HALLIE LACI

[Handbook of Teaching and Learning in Tourism](#) Cambridge Scholars Publishing

Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourism's fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be.

The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers.

The Routledge Handbook of Tourism and Hospitality Education Emerald Group Publishing

Are profits and sustainability compatible? This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth century, and its spread globally in industries including renewable energy, organic food, natural beauty, ecotourism, recycling, architecture, and finance. The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet, rather than consume it. The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies. The green entrepreneurs seen here are shown to have created new markets and industries, and driven innovations in sustainable practices, even at times when most consumers and governments marginalized the entire subject. The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers, business leaders, and others in recent years, but the Earth's environmental health continues to deteriorate. If profits and sustainability have proved challenging to reconcile, the book argues that one reason was how they were both defined.

Natural Area Tourism Routledge

Offering an overview of current issues around design, marketing and management of experiences from the tourist perspective, this comprehensive

Handbook critically reviews the key debates and developments within the field. Empirical chapters by international contributors explore a range of perspectives, challenges, opportunities for future research and best managerial practices.

Worldwide Destinations Routledge

As tourism matures as an academic subject and the number of tourism higher education providers continues to expand world-wide, there is an increasing interest in its educational aspects. At the same time the development of research into education issues related to tourism means that there is now a developing literature on the subject. This international handbook offers a timely evaluation of the state of the art of tourism higher education. The book brings together expert contributors from around the world to present current thinking and practice about what is now a major element of education provision world-wide. It is structured round four key themes: - Curriculum - International perspective - Teaching, learning and assessment - Resources, progression and quality Its global survey of tourism education offers a comprehensive basis for comparative review. In addition to setting out the development and current provision of tourism education it also addresses cutting edge issues such as PhD education, non-formal education, cultural issues in learning, research and teaching, e-learning and e-assessment. It offers practical advice for the design, delivery, evaluation and resourcing of courses and concludes with a reflective agenda of issues for the future.

Landscape Architecture Routledge

This fourth edition of *The Geography of Tourism and Recreation* provides students with a comprehensive introduction to the interrelationship between tourism, leisure and recreation from geographical and social science perspectives. It still remains the only book to systematically compare and contrast in a spatial context, tourism and recreation in relation to leisure time, offering insight into the demand, supply, planning, destination management and impacts of tourism and recreation. Whilst retaining its accessible style and approach this edition has been significantly updated to reflect recent developments and new concepts from geography which are beginning to permeate the tourism and recreational field. New features include: Content on the most recent developments, climate change, sustainability, mobilities and crisis management in time and space as well as trends such as low cost airlines and the control of land transport by transnational operators in the EU such as Arriva. More attention to management issues such as innovation and the spatial consequences for tourism and leisure development. New case studies and examples to showcase real life issues, from both developed and developing countries, especially the US, China and South Africa. Completely revised and redeveloped to accommodate new, user-friendly features: case studies, insights, summary points and learning objectives. Written by leading academics, this is essential reading for all tourism, geography, leisure and recreation students.

The Routledge Handbook of Tourism and the Environment Edward Elgar Publishing

This important and timely book provides an overview of climate change and highlights the importance of including climate change education in primary schools. It emphasises the importance of cross-curricular pedagogical approaches with a focus on climate justice, providing in-depth assistance for teaching children aged 3–13 years. Informed by up to date research, the book helps teachers to remain faithful to climate change science whilst not overwhelming children. Accompanied by online resources, this book includes practical and easy to follow ideas and lesson plans that will help teachers to include climate change education in their classrooms in a holistic, cross-curricular manner. Specific chapters address the following topics: • Inter-disciplinary approaches to climate change • Early childhood education • Pedagogies of hope • The importance of reflective practice • Ideas for including climate change education in curricular areas such as literacy, geography, science, history and the arts Designed to promote climate change education in primary schools, this resource will help primary teachers, student teachers, geography specialists and all those interested in climate change education develop their own conceptual knowledge and that of the children in their class.

Transnational Interconnections of Nature Studies and the Environmental Humanities Edward Elgar Publishing

This comprehensive Handbook provides an international perspective on contemporary issues and future directions in teaching and learning in tourism. Key topics include assurance of learning, development of skills, learning in the field, work integrated learning, sustainability and critical studies, internationalisation, technology enabled learning, links between teaching and research, and graduate student supervision. Within these topics attention is devoted to the discussion of curriculum, pedagogy, assessment, students, educators and trends and issues. The Handbook provides a valuable resource for understanding teaching and learning theory and practice in tourism.

International Handbook on the Economics of Tourism International Handbook on Ecotourism

Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists, this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key responses to human visitation—behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.

Ecotourism's Promise and Peril Edward Elgar Publishing

This Handbook gives a comprehensive, international and cutting-edge overview of Sustainable Development. It integrates the key imperatives of sustainable development, namely institutional, environmental, social and economic, and calls for greater participation, social cohesion, justice and democracy as well as limited throughput of materials and energy. The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume. The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate. It provides original contributions from international experts coming from a variety of disciplines and regions, including the Global South. Comprehensive in scope, it covers, amongst other areas: Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De-growth Disaster management Eco-system services Education Environmental justice Food and sustainable development

Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered.

Routledge International Handbook of Sustainable Development Edward Elgar Publishing

This book offers an original collection of international studies on indigenous entrepreneurship. Through these specific lenses, entrepreneurship greatly appears as a set of cultural values-based behaviours. Once more culture and human values are placed at the heart of entrepreneurship as an economic and social phenomenon.'. - Alain Fayolle, EM Lyon and CERAG Laboratory, France and Solvay Business School, Belgium. `A must-have for researchers of developmental economics, as well as for entrepreneurship scholars, this collection assembles studies of indigenous entrepreneurship from five continent.

Understanding Media and Society in the Age of Digitalisation Routledge

Ross K. Dowling and David Newsome present an original, substantial and much-needed contribution to the field to further our understanding of geotourism in theory and practice. This Handbook defines, characterizes and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia and Africa, this global Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability and society, geotourism in urban areas, and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is the future for engaging the public and protecting geosites, as well as emphasising the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology and geology. Written with practitioners in mind, this book reveals how tourism professionals and geologists should each know about the nexus of their subjects.

An International Handbook of Tourism Education Oxford University Press

What knowledge and skills should tourism students be exposed to? How should tourism education programs at all levels be designed to create responsible leaders for the future of tourism? What is the employability and range of careers students can expect after graduation? This book examines and seeks to provide answers to these three questions.

The Geography of Tourism and Recreation Routledge

The Routledge Handbook of Tourism Research is a compendium of some of the most relevant issues affecting tourism development today. The topics addressed in this book provide some new thinking for those involved in tourism research. This book takes the reader from the beginnings of tourism research to a discussion of emerging forms of tourism and selected examples of tourism development. The underlying theoretical dimensions are reviewed, analysed and discussed from a number of perspectives. This book brings together leading researchers, many of whom are members of the International Academy for the Study of Tourism, to discuss tourism today and its future. The works included in this volume are diverse, in terms of geographical context, research methodology, root discipline, and perspective. This book represents studies based in Europe, North America, Oceania, and Asia. Research methodologies include both quantitative and qualitative. Both macro and micro issues are discussed from the economic, psychological, sociological, political science, marketing, and other perspectives, which reflect the interdisciplinary nature of tourism studies. This book is divided into 6 sections. Section 1 considers the foundations for tourism research. Section 2 discusses the implications for destination management and section 3 discusses planning for tourism development. Section 4 covers human capital for tourism development. And finally, section 5 evaluates emerging forms of tourism and then section 6 offers insights into tourism evolution. It offers the reader a comprehensive synthesis of this field, conveying the latest thinking and research. The text will provide an invaluable resource for all those with an interest in tourism research. This is essential reading for students, researchers & academics of Tourism as well as those of related studies in particular Leisure, Hospitality & Development Studies.

Profits and Sustainability Routledge

From its late nineteenth century origins, the concept of protected areas has increased in scope and complexity. It now has to come to terms with the twenty first century world of neo-liberal politics, performance metrics and the growing and complex demands of tourism. This international collection of papers explores how this might be done, detailing the issues involved, and the value and values that protected areas have for economies, peoples and environments. Special attention is given to World Heritage Sites, tourism planning and their communities, to the growth of private protected areas, and to the health values of protected areas. Other subjects include private sector business involvement in protected areas, concessions policy experiments, and how the work of the world's largest protected area agency, the US National Park Service, is adapting to changing political and market demands, and to the challenges of sustainable development. It concludes with a searching interview with a member of UNESCO's World Heritage Committee. The chapters were originally published in a special issue in the *Journal of Sustainable Tourism*.

Routledge Handbook of Tourism Cities BoD – Books on Demand

Routledge Handbook of the Tourist Experience offers a comprehensive synthesis of contemporary research on the tourist experience. It draws together multidisciplinary perspectives from leading tourism scholars to explore emergent tourist behaviours and motivations. This handbook provides up-to-date, critical discussions of established and emergent themes and issues related to the tourist experience from a primarily socio-cultural perspective. It opens with a detailed introduction which lays down the framework used to examine the dynamic parameters of the tourist experience. Organised into five thematic sections, chapters seek to build and enhance knowledge and understanding of the significance and meaning of diverse elements of the tourist experience. Section 1 conceptualises and understands the tourist experience through an exploration of conventional themes such as tourism as authentic and spiritual experience, as well as emerging themes such as tourism as an embodied experience. Section 2 investigates the new, developing tourist demands and motivations, and a growing interest in the travel career. Section 3 considers the significance, motives, practices and experiences of different types of tourists and their roles such as the tourist as photographer. Section 4 discusses the relevance of 'place' to the tourist experience by exploring the relationship between tourism and place. The last section, Section 5, scrutinises the role of the

tourist in creating their experiences through themes such as 'transformations in the tourist role' from passive receiver of experiences to co-creator of experiences, and 'external mediators in creating tourist experiences'. This handbook is the first to fill a notable gap in the tourism literature and collate within a single volume critical insights into the diverse elements of the tourist experience today. It will be of key interest to academics and students across the fields of tourism, hospitality management, geography, marketing and consumer behaviour.

Routledge

This book provides an authoritative, state-of-the-art review of tour guiding scholarship and research. It aims to foster best practice and to stimulate further study and research on tour guiding across a range of disciplines. The book is well-illustrated and its accessible style with chapter summaries makes it ideal for students as well as researchers.

Tourism Planning and Destination Marketing Emerald Group Publishing

Visitor management may be considered as a component of destination management at all levels of a destination. It involves a wide range of stakeholders. This book demonstrates current knowledge on visitor management. Visitor Management in Tourism Destinations provides insight into critical concepts such as the visitor experience, service quality, the uses of indicators and frameworks, and interpretation. It also addresses current issues including the social and political dimensions of visitor management, the implementation of monitoring, vandalism and augmented reality.

Authored by leading international researchers in the field of visitor management research, this book is primarily aimed at researchers and

postgraduate students.

Tourism Education Edward Elgar Publishing

How is ecotourism articulated in varied research fields? What are the conjunctions and concurrences of academic endeavors in the attempt to curb environmental destruction? This collection of essays offers a multifaceted exploration of the basic tenets of environmentalism proposed by academic curricula across the world. Ecodestruction, the wilderness, rampant pollution, tourism developments, sustainability, educational interventions, and the plurivocal turn to ecotheoretical textual analysis are some of the critical perspectives and scientific findings investigated here. The book introduces a multilateral understanding of environmental consciousness, and suggests that the study of nature should not be compartmentalized into separate fields of analyses, but aim for the interconnections between disciplines, given that the physical cosmos is an unambiguous and finite host of humanity's endeavours. The volume appeals to academics, researchers and professionals with a particular interest in the current environmental crisis, offers solid insights into the ways human societies construe nature and hopefully will embark on the protection of the ecosphere.

Tour Guiding Research Charlesbridge Publishing

International Handbook on Ecotourism Edward Elgar Publishing

Handbook of Geotourism Edward Elgar Publishing

This handbook explores and critically evaluates the debates and controversies inherent to tourism's relationship with nature, especially pertinent at a time of major re-evaluation of our relationship with the environment as a consequence of the environmental problems we now face.
