 Mechanics I Problem Set # 1 Solutions Fall 2000 Surface Tension
 1. Capillary forces: (a) i: The work done by a water droplet on the
 outside world, needed to increase the radius from R to $R + \Delta R$ is $W = (P - P_0) 4\pi R \Delta R$; where P is the pressure inside the drop and P_0 is the atmospheric pressure. In equilibrium, this should be equal to ... 8.333: Statistical Mechanics I Problem Set # 1 Solutions
 ... 8.333: Statistical Mechanics I Problem Set # 5 Solutions Fall
 2003 Two-dimensional electron gas 1. Electron gas in a magnetic
 field: (a) The Hamiltonian for non-interacting free electrons in a
 magnetic field has the form $H = \sum_i \frac{p_i^2}{2m} + e \sum_i A \cdot v_i$; or in expanded form $H = \sum_i \frac{p_i^2}{2m} + e \sum_i A \cdot v_i$
