This book introduces students to the chief disciplines, methods and sources employed in 'doing' ancient history, as opposed to 'reading' it. The book: Encourages readers to engage with historical sources, rather than to be passive recipients of historical tales Gives readers a sense of the nature of evidence and its use in the reconstruction of the past Helps them to read a historical narrative with more critical appreciation Encourages them to consider the differences between their own experience of ancient sources, and the use of these objects within the everyday life of ancient society A concise bibliographical essay at the end of each chapter refers to introductions, indices, research tools and interpretations, and explains scholarly jargon Written clearly, concisely and concretely, invoking ancient illustrations and modern parallels as appropriate.

*Famous Figures of Ancient Times* PapermakingThe History and Technique of an Ancient Craft Ancient Persia in Western History is a measured rejoinder to the dominant narrative that considers the Graeco-Persian Wars to be merely the first round of an oft-repeated battle between the despotic 'East' and the broadly enlightened 'West'. Sasan Samiei analyses the historiography which has skewed our understanding of this crucial era - contrasting the work of Edward Gibbon and Goethe, which venerated Classicism and Hellenistic history, with later writers such as John Linton Myres. Finally, Samiei explores the cross-cultural encounters which constituted the Achaemenid period itself, and repositions it as essential to the history of Europe, Asia and the Middle East.

This book is a comprehensive illustrated account of the technologies and inventions in mass communication that have accelerated the advancement of human culture and society. A History of Communication Technology covers a timeline in the history of mass communication that begins with human prehistory and extends all the way to the current digital age. Using rich, full-color graphics and diagrams, the book details the workings of various mass communication inventions, from paper-making, printing presses, photography, radio, TV, film, and video, to computers, digital devices, and the Internet. Readers are given insightful narratives on the social impact of these technologies, brief historical accounts of the inventors, and sidebars on the related technologies that enabled these inventions. This book is ideal for students in introductory mass communication, visual communication, and history of media courses, offering a highly approachable, graphic-oriented approach to the history of communication technologies.

The use and feasibility of ancient history, and more specifically ancient Mediterranean history, in social studies curriculum, has been a point of contention in curriculum and instruction academia across the nation. The purpose of history education, as dictated by federal and state standards, is to develop students' higher-order thinking skills. Frequently, these state standards exclude ancient history content from the curriculum requirements in favor of a more modern focus (Pennsylvania Dept. of Ed., 2002). This paper examines the ability of ancient Mediterranean content to meet the developmental objectives set forth by the Pennsylvania Department of Education's Academic Standards for History (Pennsylvania Dept. of Ed., 2002). Through a comparative analysis between the state standard statements outlined in section 8.1.12 and anecdotal case studies of three ancient regions (Greece, Rome, and the Ancient Near East), this paper will explore the feasibility of ancient history aiding in high school students' historical analysis and thinking skills.

In China the tradition of a book society is longer than anywhere else in the world. Chinese paper making, calligraphy and woodblock printing date from very early ages, but have for a very long time remained almost unknown to the Western world. At the IFLA satellite meeting "Chinese Written and Printed Cultural Heritage and Library Work" in Hangzhou in 2006 the richness of present day book

historical research and library activities in China has been presented by more than sixty papers. This fine selection reflects the width and depth of this extremely important and immense Chinese heritage.

Livy (c. 59 BC-AD 17) dedicated most of his life to writing some 142 volumes of history, the first five of which comprise The Early History of Rome. With stylistic brilliance, he chronicles nearly 400 years of history, from the founding of Rome (traditionally dated to 757 BC) to the Gallic invasion in 386 BC - an era which witnessed the reign of seven kings, the establishment of the Republic, civil strife and brutal conflict. Bringing compelling characters to life, and re-presenting familiar tales - including the tragedy of Coriolanus and the story of Romulus and Remus - The Early History is a truly epic work, and a passionate warning that Rome should learn from its history.

**Hellenism and the Representation of the Achaemenid Empire** Routledge

This book presents a complete and accessible description of the history of early India. It starts by discussing the origins and growth of civilizations, empires, and religions. It also deals with the geographical, ecological, and linguistic backgrounds, and looks at specific cultures of the Neolithic, Chalcolithic, and Vedic periods, as well as at the Harappan civilization. In addition, the rise of Jainism and Buddhism, Magadha and the beginning of territorial states, and the period of Mauryas, Central Asian countries, Satvahanas, Guptas, and Harshavardhana are also analysed. Next, it stresses varna system, urbanization, commerce and trade, developments in science and philosophy, and cultural legacy. Finally, the process of transition from ancient to medieval India and the origin of the Aryan culture has also been examined.

This textbook is endorsed by OCR and supports the specification for GCSE Ancient History (first teaching September 2017). It covers the whole of Component 2, both the compulsory longer Period Study and the three optional Depth Studies: Longer Period Study: The Foundations of Rome: From Kingship to Republic, 753-440 BC by Paul Fowler Depth Study: Hannibal and the Second Punic War, 218-201 BC by Paul Fowler Depth Study: Cleopatra: Rome And Egypt, 69-30 BC by James Melville Depth Study: Britannia: From Conquest to Province, AD 43-c. 84 by Christopher Grocock How did reactions to the exploitation of women and the poor make Rome great? How did Rome survive a fourteen-year invasion? Was Cleopatra a great queen? What was the impact of Roman invasion on Britain's diverse and prosperous culture? This book raises these and other key questions. GCSE students and their teachers will explore the foundation of Rome, the rise of its empire, and its interactions with neighbouring cultures, through the eyes of its historians and archaeology. This book invites us to look at Ancient Rome and the modern world in a new light. The ideal preparation for the final examinations, all content is presented by experts and experienced teachers in a clear

and accessible narrative. Ancient literary and visual sources are described and analysed, with supporting images. Helpful student features include study questions, further reading, and boxes focusing in on key people, events and terms. Practice questions and exam guidance prepare students for assessment. Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the Why Study series comes in. This series of books, aimed at students, parents and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not.

The classic work on papermaking, this book traces the craft's history from its invention in China to its introductions in Europe and America. The foremost authority on the subject covers tools and materials; hand moulds; pressing, drying, and sizing; hand- and machine-made paper; watermarking; and more. Over 320 illustrations. Reprint of the second, revised, and enlarged 1947 edition.

*Why Study History?* Cambridge University Press

Challenging both traditional and fashionable theories, this collection of pieces from an international range of contributors explores the separation of the human past into history, archaeology and their related sub-disciplines. Each case study challenges the validity of this separation and asks how we can move to a more holistic approach in the study of the relationship between history and archaeology. While the focus is on the ancient world, particularly Greece and Rome, the lessons learned in this book make it an essential addition to all studies of history and archaeology.

An international team of historians, archaeologists and biblical scholars discuss new perspectives on the archaeology, history and biblical traditions of ancient Jerusalem and examine their ethical, literary, historical and theological relationships. Essays range from a discussion of the Hellenization of Jerusalem in the time of Herod to an examination of its identity and myth on the Internet, while Thomas L. Thompson's informed Introduction queries whether a true history of ancient Jerusalem and Palestine can in fact ever be written. Contributors include: Thomas L. Thompson, Michael Prior,

Niels Peter Lemche, Margreet Steiner, Sara Mandell, John Strange, Firas Sawwah, Lester Grabbe, Philip Davies, Thomas M. Bolin, Ingrid Hjelm, David Gunn and Keith Whitelam.
