DOYLE HOOPER

The Post-Traumatic Stress Disorder Sourcebook Mosby Canada
 Careers in astronomy for women (as in other sciences) were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era, recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier opportunity-poor age. Placed in roughly chronological order, their lives constitute a sample thread in the story of female entry into the

male world of science. The book is aimed at astronomers, amateur astronomers, historians of science, and promoters of women in science, but being written in non-technical language it is intended to be of interest also to educated readers generally. *Publication Manual of the American Psychological Association* Gower Publishing, Ltd.

Making the Business Case Springer Publishing Company
A fascinating slice of social history - Jennifer Worth's tales of being a midwife in 1950s London, now a major BBC TV series. Jennifer Worth came from a sheltered background when she became a midwife in the Docklands in the 1950s. The conditions in which many women gave birth just half a century ago were horrifying, not only because of their grimly impoverished surroundings, but also because of what they were expected to endure. But while Jennifer witnessed brutality and tragedy, she also met with amazing kindness and understanding, tempered by a great deal of Cockney humour. She also earned the confidences of some whose lives were truly stranger, more poignant and more terrifying than could ever be recounted in fiction. Attached to an order of nuns who had been working in the slums since the 1870s, Jennifer tells the story not only of the women she treated, but also of the community of nuns (including one who was accused of stealing jewels from Hatton Garden) and the camaraderie of the midwives with whom she trained. Funny, disturbing and incredibly moving, Jennifer's stories bring to life the colourful world of the East End in the 1950s.

Qualitative Research in Practice Taylor & Francis

Understand the human place in a digital world. "Should be read by anyone interested in understanding the future," The Times Literary Supplement raved about the original edition of *The Social Life of Information*. We're now living in that future, and one of the seminal books of the Internet Age is more relevant than ever. The future was a place where technology was supposed to empower individuals and obliterate social organizations. Pundits predicted that information technology would spell the end of almost everything—from mass media to bureaucracies, universities, politics, and governments. Clearly, we are not living in that future. *The Social Life of Information* explains why. John Seely Brown and Paul Duguid show us how to look beyond mere information to the social context that creates and gives meaning to it. Arguing elegantly for the important role that human sociability plays, even—perhaps especially—in the digital world, *The Social Life of Information* gives us an optimistic look beyond the simplicities of information and individuals. It shows how a better understanding of the contribution that communities, organizations, and institutions make to learning, working, and innovating can lead to the richest possible use of technology in our work and everyday lives. With a new introduction by David Weinberger and reflections by the authors on developments since the book's first publication, this new edition is essential reading for anyone seeking to understand the human place in a digital world.
