The Mindful Librarian: Connecting the Practice of Mindfulness to Librarianship explores mindfulness, approaching it in such a way as to relate specifically to the many roles or challenges librarians face. Coinciding with the increased need to juggle a variety of tasks, technologies, ebooks, and databases, the new Association of College & Research Libraries Framework for Information Literacy, and the challenges faced by solo librarians in school libraries which have suffered cutbacks in help in recent years, the time is exactly right for this publication. The authors hope to be helpful in some small way towards improving the joy and quality of life that librarians and library science students experience in their personal lives and jobs. The loftier goal would be to create a new lens from which to view librarianship, having a transformative impact on readers, and opening a new dialog within the profession. The topic of mindfulness is not new; it has been connected to various religious traditions in a wide variety of ways for centuries, most notably Buddhism. In the latter part of the 20th century, however, a secular version was popularized largely by the work of Jon Kabat-Zinn and his work on MBSR (Mindfulness Based Stress Reduction) at the University of Massachusetts's Medical School. The medical benefits and the overall quality of life improvements from its adoption have exploded in recent years, in particular, the last two decades which have seen mindfulness

traditions incorporated into education to a greater degree and with very positive results. Presents the only current LIS book that covers this topic in a way that applies directly to librarians Provides a topic that will be appealing to librarians, as it speaks to the pressures of budget cuts and consumer culture being felt across the academy Seeks to improve the joy and quality of life that librarians and library science students experience in their personal lives and jobs

The significant enhancement of desirable traits in vegetables and crops can be achieved through the utilization of diverse approaches in plant breeding. These approaches are crucial in developing vegetables and crops that exhibit enhanced yield, disease resistance, and adaptability to fluctuating environmental factors, ultimately contributing to the establishment of sustainable and resilient agricultural practices for ensuring food security. This book delves into the fundamental principles and recent breakthroughs in plant breeding and genetic improvement. It focuses on the application of physiological and molecular approaches to augment plant tolerance to stressful environmental conditions. Additionally, the book provides plant breeders, researchers, and scientists with updated insights into the prospective developments in plant breeding.

The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available.

Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations, and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations.

This final volume in The Works of Jonathan Edwards publishes for the first time Edwards' "Catalogue," a notebook he kept of books of interest, especially titles he hoped to acquire, and entries from his "Account Book," a ledger in which he noted books loaned to family, parishioners, and fellow clergy. These two records, along with several shorter documents presented in the volume, illuminate Edwards' own mental universe while also providing a remarkable window into the wider intellectual and print cultures of the eighteenth-century British Atlantic. An extensive critical introduction places Edwards' book lists in the contexts that shaped his reading agenda, and the result is the most comprehensive treatment yet of his reading and of the fascinating peculiarities of his time and place.

The International Maritime Dangerous Goods Code is the standard guide to all aspects of handling dangerous goods and marine pollutants in sea transport. The Code lays down basic principles: detailed recommendations for individual substances, materials and articles, and a number of recommendations for good operational practice, including advice on terminology, packing, labelling, stowage, segregation and handling, and emergency response action. The Code has undergone many changes over the years, in both format and content, in order to keep up with the rapid expansion of the shipping industry. Amendment 40-20 includes revisions to various sections of the Code and to transport requirements for specific substances. It is mandatory as from 1 June 2022 but may be applied by Administrations in whole or in part on a voluntary basis from 1 January 2021

The old image of an entrepreneur as a scrappy, independent risk-taker has been replaced by the reality of individuals incorporating innovative ideas in more traditional settings. This collection of essays illustrates how librarians are infusing entrepreneurial principles in a variety of arenas, including public, private, academic, and special libraries. It chronicles how entrepreneurial librarians are flourishing in the digital age, advocating social change, responding to patron demands, designing new services, and developing exciting fundraising programs. Applying new business models to traditional services, they eagerly embrace entrepreneurship in response to patrons' demands, funding declines, changing resource formats, and other

A genealogist's practical guide to researching family history online while avoiding inaccurate, incomplete, or misleading information. The internet has revolutionized family history research—every day new records and resources are placed online and new methods of sharing research and communicating become available. Never before has it been so easy to research family history and to gain a better understanding of who we are and where we came from. But, as British genealogist Chris Paton demonstrates in this straightforward, practical guide, while the internet is an enormous asset, it is also something to be wary of. Researchers need to take a cautious approach to the information they acquire on the web. Where did the original material come from? Has it been accurately reproduced? Why was it put online? What has been left out and what is still to come? As he leads researchers through the multitude of resources that are now accessible online with an emphasis on UK and Ireland sites, Chris Paton helps to answer these questions. He shows what the internet can and cannot do—and he warns against the various traps researchers can fall into along the way.
