When monsters appear on Earth, Maggie MacKay is on the job. No one is better at hauling the creepy crawlies back where they belong. No one, that is, except Maggie's dad, who vanished in the middle of an assignment. Now, an elf named Killian has shown up with a gig. Seems Maggie's uncle teamed up with the forces of dark to turn Earth into a vampire convenience store, serving

bottomless refills on humans. Ah, family... The only hope for survival lies in tracking down two magical artifacts and a secret that disappeared with Maggie's dad. WARNING: This book contains cussing, brawling, and unladylike behavior. Proceed with caution.

"Classic Moggach: readable, memorable . . . an unashamedly colorful journey across continents, with clothes, food, landscapes brought joyously to life." —The Times (London) "Nobody in the world knows our secret . . . that I've ruined Bev's life, and she's ruined mine." Petra's romantic life has always been a car crash, and even in her sixties she's still getting it disastrously wrong.

And then she falls in love with Jeremy, an old friend visiting from abroad. There's just one catch: Jeremy is married to her best friend, Bev. Meanwhile, on opposite sides of the world, two other women are also struggling with the weight of betrayal: Lorrie, a Texan, is about to embark on the biggest deception of her life, and in China, Li Jing is trying to understand exactly what it is her husband does on his business trips. It turns out that no matter where you are in the world or how well you think you know the one you love, everyone has secrets.

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the *European Journal of Social Work*.

Author Ned Mohan has been a leader in EES education and research for decades. His three-book series on Power Electronics

focuses on three essential topics in the power sequence based on applications relevant to this age of sustainable energy such as wind turbines and hybrid electric vehicles. The three topics include power electronics, power systems and electric machines. Key features in the first Edition build on Mohan's successful MNPERS texts; his systems approach which puts dry technical detail in the context of applications; and substantial pedagogical support including PPT's, video clips, animations, clicker questions and a lab manual. It follows a top-down systems-level approach to power electronics to highlight interrelationships between these sub-fields. It's intended to cover fundamental and practical design. This book also follows a building-block approach to power electronics that allows an in-depth discussion of several important topics that are usually left. Topics are carefully sequenced to maintain continuity and interest.

The story of the Special Forces in World War II has never fully been told before. Information about them began to be declassified only in the 1980s. Known as the Jedburghs, these Special Forces were selected from members of the British, American, and Free French armies to be dropped in teams of three deep behind German lines. There, in preparation for D-Day, they carried out what we now know as unconventional warfare: supporting the French Resistance in guerrilla attacks, supply-route disruption, and the harassment and obstruction of German reinforcements. Always, they operated against extraordinary odds. They had to be prepared to survive pitched battles with German troops and Gestapo manhunts for weeks and months while awaiting the arrival of Allied ground forces. They were, in

short, heroes. The Jedburghs finally tell their story and offer a new perspective on D-Day itself. Will Irwin has selected seven of the Jedburgh teams and told their stories as gripping personal narratives. He has gathered archival documents, diaries and correspondence, and interviewed Jed veterans and family members in order to present this portrait of their crucial role - a role recognized by Churchill and Eisenhower - in the struggle to liberate Europe in 1944-45. This is narrative history at its most compelling; a vivid drama of the battle for France from deep behind enemy lines.

[A Directory for Writers, Artists, Playwrights, Designers, Illustrators and Photographers](#) Thomson Brooks/Cole

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical

attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

The 1619 Project illuminated the ways in which every aspect of life in the United States was and is shaped by the existence of slavery. *Black Ghost of Empire* focuses on emancipation and how this opportunity to make right further codified the racial caste system—instead of obliterating it. To understand why the shadow of slavery still haunts society today, we must not only look at what slavery was, but also the unfinished way it ended. One may think of “emancipation” as a finale, leading to a new age of human rights and universal freedoms. But in reality, emancipations everywhere were incomplete. In *Black Ghost of Empire*, acclaimed historian and professor Kris Manjapra identifies five types of emancipation—explaining them in chronological order—along with the lasting impact these transitions had on formerly enslaved groups around the Atlantic. Beginning in 1770s and concluding in 1880s, different kinds of emancipation processes took place across the Atlantic world. These included the Gradual Emancipations of North America, the Revolutionary Emancipation of Haiti, the Compensated Emancipations of European overseas empires, the War Emancipation of the American South, and the Conquest Emancipations that swept across Sub-Saharan Africa. Tragically, despite a century of abolitions and emancipations, systems of social bondage persisted and reconfigured. We still live with

these unfinished endings today. In practice, all the slavery emancipations that have ever taken place reenacted racial violence against Black communities, and reaffirmed commitment to white supremacy. The devil lurked in the details of the five emancipation processes, none of which required atonement for wrongs committed, or restorative justice for the people harmed. *Manjapra* shows how, amidst this unfinished history, grassroots Black organizers and activists have become custodians of collective recovery and remedy; not only for our present, but also for our relationship with the past. Timely, lucid, and crucial to our understanding of the ongoing “anti-mattering” of Black people, *Black Ghost of Empire* shines a light into the deep gap between the idea of slavery’s end and its actual perpetuation in various forms—exposing the shadows that linger to this day.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. Semiotics of Poetry HarperCollins

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall

of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Jean-Jacques Sempe's witty drawings and keen eye for the finer points of the human condition have delighted readers in France and beyond for over forty years. Now, his sharply observed and beautifully drawn cartoons are available in English for the first time. 'Nothing is Simple' is classic Sempe - a timeless mix of tender moments and absurd situations. Sempe's world is populated by nosy neighbours, mischievous schoolboys and thwarted lovers, by snooty holidaymakers and crowds of frustrated commuters in the big city. Sempe's inimitable drawings are as fresh, engaging and funny today as when they were first published in 1962. The captions were translated by Anthea Bell, who also helped to bring Asterix the Gaul to the English-speaking world.
