The major religions of the world are a mystery to many high school teens. Now you can help them unlock the doors of these traditions with our new text, *World Religions: A Voyage of Discovery*. The book is an introductory survey that helps eleventh and twelfth graders understand the people, dimensions, and religious principles of the world's major religions.

The textbook includes a chapter on each of eleven major world religions, including Christianity, Islam, Hinduism, Buddhism, Judaism, and others. The text offers the Catholic perspective on interreligious dialogue, an overview of basic questions that religions address, and Ninian Smart's seven dimensions of religion. A glossary and word pronunciations in each chapter help students learn unfamiliar terms. In addition, the second edition of this text incorporates the following new features: a new chapter on modern trends in religion; new, more detailed maps; a new section on the Aztec religion of Mesoamerica; a

sidebar in each chapter offering examples of the seven dimensions of religion; and review questions at the end of each chapter.

In this fourth edition, Bryan Lawson continues his discussion, trying to

understand how designers think. He does this by mapping out the issues concerned with the design process, with design problems and solutions and design thinking. This edition adds to the previous debates by including a new chapter on 'Design as Conversation' reflecting on how designers, either consciously or unconsciously, monitor, reflect on, control and change their thinking. It also includes a new series of case studies on notable designers including the racing car designer Gordon Murray, product designer James Dyson, and architects such as Edward Cullinan and Glenn Murcott. * A unique look at the psychology of the designer that provides a greater insight to the process of design * 'Demystifies' the complexity of the subject and uncovers new ways that design can be done * Conclusions are drawn from years of research and provide the very latest debate on the subject

Joining Harvey S. Moskowitz and Carl G.

Lindbloom, authors of the first three editions, are two prominent, nationally known planners: David Listokin and Richard Preiss. Attorney Dwight H. Merriam adds legal annotations to almost all 2,276 definitions. These citations from court decisions bridge the gap between land use theory and real world application, bringing a new dimension to this edition. More than 20,000 copies of previous editions were sold over four decades to professionals and government representatives, such as members of planning and zoning boards and municipal governing bodies. This first revision in ten years updates what is widely acknowledged as an essential, standard reference for planners.
