Since the apoE4 allele is a risk factor or susceptibility gene in late-onset familial and sporadic AD, the mechanism of disease expression may involve metabolic effects that are isoform specific. Isoform-specific interactions of apoE therefore become critical in the mechanism of AD pathogenesis. Detailed characterization of the binding of the apoE isoforms with proteins and peptides relevant to the pathology of the disease may be critical in understanding disease pathogenesis. These critical isoform-specific interactions of apoE may involve interactions with proteins and peptides in the defining neuropathologic lesions of the disease, the neurofibrillary tangle and senile plaque. Other possible critical isoform-specific interactions include the mechanism of internalization, intracellular trafficking, and subsequent metabolism. In addition, differential post-translational modifications of apoE isoforms may determine differences in metabolism contributing to the pathogenesis of the disease. Oxidation of apoE may confer several isoform-specific, biochemically distinct properties. Since {3A peptide binds apoE in the lipoprotein binding domain of the protein and not in the receptor-binding domain, apoE could target bound {3A4 peptide to neurons via the LRP receptor. Internalization of the apoE1 {3A peptide complex into the cell, by the same route as the apoE-containing lipoproteins, would result in incorporation into primary lysosomes and pH dependent dissociation. The demonstration of apoE in the cytoplasm of neurons, with isoform-specific interactions of apoE with the microtubule-binding protein tau demonstrated in vitro, suggest additional, testable hypotheses of disease pathogenesis.

The 2022 edition of the beloved cult diary explores worlds beyond ours, with art and writing by Hieronymous Bosch, Frederick Douglass and more "There may be no great diarists, then, but there

are still great diaries.... In the midst of one's self-obsessions, the Redstone Diary reminds one of other worlds," declared writer Ian Sansom in the Guardian, of the inimitable diaries published by London's Redstone Press. Since its inaugural edition in 1988, the Redstone Diary has been a beloved daily tool of creatives. Carefully curated by editor Julian Rothenstein around a yearly theme, the Redstone Diary features work from a wide selection of writers and artists throughout history.
