Would you want to be a student in your own classroom? In *Passionate Learners: How to Engage and Empower Your*

Students, author Pernille Ripp challenges both novice and seasoned teachers to create a positive, interactive learning environment where students drive their own academic achievement. You'll discover how to make fundamental changes to your classroom so learning becomes an

exciting challenge rather than a frustrating ordeal. Based on the author's personal experience of transforming her approach to teaching, this book outlines how to:

- Build a working relationship with your students based on mutual trust, respect, and appreciation
- Be attentive to your

students' needs and share ownership of the classroom with them • Break out of the vicious cycle of punishment and reward to control student behaviour • Use innovative and creative lesson plans to get your students to become more engaged and intellectually-invested learners, while still meeting your state standards • Limit homework and abandon traditional grading so that your students can make the most of their learning experiences without

unnecessary stress • And much more! New to the second edition, you'll find practical tools, such as teacher and student reflection sheets, parent questionnaires, and parent conference tools, available in the book and as eResources on our website (<http://www.routledge.com/9781138916920>) to help you build your own classroom of passionate learners.

The use of large,

computerized bodies of text for linguistic analysis and description has emerged in recent years as one of the most significant and rapidly-developing fields of activity in the study of language. This book provides a comprehensive introduction and guide to Corpus Linguistics. All aspects of the field are explored, from the various types of electronic corpora that are available to instructions on how to design and compile a corpus. Graeme Kennedy surveys the development

of corpora for use in linguistic research, looking back to the pre-electronic age as well as to the massive growth of computer corpora in the electronic age.

The Early Grade Reading Assessment (EGRA)

measures students' progress towards reading.

EGRA gauges early literacy skills through a 15-minute individual oral

assessment of five fundamental reading

skills. RTI worked with education experts to

develop the EGRA in 2006, and it has been

piloted and implemented in more than 40 countries.

This volume aims to take stock of the substantial

amount of information and experience generated through the use of EGRA,

and to share this knowledge with practitioners,

policymakers, and international donors.

Chapters cover not only particular applications of

the instrument but also put EGRA in the context of

broader issues and developments in literacy

and education.
