conditioning. B.F. Skinner Operant Conditioning Research Papers on ...  
 Theory of Operant Conditioning  
 Operant conditioning is a form of learning that exists within the science of psychology and is one of two types of conditioning, the other, classical conditioning. Operant conditioning teaches an organism to respond by thinking, learning, or reacting to a stimulus (Olson & Hergenhahn, 2009).  
 Operant Conditioning Paper free essay sample - New York Essays  
 Operant conditioning works because sometimes the subject is rewarded and sometimes not and this has found to be very successful (the most successful, in fact) in conditioning. For example, if one sometimes gives dogs food off their plate and sometimes not, the dog will be conditioned to wait always for the food because sometimes he gets it.

 In this paper we will describe the theory of operant conditioning, compare and contrast positive and negative reinforcement, determine which form of reinforcement is most effective and why, select a scenario where you could apply operant conditioning to shape behavior, and create a reinforcement schedule for the selected behavior.  
 Classical Conditioning vs. Operant Conditioning - Term Paper  
 Operant conditioning is based on a skinner box, which observes the behavior of animals. It is a special cage which is sound proof and contains a rat. The cage is also built in such a way that it has a pedal or bar on one of the sides, which when pressed, makes food pellets to be released (Weiss, 2005).
