The I, Claudius author's

"lightning sharp

interpretations and

insights . . . are here

brought to bear with

equal effectiveness on the

Book of Genesis" (Kirkus

Reviews). This is a

comprehensive look at the

stories that make up the

Old Testament and the

Jewish religion, including the folk tales, apocryphal texts, midrashes, and other little-known

documents that the Old Testament and the Torah do not include. In this

exhaustive study, Robert

Graves provides a

fascinating account of

pre-Biblical texts that

have been censored,

suppressed, and hidden

for centuries, and which

now emerge to give us a

clearer view of Hebrew

myth and religion than

ever. Venerable classicist

and historian Robert

Graves recounts the

ancient Hebrew stories,

both obscure and familiar,

with a rich sense of

storytelling, culture, and

spirituality. This book is

sure to be riveting to

students of Jewish or

Judeo-Christian history,

culture, and religion.

### The Kanak Apple

**Season** Routledge

How has reason, believed

since the Enlightenment

to be the ally of freedom

in the search for a better,

more humanly satisfying

world, been reduced to a

technical rationality that

has actually impoverished

the bases of human

freedom? What might be

the options and

obligations for sociologists

who wish to restore

reason to its proper

status? Working within

the tradition of C. Wright

Mills and Jurgen

Habermas, Frank Hearn

sets out to answer these

questions. He surveys the

treatment of the relation

between reason and

freedom in both the

classical tradition

(especially the writings of

Saint-Simon, Comte,

Durkheim, Marx, Weber,

and Freud) and an

increasingly significant

segment of social thought

and criticism (and, for

example, in the

contrasting visions of

Daniel Bell and

Christopher Lasch.) He

then analyses both the

concrete social and

historical forms of

expression taken by what

Mills calls 'rationality

without reason' and their

impact on individual

autonomy and the

freedoms associated with

democratic politics.

Finally, he develops Mills's

and Habermas's claims

that the cultivation of

democratic publics and a

critical social theory

committed to a vibrant

public life are

indispensable to the

protection and

revitalization of the values

of reason and freedom

and of the practices they

entail. This book updates

and enriches Mills's

influential argument by

demonstrating its affinity

with critical theory, by showing its contributions to a critical understanding of the classical tradition, and by showing its implications for contemporary social, political, and economic developments.

"There is no one quite like Barbara Kingsolver in contemporary literature," raves the Washington Post Book World, and it is right. She has been nominated three times for the ABBY award, and her critically acclaimed writings consistently enjoy spectacular commercial success as they entertain and touch her legions of loyal fans. In *High Tide* in Tucson, she returns to her familiar themes of family, community, the common good and the natural world. The title essay considers Buster, a hermit crab that accidentally

stows away on Kingsolver's return trip from the Bahamas to her desert home, and turns out to have manic-depressive tendencies. Buster is running around for all he's worth -- one can only presume it's high tide in Tucson. Kingsolver brings a moral vision and refreshing sense of humor to subjects ranging from modern motherhood to the history of private property to the suspended citizenship of human beings in the Animal Kingdom. Beautifully packaged, with original illustrations by well-known illustrator Paul Mirocha, these wise lessons on the urgent business of being alive make it a perfect gift for Kingsolver's many fans.

In this comprehensive study of the Modern School movement, Paul Avrich narrates its history, analyzes its successes and failures, and assesses its place in American life. In doing so, he shows how the radical experimentation in art and communal living as well as in education during this period set the precedent for much of the artistic, social, and educational ferment of

the 1960's and 1970's. Originally published in 1980. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*The Traitor* follows the story of John Graham, a renowned lawyer serving as the Ku Klux Klan's North Carolina Grand Dragon. The story opens with the readers encountering the drunk hero contemplating revenge. After being disbarred and turned out of his family home by the corrupt Republican Judge, Graham seeks personal and legal reparations, only to find himself enchanted with the Judge's charming daughter, Stella. In a reaction to Graham's threats against him, the

enraged Judge summons federal armies to round up the Klan members. When Graham recognizes that the strong "Invisible Empire" now faces danger in the form of government prosecution, he calls one final march and meeting. The fate of the Klan unfolds later in the story. It is a story of the American South set in the years after the Civil War, told from a white point of view. Dixon offers a portrait of the Ku Klux Klan, an organization that was, according to him, created in desperation to rescue southern civilization. Participating in the gothic tradition, this work contains folk legends, tales of haunted houses and secret passageways, and rumored generational madness as part of its interesting story.

Hal Leonard Corporation  
One of Slate's 10 Best Books of the Year Anthony Gottlieb's landmark *The Dream of Reason* and its sequel challenge Bertrand Russell's classic as the definitive history of Western philosophy. Western philosophy is now two and a half millennia old, but much of it came in just two staccato bursts, each lasting only about 150 years. In his landmark survey of Western philosophy from the Greeks to the Renaissance, *The Dream of Reason*, Anthony Gottlieb documented the first burst, which came in the Athens of Socrates, Plato, and Aristotle. Now, in his sequel, *The Dream of Enlightenment*, Gottlieb expertly navigates a second great explosion of thought, taking us to northern Europe in the wake of its wars of religion and the rise of Galilean science. In a relatively short period—from the early 1640s to the eve of the French Revolution—Descartes, Hobbes, Spinoza, Locke, Leibniz, and Hume all

made their mark. *The Dream of Enlightenment* tells their story and that of the birth of modern philosophy. As Gottlieb explains, all these men were amateurs: none had much to do with any university. They tried to fathom the implications of the new science and of religious upheaval, which led them to question traditional teachings and attitudes. What does the advance of science entail for our understanding of ourselves and for our ideas of God? How should a government deal with religious diversity—and what, actually, is government for? Such questions remain our questions, which is why Descartes, Hobbes, and the others are still pondered today. Yet it is because we still want to hear them that we can easily get these philosophers wrong. It is tempting to think they speak our language and live in our world; but to understand them properly, we must step back into their shoes. Gottlieb puts readers in the minds of these frequently misinterpreted figures, elucidating the history of their times and the development of scientific ideas while engagingly explaining

their arguments and assessing their legacy in lively prose. With chapters focusing on Descartes, Hobbes, Spinoza, Locke, Pierre Bayle, Leibniz, Hume, Rousseau, and Voltaire—and many walk-on parts—The Dream of Enlightenment creates a sweeping account of what the Enlightenment amounted to, and why we

are still in its debt. *The Best Classic Rock Songs Ever* Princeton University Press (Keyboard Recorded Versions). This terrific collection features 20 of Elton John's best songs: Bennie and the Jets \* Candle in the Wind \* Crocodile Rock \* Daniel \* Don't Go Breaking My

Heart \* Goodbye Yellow Brick Road \* Honky Cat \* Rocket Man \* Tiny Dancer \* and more.
