"A Book of Dartmoor" by S. Baring-Gould is a captivating exploration of Dartmoor, a region in southwestern England known for its rugged beauty and rich history. Baring-Gould's book provides readers with a comprehensive view of Dartmoor, covering its landscapes, folklore, history, and culture. The narrative immerses readers in the unique character of Dartmoor, making it an essential read for those interested in British landscapes and cultural heritage.

*Emotional Repatterning* Good Press

A part of the "Review of the Adversarial System of Litigation", this Issues Paper focuses on the impact that technology is having, and could have, on costs, delays, fairness and efficiency in the federal civil justice system. The paper asks whether, and in what ways, technological change may enhance public access to, and knowledge of, federal dispute resolution, generate more useful and higher quality information and communication within federal courts and tribunals, and streamline and automate litigation and review, and case management practices.

First coined by Stanley Cohen in 1972, 'moral panic' is a key term in media studies, used to refer to sudden eruptions of indignant concern about social issues. An occurrence of moral panic is characterised by stylized and stereotypical representation by the mass media, and a tendency for those in power to claim the moral high ground and pronounce judgement. In this important book, Chas Critcher brings together essential readings on moral panics, which he contextualises in the light of moral panic scholarship through an editor's introduction and concise section introductions. The first section discusses moral panic models, and includes contributions on the history and intellectual background of the concept. Differences in thinking between British and

American moral panic scholarship are also examined. A second section features important case studies, including AIDS, Satanism, drugs, paedophilia and asylum seekers. This is followed by readings that look at themes such as the importance of language, rhetoric and discourse; the dynamics of media reporting and how it affects public opinion; and the idea of the "risk society". Finally, readings critique and debate the use and relevance of moral panic models. *Critical Readings: Moral Panics And The Media* is a valuable resource for students and researchers in media studies, criminology and sociology. Essays by: David L. Altheide, Nachman Ben-Yehuda, Joel Best, Theodore Chiricos, John Clarke, Stan Cohen, Chas Critcher, Mary deYoung, Julie Dickinson, Erich Goode, Johanna Habermeier, Stuart Hall, Sean P. According to reports in the literature, despite the severe disruption of carpal anatomy, fracture-dislocations of the wrist are missed on clinical and radiographic examination in a high percentage of cases. Orthopedic surgeons' lack of familiarity with these injuries is one of the factors contributing to failed or delayed diagnosis. This richly illustrated book covers all types of wrist dislocation and fracture-dislocation. Detailed information is provided on anatomy and biomechanics, while terminology and

classification of injuries are explained. Treatment options are thoroughly analysed, with special emphasis on surgical treatment, which is presented step by step. All of the figures - radiological and surgical - relate to patients treated by the author himself. Most of the cases are from the Red Cross Hospital of Athens that admits many patients with such injuries, in part through referral from other centres due to the author's acknowledged expertise in the field. This volume, with its highly informative and up-to-date chapters and reviews, and a wealth of color figures, will be of great practical value for clinicians and residents in orthopedic surgery, who assist them in daily decision making.

So swift is the action, so involved the situations, so rib-tickling the plot in this London hit that at its finish audiences are left as exhausted from laughter as though they had run a foot race. Galloping in and out of the four doors of an English vicarage are an American actor and actress (he is now stationed with the Air Force in England), a cockney maid who has seen too many American movies, an old maid who "touches alcohol for the first time in her life," four men in clergyman suits presenting the problem of which is which (for disguised as one is an escaped prisoner), and a sedate Bishop aghast at all these goings-on and the trumped up stories they tell him. --

Australia is presently seeking to streamline its civil justice system. It is popular folklore that the Australian civil justice system is inaccessible to 'ordinary people' as it is expensive, slow and complex. The reasons for these alleged failings are attributed to various causes, such as arcane and inefficient judicial practices, money-hungry lawyers or, more fundamentally, to the very underpinnings of civil litigation - adversarialism. This volume confronts this folklore. It provides perspectives about civil justice from its major user and funding source (government) and the group of Australians who have used it the least and feel most alienated from the system (indigenous Australians). It explores the insights of those who work with adversarialism day in and day out (judges and lawyers) and reveals both defenders and strident advocates for change. Finally, it steps back and gives an outsider's view of Australian adversarialism from those with knowledge of a sister system in the United States.

*The Politics of Media Policy* John Hunt Publishing

The Politics of Media Policy provides a critical perspective on the dynamics of media policy in the US and UK and offers a comprehensive guide to some of the major points of debate in the media today. While many policymakers boast of the openness and pluralism of their media systems, this book exposes the commitment to market principles that saturates the media policy environment and distorts the development and application of democratic media policies. Based on interviews with dozens of politicians, regulators, special advisers, lobbyists and campaigners, The Politics of Media Policy considers how governments, civil servants and media corporations have shaped the drawing up of rules concerning a range of issues including: Media ownership Media content Public broadcasting Digital television Copyright Trade agreements affecting the media industries. The book identifies both the institutions and the arguments that dominate the development of these crucial media policies. It will be of interest to public policy and media professionals, researchers, activists and students indeed all those determined to understand and respond to the impact of neo-liberalism on the contemporary world.

Most people have heard of the terms 'soul mate' and 'twin soul'. What most people may not yet know is that the concept of soul mate refers to a consciousness realm that is about to completely disappear from the Earth in order to be replaced by the purer and more powerful spirit energy. This is creating great changes in consciousness on Earth and it also means that we humans finally have the opportunity to join together with our spirit mate. In this book the co-authors and spirit mate couple Anni and Carsten Sennov describe with love and insight the different paths and circumstances that can lead you to your spirit mate.

This history of the free flow of information begins with an examination of the role and responsibility of international information and permissible restraints on freedom in a free society. The author traces the development of freedom of expression, examines its applicability to international information and the evolution of its fundamental principles in the United Nations. He also analyzes the problems and challenges this freedom poses to societies, and the validity of criticisms against prevailing information structures. He concludes with practical

steps the United States could take to establish a new paradigm of free flow of information. These recommendations seek to draw a delicate balance between fundamental libertarian principles, societal concerns, and global realities. ISBN 0-313-25235-1 : \$32.95.

Kyle Lynch believes in true love. The summer of 1997 and everything has turned to shit. School is over and every person Kyle knows is going out into the new world. Like a group of Columbus searching for their own new definition. One in which truth, justice, and love all co-exists amongst that which is modern American society. Its 221 years of propaganda, 70 years since the lost generation, 35 years since the beats, and everything else in between. One can only figure it out for himself. So Kyle sets out first to find himself and then to find something to live for. The search for Mr. Cassady and guy named Raul. An idealist with no actual intellect but a genuine heart Kyle travels from L.A., to home, back to L.A., and then upon a road trip that leads nowhere except into the very depths of his own mind. Kyle: When you sit down and take a look back at yourself sometimes the initial image is quite appealing. Filled with ideals, convictions, beliefs, and a knack for excitement. You or in the case of myself you lament the good times past. That hot red head in San Diego that could suck a dick like it had been her pacifier all her life. Its all glitz and glamour. Looking back you feel old and haggard. Tired and unfulfilled so you lunge harder into your new life that cant by any means live up to the life youve already lived. Its always the search. Life has to be lived, and level, by level we search to grow. Following the rutted path makes no sense when only the exploration means anything. So we embark with no map, and no star to guide us through our travails. No understanding of love. No understanding of right. No wrong. Just life. Left or right... no middle? And so it begins...

*A Signaller's War* Springer Science & Business Media

This classic textbook, written by distinguished academics from around the world, has now reached its third edition. It provides an invaluable guided tour through key areas: theories of media and society; studies of media organization; and studies of media, culture, and ideology. Critical overviews are combined with original case studies. To keep pace with the rapidly change field, the majority of essays in this third edition are new. These include

overviews of media and society from the perspectives of class, gender, and ethnicity that plug media studies into new developments in the social sciences. This new edition also includes essays focusing on changes in the media: the emergence of the Internet, the fragmentation of political communications, and the rise of globalization.

As the First World War roared into its second year, 17-year-old Lawrence Ellis marched into his recruitment office and signed up, eager to fight for King and Country. Underage, as so many were, it wasn't until he had cut his teeth in the Royal Field Artillery that Ellis joined the Corps of Royal Signallers. It was some years after the war, however, that the private began to commit his memories to art and words. A Signaller's War includes a poignant selection of Ellis' images, portraying the conditions, experiences and hopes of the common soldier in the trenches of the Western Front. Often humorous, sometimes horrific, always honest, this collection is a unique insight into the life of a young volunteer who grows from a boy to a man during his service, after witnessing the aftermath of the Somme and action at Cambrai. He was not a trained artist, writer or diarist, yet his work demonstrates a skill and sensitivity that will leave the reader breathless.

*The Vicar of Morwenstow* Hodder Education

Discover "how good teachers across America have been forced to use controversial, non-academic methodology in their classrooms; how "school choice" is being used to further dangerous reform goals, and how home schooling and private education are especially vulnerable; how workforce training (school-to-work) is an essential part of an overall plan for a global economy, and how this plan will shortcircuit your child's future career plans and opportunities; and how the international, national, regional, state and local agendas for education reform are all interconnected and have been for decades. The deliberate dumbing down of America is a chronological history of the past 100+ years of education reform. Each chapter takes a period of history and recounts the significant events, including important geopolitical and societal contextual information. Citations from government plans, policy documents, and key writings by leading reformers record the rise of the modern education reform movement.

This book is about water - in Britain, and in the world. It is about water resources, their conservation, protection of water quality for human consumption and aquatic ecosystems. Since the publication of the first edition in 1998, major political and regulatory changes have taken place; this book provides a clear and comprehensive update of conservation and water resource management issues in the UK over the past two decades, and - in an expansion of its original UK perspective - now includes examples of global best practice. The UK's 2003 adoption of the EU Water Framework Directive has had enormous implications for the conservation and management of our water resources. In 2016, with the UK's decision to leave the EU, the governance scene is entering upon an unpredictable future regarding its major water resource policies. The Protection and Conservation of Water Resources, Second edition provides a clear and

comprehensive update of conservation and water resource management issues. Chapter 1 deals with sustainability and water policy, outlines the issues and challenges, and asks: what is integrated water management? Chapter 2 reviews water availability and sufficiency in Britain, while Chapter 3 explores the dynamic between institutions and legislative framework. Chapter 4 introduces the catchment approach, and chapters 5 and 6 explore the issues of sustaining bulk supply and the imperatives of climate change. Chapter 7 looks at the contemporary background to water quality issues, and Chapter 8 provides case studies of catchment problems, both urban and rural. Chapter 9 describes solutions in land use change, including technical fixes and their sustainability. Chapter 10 is concerned with emerging governance arrangements, and Chapter 11 takes a global view, looking at successful examples around the world to find positive lessons from Europe, north America and Australia.
