This study examines not only the objects and processes that make up the artworlds of human history, but also the social and cultural circumstances, the historicised contexts that bring about their making, frame their functioning, inform their properties and influence their effects, both at the time of their creation and throughout their subsequent biographies. In the short span that "art" has played a part in human life, one may conceive of time as a social river, with a strong current towards the capricious mainstream, and eddies and quiet pools near the banks. The current will flow faster in spate and slower in drought. But it will be forever in motion. It will be unpredictable. Nothing will stop its inexorable force. Art runs in that social river, subject to the flow and chance of time.

Written 100 years ago, *The Art Spirit* by Robert Henri is most influential book for artists, and especially American artists. It still remains one of the best selling books on art and creativity, and it

attracts new readers with every generation. Henri with the assistance of Margery Ryerson prepared this book from four decades of his lecture notes and hundreds of letters to students and friends. *The Art Spirit* deserves to be in every artist's library. Although Henri offers practical advice on painting, the book is not just about how to do art, but how to become an artist. For Henri, there was no greater human ambition than to be an artist. Although Henri's own life was not without challenges, especially financial ones, he does not dwell on his personal adversities. The book is a glorification of the artist's life, and how mundane difficulties pale to the joys of the artistic life. *The Art Spirit* provides insights into the mind of one of America's most influential artists and teachers, and the reader-artist comes away with an uplifting sense in what it means to be a part of the great "Brotherhood" of art. One of the problems of the original edition was that Henri was a frequent name-dropper. In this new edition, names and terms are annotated along with illustrations, making the read more informative and enjoyable. It is the best of *The Art Spirit* reprints.

What is art? What is it to understand a work of art? What is the value of art? Robert Stecker seeks to answer these central questions of aesthetics by placing them within the context of an ongoing debate criticizing, but also explaining what can be learned from, alternative views. His unified philosophy of art, defined in terms of its evolving functions, is used to explain and to justify current interpretive practices and to motivate an investigation of artistic value. Stecker defines art (roughly) as an item that is an artwork at time *t* if and only if it is in one of the central art forms at *t* and is intended to fulfill a function art has at *t*, or it is an artifact that achieves excellence in fulfilling such a function. Further, he sees the standard of acceptability for interpretations of artworks to be relative to their aim. Finally, he tries to understand the value of artworks through an analysis of literature and the identification of the most important functions of literary works. In addition to offering original answers to major questions of aesthetics, *Artworks* covers most of the major issues in contemporary analytic aesthetics and discusses many major, as well as many minor, figures who have written about these issues, including Stanley Fish, Joseph Margolis, Richard Rorty, and Richard Shusterman.

The present book is a tool for the teaching of the liberal arts in high school, or in the freshman year

of college for those students whose high school studies were inadequate. It is intended to be at once a handbook and a textbook. As a handbook it should be used by the student throughout his four years in high school in every course. Every teacher in the school should insist that in each subject of the curriculum the processes of definition, statement, and argumentation outlined here should be exactly practiced in the student's reading recitation, discussion, and examination for that subject. In this way the transfer of training can be made explicit and effective. On the other hand this work is also a textbook to assist in the learning of these logical processes. The most appropriate place for its use is in the customary English courses. Here it will not replace the customary material but it will serve as a guide for teacher and student in using material to develop the liberal arts.

Hearings, Reports and Prints of the House Committee on Education and Labor Penguin Celebrating Marcel Duchamp's revolutionary contributions to modern art, this innovative exploration of the Stuttgart Duchamp Collection and the Archive of Serge Stauffer offers new insights into both artists' philosophies. As the inventor of the Readymade and a founder of conceptual art, Marcel Duchamp's work is still provoking important discussions about what defines art. Accompanying the first exhibition of the important Stuttgart Duchamp Collection, this book also presents the work of the Swiss artist and educator Serge Stauffer and his renowned research on Duchamp's art and writings. The series of 100 questions Stauffer wrote to the French artist in 1960-and Duchamp's answers-provide important insights into Duchamp's intellectual and creative practice and bear witness to the depth of Stauffer's exceptional research. This book opens with an introduction to the relationship between Duchamp and Stauffer. It features brilliant reproductions of Duchamp's most renowned works, including *Bottlerack*, the painting study for *Chocolate Grinder, No 2*, and the window object *La Bagarre d'Austerlitz*. A biographical essay on both Duchamp and Stauffer provides important background to understanding the exceptional relationship between both artists.
