"This issue deals with a number of the salient statistical series which are presented in the report issued by the federal government entitled Social Indicators II, which appear late in 1980. As in previous reports of this kind, the focus is on a number of indicators rather than on a single global indicator" -

"But this book is less concerned with a single utopian dream than with the complex stories of a great number of utopianist realities. It deals with the efforts as much as with the results, investigating the creation of institutions by charting the interaction of the diverse agendas of designers, educationalists, sociologists and politicians, tied, as they were, into each country's own traditions."--BOOK JACKET.
