A Case Study Springer

This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam), are now becoming increasingly sophisticated and striving to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.

Although popular culture certainly has its favorites in terms of rockstar companies, some of the rising giants within the business world don't always get the credit or airtime they deserve. There are a number of recent growth engine companies that have challenged conventional paths to success and forged their own destinies through unique and innovative techniques that have resulted in huge success within a shockingly short time. This book pulls back the curtain on some of today's rising business stars and reveals what essential tactics they've used to reach such impressive heights. Case studies included: - Lululemon - Alibaba - Keurig Green Mountain - Tesla Motors - Fuhu This book includes a bonus material: How Google Did It, a best-selling book.

I3E 2009 was held in Nancy, France, during September 23-25, hosted by Nancy University and INRIA Grand-Est at LORIA. The conference provided scientists and practitioners of academia, industry and government with a forum where they presented their latest findings concerning application of e-business, e-services and e-society, and the underlying technology to support these applications. The 9th IFIP Conference on e-Business, e-Services and e-Society, sponsored by IFIP WG 6.1. of Technical Committees TC6 in cooperation with TC11, and TC8 represents the continuation of previous events held in Zurich

(Switzerland) in 2001, Lisbon (Portugal) in 2002, Sao Paulo (Brazil) in 2003, Toulouse (France) in 2004, Poznan (Poland) in 2005, Turku (Finland) in 2006, Wuhan (China) in 2007 and Tokyo (Japan) in 2008. The call for papers attracted papers from 31 countries from the 7ve continents. As a result, the I3E 2009 program offered 12 sessions of full-paper presentations. The 31 selected papers cover a wide and important variety of issues in e-Business, e-services and e-society, including security, trust, and privacy, ethical and societal issues, business organization, provision of services as software and software as services, and others. Extended versions of selected papers submitted to I3E 2009 will be published in the International Journal of e-Adoption and in AIS Transactions on Enterprise Systems. In addition, a 500-euro prize was awarded to the authors of the best paper selected by the Program Committee. We thank all authors who submitted their papers, the Program Committee members and external reviewers for their excellent work.

Using e-business technologies to manage supply chains increases the efficiency and performance of logistics, production, distribution and other related activities. E-Business and Supply Chain Integration explains how a number of tools can be integrated to produce an e-supply chain, with the overall aim of achieving higher productivity. This essential book examines supply chain theories along with real life cases and examples from industry to illustrate how e-business can enhance supply chain integration and highlights the negative outcomes when it is neglected and poorly managed. Dr Ozlem Bak and a team of expert contributors from practice and academia assess the impact of e-business on numerous different sectors, such as automotive, healthcare, logistics, higher education, and professional services. E-Business and Supply Chain Integration explains the strategic implications of new technologies and provides guidance on effective supply chains in e-businesses. [Alibaba Group](#) Springer

The book entitled "The internationalization of e-commerce: a case study of the Alibaba group" has been written by the Brazilian researchers Matheus Felipe Pereira de Souza and Elói Martins Senhoras. It is the 31st didactic book of the "Communication & Public Policies Collection" which aims to stimulate the development of textbooks fulfilling bibliographical gaps. This book brings into light 3 main discussions: International Business as a scientific field of study the internationalization process of e-commerce and, a case study of the Alibaba Group.

Asia has been a hub for e-commerce companies in the past decade and the growth trajectory narrates the story of bright future. Its growth has largely impacted the economic, social and technological advancements in every country and contributed to global trade. Nonetheless, the success and failure of e-commerce companies lies on various factors, some of which include product pricing, competition, strategies and business models. However, with surveys in India indicating how sale of counterfeit products remains a significant problem for online shoppers across many e-commerce sites, e-commerce companies claim they are taking tough steps to ensure that counterfeit products do not make their way to customers, by delisting fraud sellers, using tamper-proof packaging and monitoring warehouses. This book aims to unwrap the stories of e-commerce companies in Asia and how they have contributed to the society. It discusses the growth and failures of some e-commerce giants and looks at both theoretical and practical aspects of e-commerce by presenting the issues, challenges and successes of e-commerce businesses. It examines interdisciplinary and transdisciplinary aspects from micro and macro perspectives and links disciplines like strategy, management, entrepreneurship, competitiveness, finance, technology and operations.

In an increasingly volatile, uncertain, complex and ambiguous world, achieving sustainable competitive advantage has never been more important, or more difficult. However, the key challenge for CEOs, senior executives and HR professionals is how to unlock the potential of their people, building a culture that allows employees to perform to the best of their abilities and effectively attract, engage, develop and retain the staff needed for sustainable business success. Building an Outstanding Workforce is a must-have guide for all professionals looking to leverage the potential of their people and maximise value for all stakeholders. Including evolutionary psychology, neuroscience and personality psychology, this book takes an evidence-based approach to people management. With practical guidance, expert advice and case studies from companies including Alibaba, Barclays Banking Group, Patagonia, Tata Group and Qantas, Building an Outstanding Workforce covers all the key issues including how to tailor people management to address the motivations of different generations, the impact of emergent technology on the workforce, the shift in the skills employees now need to learn and develop and how to handle the new challenges of remote and flexible working and the gig economy. There is also essential coverage of strategic workforce planning, people risk, people analytics, human capital reporting, the employer brand and employee value proposition and the benefits of embracing diversity and inclusion, well-being and other aspects of corporate

and social responsibility. It presents a new people-focused framework for people management that redefines the structure, roles and responsibilities of human resource management and addresses the problems of role ambiguity and conflict associated with HR to deliver people management that everyone needs and deserves.

A Case Study of Board Entrenchment Routledge

Rooted in strategic management research, Business Model Innovation explores the concepts, tools, and techniques that enable organizations to gain and/or maintain a competitive advantage in the face of technological innovation, globalization, and an increasingly knowledge-intensive economy. Updated with all-new cases, this second edition of the must-have for those looking to grasp the fundamentals of business model innovation, explores the novel ways in which an organization can generate, deliver, and monetize benefits to customers.

Business Model Innovation Springer

This book is one of the first to explore how Chinese companies are feeling the impulse of emerging business trends and seizing opportunities brought by technology innovation. It consists of case studies of 7 Chinese companies: 3DMed, Wechat from Tencent, Shanghai GM, CP Group, Alibaba, AutoNavi, and ICBC. Each Chinese company has its unique perspectives and different ways to make transformation and business model adjustments. The book helps fill the gap between the global interest in "Innovate in China" and the limited availability of cases on innovations in the country. It is a valuable reference resource for readers in China and beyond wishing to address challenges in the context of growing digital technologies and overwhelming business trends.

Digital Marketing Springer

This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

Case Studies in Asian Management Vital Wellspring Education Pte. Ltd.

Seminar paper from the year 2019 in the subject Business economics - Operations Research, grade: 1,8, Reutlingen University, language: English, abstract: This paper is a case study about Alibaba entering the US e-commerce market. Can Alibaba make large-scale sustainable success in the American e-commerce market? Or is the industry not attractive and the market saturated? Alibaba provides technology, infrastructure and marketing to help merchants, brands and businesses to leverage the power of new technology to engage with their customers. The Alibaba Group was founded in 1999 by Jack Ma and 17 other people. Alibaba was originally founded as a B2B e-commerce portal to connect Chinese manufacturers with overseas buyers. Nowadays, Alibaba ranks in the Top Ten companies in terms of market value. Most of the credit goes to Ma himself, because he utilized the first-mover advantage and successfully planned entrepreneurial growth and corporate initiatives. Looking back, Ma has traveled more than 800 hours to dozens of countries to meet business leaders and state representatives to convince them of Alibaba's aim: to let small and medium businesses (SMEs) from all parts of the world trade freely and securely on Alibaba's platforms. The company's vision is to achieve \$1 trillion in gross merchandise by 2020 and to serve two billion customers by 2036. To achieve this, global operations are key and experts propose: "globalization is better done now than later". Alibaba is currently experiencing high competitive pressure in China and will need to conquer new

territories to continue on current trajectory. Needless to say, entry into the US market will not only be difficult, but also require premium strategic decisions with little to no room for errors.

A Casebook on Asia's Global Market Leaders Harvard Business Press

China's new retail revolution will completely transform how the world thinks about retail and digital innovation. But is the world ready yet? In this book, the authors share an insider's perspective on what is happening in China to reveal the future for global retail, and a clear framework to help you prepare. The book presents a number of real-world cases, based on interviews and first-hand consumer experience, to decode China's retail revolution so that you can understand what is happening and why, and what it means for the rest of the world. Crucially, the book identifies five critical stages in the development of new retail that global retail executives need to grasp now: lifestyle commerce, Online-Merge-Offline retail, social retail, livestream retail and invisible retail. To help the industry get ready for this new, China-inspired paradigm in retail, the authors present a practical and simple framework - a ten-year strategic roadmap for global retail executives, which we call the "Beyond" the Value Chain Model. China's new retail is not just about fashion, cosmetics, snacks, data-driven convenient stores and commercial live streaming. At a time when the world of retail is being upended, it offers inspirational lessons in innovation, purpose and agility for global executives across the entire retail spectrum.

16th EAI International Conference, CollaborateCom 2020, Shanghai, China, October 16-18, 2020, Proceedings, Part I World Scientific

Global service-based firms are often 'born global,' and these organizations have developed integrated global strategies based on industry relationships, in order to thrive in new environments. Focusing on these global strategies, this textbook explores the workings of modern service businesses, presenting theoretical management concepts alongside illustrative examples. Original case studies from a range of global sectors, including Starbucks and Facebook, as well as broader studies, such as healthcare in Japan, provide practical insights into the art of thriving as a global business. Written by a leading expert in the field, this multidisciplinary text is a vital read for all scholars and students wishing to view strategic relationships from the focal point of service industries.

Case Studies Food & Agriculture Org.

How Strategy Works in an Interconnected, Automated World Leaders already know that the classic approach to strategy--analyze, plan, execute--is losing relevance. But they don't yet know what replaces it. As everyone and everything becomes more interconnected and digitized, how do you operate, compete, and win? Ming Zeng, the former Chief of Staff and strategy adviser to Alibaba Group's founder Jack Ma, explains how the latest technological developments, such as artificial intelligence, machine learning, the mobile internet, and cloud computing are redefining how value is created. Written especially for those outside the technology industry or the startup arena, this book introduces a simple, overarching framework to guide strategy formulation and execution in this data-rich and highly interactive environment. Revealing the revolutionary practices that he and his team have developed at Alibaba, Zeng shows how to: Automate decisions through machine learning Create products informed by real-time data from customers Determine the right strategic positioning to maximize value from platforms and suppliers Repurpose your organization to further human insight and enable creativity Lead your company's transformation into a smart business With insights into the strategies and tools used by leaders at Alibaba and other companies such as Ruhan and Red Collar, in a variety of industries from furniture making to banking to custom tailoring, Smart Business outlines a radically new approach to strategy that can be applied everywhere.

Software Services for e-Business and e-Society Springer

Nature

Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

Online Services in China's Rural Transformation World Scientific

This book is the first to explore the issue of corporate governance in China's new corporations. With rapid development over the last two decades, China has seen compelling achievements in overseas investment. Specifically, an increasing number of Chinese companies have been "going out" to become multinational enterprises. From the practical view, corporate governance issues have been identified in the literature as one of the most important factors in determining whether these Chinese multinational enterprises succeed or not. However, existing literature provides little investigation and understanding about corporate governance of Chinese multinational enterprises. This book fills that gap and will be of value to corporate executives, scholars of China's economy, and journalists.

Transformational Entrepreneurship Springer Science & Business Media

This book analyzes extensive data on the world's rapidly changing and growing access to, use and geographies of information and communications technologies. It studies not only the spatial differences in technology usage worldwide, but also examines digital differences in the major world nations of China, India, the United States and Japan at the state and provincial levels. At the global level, factors such as education, innovation, judicial independence and investment are important to explaining differences in the adoption and use of technology. The country studies corroborate consistent determinants for technology usage for education, urban location, economic prosperity, and infrastructure, but also reveal unique determinants, such as social capital in the United States and India, exports in China and working age population and patents in Japan. Spatial patterns are revealed that indicate clusters of high and low technology use for various nations around the world, the countries of Africa and for individual states/provinces within nations. Based on theory, novel findings and phenomena that have remained largely unreported, the book considers the future of the worldwide digital divides, the policy role of governments and the challenges of leadership.
