design, transportation, ecological planning and restoration, energy and materials use, economic development, social and environmental justice, and green architecture and building. All sections have a concise editorial introduction that places the selection in context and suggests further reading. Additional sections cover tools for sustainable development, international sustainable development, visions of sustainable community and case studies from around the world. The book also includes educational exercises for individuals, university classes, or community groups, and an extensive list of recommended readings. The anthology remains unique in presenting a broad array of classic and contemporary readings in this field, each with a concise introduction placing it within the context of this evolving discourse. The Sustainable Urban Development Reader presents an authoritative overview of the field using original sources in a highly readable format for university classes in urban studies, environmental studies, the social sciences, and related fields. It also makes a wide range of sustainable urban planning-related material available to the public in a clear and accessible way, forming an indispensable resource for anyone interested in the future of urban environments.

Redesigning the American Dream Redesigning the American Dream

Argues that much of what surrounds Americans is depressing, ugly, and unhealthy; and traces America's evolution from a land of village commons to a man-made landscape that ignores nature and human needs.

Sprawl Repair Manual Teachers College Press

Based on her extensive experience in the urban communities of Los Angeles, historian and architect Dolores Hayden proposes new perspectives on gender, race, and ethnicity to broaden the practice of public history and public art, enlarge urban preservation, and reorient the writing of urban history to spatial struggles. In the first part of *The Power of Place*, Hayden outlines the elements of a social history of urban space to connect people's lives and livelihoods to the urban landscape as it changes over time. She then explores how communities and professionals can tap the power of historic urban landscapes to nurture public memory. The second part documents a decade of research and practice by *The Power of Place*, a nonprofit organization Hayden founded in downtown Los Angeles. Through public meetings, walking tours, artists' books, and permanent public sculpture, as well as architectural preservation, teams of historians, designers, planners, and artists worked together to understand, preserve, and commemorate urban landscape history as African American, Latina, and Asian American families have experienced it. One project celebrates the urban homestead of Bidy Mason, an African American ex-slave and midwife active between 1856 and 1891. Another reinterprets the Embassy Theater where Rose Pesotta, Luisa Moreno, and Josefina Fierro de Bright organized Latina dressmakers and cannery workers in the 1930s and 1940s. A third chapter tells the story of a historic district where Japanese American family businesses flourished from the 1890s to the 1940s. Each project deals with bitter memories—slavery, repatriation, internment—but shows

how citizens survived and persevered to build an urban life for themselves, their families, and their communities. Drawing on many similar efforts around the United States, from New York to Charleston, Seattle to Cincinnati, Hayden finds a broad new movement across urban preservation, public history, and public art to accept American diversity at the heart of the vernacular urban landscape. She provides dozens of models for creative urban history projects in cities and towns across the country.

Mall Maker Island Press

When *Designing Your Life* was published in 2016, Stanford's Bill Burnett and Dave Evans taught readers how to use design thinking to build meaningful, fulfilling lives ("Life has questions. They have answers." -The New York Times). The book struck a chord, becoming an instant #1 New York Times bestseller. Now, in *DESIGNING YOUR WORK LIFE: How to Thrive and Change and Find Happiness at Work* they apply that transformative thinking to the place we spend more time than anywhere else: work. *DESIGNING YOUR WORK LIFE* teaches readers how to create the job they want—without necessarily leaving the job they already have. "Increasingly, it's up to workers to define their own happiness and success in this ever-moving landscape," they write, and chapter by chapter, they demonstrate how to build positive change, wherever you are in your career. Whether you want to stay in your job and make it a more meaningful experience, or if you decide it's time to move on, Evans and Burnett show you how to visualize and build a work-life that is productive, engaged, meaningful, and more fun.

Redefining the Meaning of Wealth MIT Press

An eye-opening, mind-bending exploration of how mankind is reshaping its genetic future, based on the viral TED Talk series "Will Our Kids Be a Different Species?" and "The Next Species of Human." Are you willing to engineer the DNA of your unborn children and grand-children to be healthier? Better looking? More intelligent? Why are rates of autism, asthma, and allergies exploding at an unprecedented pace? Why are humans living longer and having far fewer kids? Futurist Juan Enriquez and scientist Steve Gullans conduct a sweeping tour of how humans are changing the course of evolution for all species—sometimes intentionally, sometimes not. For example: • What if life forms are limited only by the bounds of our imagination? Are designer babies and pets, de-extinction, even entirely newspecies fair game? • As humans, animals, and plants become ever more resistant to disease and aging, what will become the leading causes of death? • Man-machine interfaces may allow humans to live much longer. What will happen when we transfer parts of our "selves" into clones, into stored cells and machines? Though these harbingers of change are deeply unsettling, the authors argue we are also in an epoch of tremendous opportunity. Future humans, perhaps a more diverse, resilient, gentler, and intelligent species, may become better caretakers of the planet—but only if we make the right choices now. Intelligent, provocative, and optimistic, *Evolving Ourselves* is the ultimate guide to the next phase of life on Earth. Chosen by *Nature* magazine as a Fall 2016 season highlight.

The Next American Metropolis W. W. Norton & Company

This book uncovers what might seem to be a dark side of the American dream: the New World from the viewpoint of those who decided not to stay. At the core of the volume are the life histories of people who left New England during the British Civil Wars and Interregnum, 1640-1660. More than a

third of the ministers who had stirred up emigration from England deserted their flocks to return home. The colonists' stories challenge our perceptions of early settlement and the religious ideal of New England as a "City on a Hill." America was a stage in their journey, not an end in itself. Susan Hardman Moore first explores the motives for migration to New England in the 1630s and the rhetoric that surrounded it. Then, drawing on extensive original research into the lives of hundreds of migrants, she outlines the complex reasons that spurred many to brave the Atlantic again, homeward bound. Her book ends with the fortunes of colonists back home and looks at the impact of their American experience. Of exceptional value to studies of the connections between the Old and New Worlds, *Pilgrims* contributes to debates about the nature of the New England experiment and

its significance for the tumults of revolutionary England.

Carol Milford is an exuberant, liberal-hearted woman who marries a man from a small town. After they marry they settle in his home-town, Gopher Prairie, which Carol finds narrow and ugly. She throws herself into reforming the town, but is met only with derision by her own class. She decides to leave, but finds that the world outside is just as flawed as Gopher Prairie. She remains uncowed, however, declaring "I do not admit that dish-washing is enough to satisfy all women!"
