In de universitaire wereld staat kennis centraal. Die wordt doorgegeven, maar ook in vraag gesteld. Dankzij creatief wetenschappelijk onderzoek verleggen kennisgrenzen zich voortdurend. De impact van de academische wereld op

maatschappelijke domeinen zoals de technologie, de industrie, de economie en de medische sector kan niet overschat worden. Om deze belangrijke maatschappelijke functie te blijven vervullen, heeft de moderne universiteit zich ontpopt tot een dynamische en ondernemende instelling. Vertrekkend vanuit zijn persoonlijke ervaring en kennis van het innovatielands

chap in België heeft Jos Bouckaert de ontwikkeling van de ondernemende onderzoeksuniversiteit beschreven. Elke fase is opgevat als merksteen, een cruciale stap in een groter verhaal. In dit lijvige werk schetst Bouckaert hoe in de tweede helft van de 20e eeuw een unieke constellatie van politici, rectoren, ondernemers, filantropen en vooral wetenschappers de basis

legde van de huidige kenniseconomie in België. Met de postume uitgave van dit levenswerk brengen collega's en vrienden hulde aan Jos Bouckaert. <i>Corporate Venture Capital</i> Kogan Page Publishers Bernhard Kirchmair analyseert originäre Ausgründungen als eine Möglichkeit für Unternehmen, an der Kommerzialisierung von intern nicht verwertbaren Projektergebnissen zu partizipieren. Er reflektiert Erfolg und Erfolgswirkung und leitet konkrete Handlungsempfehlungen ab. <u>Venture Capital Financing Practice in Germany and the UK</u> Routledge The aim of this study is to investigate in the role of Venture Capital in the development of New Technology Based Firms in two countries: USA and Germany. Based on literature review and empirical work issues concerning the extent and stage of financing, the nature of oversight provided by Venture Capitalists and the framework conditions for Venture Capital are subject of investigation. The results have been reflected in a workshop with experts from research, industry and policy.

This reference guide provides a detailed perspective on the investing opportunities in green buildings technologies and services, as well as an indication of the direction of trends in the sector. Significant attention is also given to the companies operating within the sector. *The Power Law* Springer-Verlag "A gripping fly-on-the-wall story of the rise of this unique and important industry based

on extensive interviews with some of the most successful venture capitalists." - Daniel Rasmussen, Wall Street Journal "A must-read for anyone seeking to understand modern-day Silicon Valley and even our economy writ large." - Bethany McLean, The Washington Post "A rare and unsettling look inside a subculture of unparalleled influence." —Jane Mayer "A classic...A book of

exceptional reporting, analysis and storytelling." —Charles Duhigg From the New York Times bestselling author of *More Money Than God* comes the astonishingly frank and intimate story of Silicon Valley's dominant venture-capital firms—and how their strategies and fates have shaped the path of innovation and the global economy. Innovations rarely come

from “experts.” Elon Musk was not an “electric car person” before he started Tesla. When it comes to improbable innovations, a legendary tech VC told Sebastian Mallaby, the future cannot be predicted, it can only be discovered. It is the nature of the venture-capital game that most attempts at discovery fail, but a very few succeed at such a scale that they more than

make up for everything else. That extreme ratio of success and failure is the power law that drives the VC business, all of Silicon Valley, the wider tech sector, and, by extension, the world. In *The Power Law*, Sebastian Mallaby has parlayed unprecedented access to the most celebrated venture capitalists of all time—the key figures at Sequoia, Kleiner Perkins, Accel, Benchmark,

and Andreessen Horowitz, as well as Chinese partnerships such as Qiming and Capital Today—into a riveting blend of storytelling and analysis that unfurls the history of tech incubation, in the Valley and ultimately worldwide. We learn the unvarnished truth, often for the first time, about some of the most iconic triumphs and infamous disasters in Valley history, from the

comedy of errors at the birth of Apple to the avalanche of venture money that fostered hubris at WeWork and Uber. VCs' relentless search for grand slams brews an obsession with the ideal of the lone entrepreneur-genius, and companies seen as potential "unicorns" are given intoxicating amounts of power, with sometimes disastrous results. On a more systemic

level, the need to make outsized bets on unproven talent reinforces bias, with women and minorities still represented at woefully low levels. This does not just have social justice implications: as Mallaby relates, China's homegrown VC sector, having learned at the Valley's feet, is exploding and now has more women VC luminaries than America has ever had. Still, Silicon Valley VC

remains the top incubator of business innovation anywhere—it is not where ideas come from so much as where they go to become the products and companies that create the future. By taking us so deeply into the VCs' game, *The Power Law* helps us think about our own future through their eyes. *Disruption und Transformation*

Veröffentlichungen über

Innovationen gibt es viele. Was fehlt, ist ein Buch, das den Erfinder konkret darin unterstützt, wie er eine Erfindung im Unternehmen kommunizieren muss, um eine möglichst breite Unterstützung dafür zu finden. Dieses Buch schließt diese Lücke. Bernd X. Weis beschreibt den Prozess von der Erfindung zur Innovation und stellt die Kommunikationsmittel vor, die es dem Erfinder, dem Entscheider und dem

Unternehmen ermöglichen, in einer gemeinsamen und für das Unternehmen nützlichen "Sprache" die Erfindung zu bewerten und weiterzuentwickeln. Diese Sprache reflektiert sich in einem auf die Erfindung abgestimmten Geschäftsmodell. Der Autor, selbst Inhaber zahlreicher Patente, stellt die dazu notwendigen Werkzeuge vor und integriert sie in den Zusammenhang des Innovationsprozesses.

Early Stage Investments in New Technology Based Firms - Analyzing the Changing German Landscape of Venture Capital Finance in the Light of Capital Market Theory and New Institutional Economics
Springer
This book presents a balanced, thorough history of television to 1940, considering the factors technical, financial and

social which influenced and led to the establishment of many of the world's high-definition TV broadcasting services. This is a major book in the study of history of science, technology and media. From Idea to Innovation Springer-Verlag Design and execute a powerful startup program that delivers value for all parties involved Startup accelerators. Business incubators.

Hackathons. These are the hallmarks of the innovation ecosystem development practices used to discover, launch, and scale the most forward-looking startups of the last decade. If you want to adopt these approaches to your own business but aren't sure how to implement them, now's the time to master the practices of today's most successful early-stage investors. In Startup Program

Design, two seasoned veterans deeply versed in startup engagement programs provide you with the tools to introduce open innovation practices to your organization. While other books on innovation management tend to be conceptual at the expense of hands-on experience, Startup Program Design is a practical manual vertically focused on preparing the

organization, identifying the right strategy, and designing an attractive and effective offer. Filled with real-world examples, interviews with program managers, lessons learned, and diagrams and canvases that outline a step-by-step logical sequence, Startup Program Design points you toward results that are scalable and repeatable. Whether you're an innovation manager,

executive, consultant, service designer, business owner, or startup community activist, this first-of-its-kind guide offers a radical new framework for true innovation.

Corporate Venture Capital Under the New Business Paradigm FT Press

Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their

automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyre, seats, constant velocity joints

(hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the

book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

Venture

Capital in Germany and the U.S.
GRIN Verlag
Inhaltsangabe:
Abstract: In recent years the issue of early stage investment in new technology based firms has drawn considerable attention. Its relevance emerges from the rise of high technology industries in the global economy. As competition in established, mature industries all over the world is ever increasing, the importance of

keeping up and increasing the speed of innovation to ensure competitiveness of companies and national wealth is widely recognized. Innovation may concern products or processes. It refers to the development of new proprietary knowledge, i. e. technology, which is embodied in marketable products or services. In as far as the added private knowledge increases the utility of a

product to the customers, it adds value. Unless the new features of a product are matched by competitors, a company may earn innovation rents. Thus proprietary knowledge attained through innovation is an important source of strategic advantage. In a competitive, dynamic market, however innovation rents are not sustainable. Competitors will attempt to match and

exceed the innovation advantage. This may be achieved by imitation or by adding other or more innovative features. Whereas following the product life cycle model initial growth may be steep and rents may be high for the first mover, imitators competing on price and other rivals competing on innovations, may inflate the monopolistic power of the proprietary knowledge. Striving to

maintain and increase market shares and profitability, companies thus have a strong incentive to keep innovating. For new technology-based firms the importance of proprietary knowledge is particularly pronounced. These start-ups operate in a hostile competitive environment, characterized by high uncertainty, offering the potential for rapid growth and high

<p>profits on the upside, but also the substantial threat of incurring deep losses on the downside. Whereas large companies generally possess a diversified product portfolio and a host of strategic assets, small companies will need to compete on a single new product or service and the determination of its management team. Politicians, worried by high</p>	<p>unemployment and budget deficits, lately fell in love with the high-technology start-ups for their ability to create jobs and ensure future tax revenues. New technology-based firms are drivers of structural change in the economy in that they are among the first to enter new high growth potential industries. For [...]</p> <p><i>Automotive Global Value Chain</i></p> <p>BoogarLists Diploma</p>	<p>Thesis from the year 1998 in the subject Economics - Finance, grade: 2, University of Paderborn, language: English, abstract: Gegenstand der Arbeit ist die Untersuchung der jüngsten Veränderungen in der institutionellen Mikrostruktur des deutschen Kapitalmarktes, die geeignet sind die Bedingungen für die Versorgung junger Technologieunternehmen mit</p>

<p>Eigenkapital zu verbessern. Behandelt werden insbesondere die Funktionsweise und zunehmende Bedeutung professioneller Venture Capital-Intermediäre und die hierzu komplementäre Rolle des "Neuen Marktes" in Deutschland. Der Autor zeigt, wie die Finanzierung junger Technologieunternehmen durch strukturelle Imperfektionen des Kapitalmarktes in</p>	<p>besonderem Maße beeinträchtigt wird. Unter Berücksichtigung der fundamentalen Aussagen der neoklassischen Kapitalmarkttheorie und der Neuen Institutionenökonomik wird die Hypothese entwickelt, daß die durch die Unvollkommenheit der Märkte bedingten Risikoprämien und Transaktionskosten im Falle von Frühphaseninvestitionen in innovativen</p>	<p>Unternehmen besonders hoch sind. Somit besteht im Falle dieser Investitionen eine erhebliche Spanne zwischen den vom Unternehmer zu tragenden Kapitalkosten und den vom Financier empfangenen Nettoerträgen. Bestimmte Institutionen des Kapitalmarktes, d. h. spezialisierte Intermediäre und regulierte Marktsegmente sind geeignet diese Spanne zwischen Kapitalkosten</p>
--	--	--

und Nettoerträgen zu vermindern, indem nicht-projektinhärente Risiken oder Transaktionskosten reduziert werden. Das für die Investitionsentscheidung maßgebliche Risiko-Rendite-Verhältnis einer Investition wird somit durch institutionelle Rahmenbedingungen erheblich beeinflusst. Der Autor diskutiert vor diesem theoretischen	Hintergrund umfassend die konkreten Veränderungen des deutschen Venture-Capital-Marktes in der jüngsten Zeit und entwirft verschiedene Szenarien für dessen zukünftige Entwicklung. Keywords: Venture Capital, Neuer Markt, Unternehmensgründung, Innovationsmanagement <u>The West German Venture Capital Market</u> Schäffer-Poeschel The dissertation	makes contributions to both real options and entrepreneurship. The analysis helps us better understand corporate entrepreneurial investment decisions and has business policy implications. <i>Praxishandbuch Industrie 4.0</i> Routledge Eintritt der Industrie in eine zweite Phase der Digitalisierung : Produktion und modernste Informations- und Kommunikationstechnik verzahnen

sich. Die Art und Weise, wie zukünftig produziert und gearbeitet wird, verändert sich nachhaltig: intelligente Fabriken bestimmen die vierte industrielle Revolution. Das Buch liefert eine Rundum-Schau: es beleuchtet Herausforderungen von Industrie 4.0 und Big Data für die verschiedenen Branchen und zeigt Entwicklungen und Perspektiven für die Einzelunterne

hmen auf. Zahlreiche Lösungsbeispiele führender Unternehmen zeigen wie die Digitalisierung der industriellen Produktion praktisch und erfolgreich gemeistert werden kann.

Venture Clienting

Springer Science & Business Media
The book assists in bringing together the three stakeholders of an innovation – inventor, decision maker and organization.

These stakeholders have conflicting requirements and the book offers advice on how and by what methods they can communicate and the information that is expected and required in different phases of innovation. The perspectives of inventor, decision maker and organization are integrated in a business model that enables a common “language” and

communication platform for the inevitably emerging tension field and that allows for asking and answering the right questions.

Television
Harriman House Limited Electric propulsion for boats was developed in the early 19th century and—despite the advent of the internal combustion

engine—continued with the perfecting of the modern turbo-electric ship. Sustainable and hybrid technologies, pioneered in small inland watercraft toward the end of the 20th century, have in recent years been scaled up to create integrated electric drives for the largest ocean-going vessels. This comprehensive history traces the birth and rebirth of the electric boat from 1835 to the present,

celebrating the Golden Age of electric launches, 1880–1910.
