Space is often defined by an abstract scientific, mathematical, or measurable conception while place refers to the elaborated cultural meanings people invest in or attach to a specific site or locale.

What Does the Anthropology of Space Look Like?

Here, experiences of ruination are associated with a set of spatial and temporal dynamics that emerge as the felt negation of linear time

and Cartesian space. Insofar as the recent scholarly turn to ruins assumes the existence of modernization, it in fact eclipses what is conceptually at stake in situations where modernization exists only as a promise.

Anthropology of Outer Space - InnovaSpace

The boundaries of the scope of anthropology are thus coterminous with the boundaries of the genus homo in space

and time. When the scope of anthropology covers the biology of humankind, it examines human as an organism and explains human origin, human evolution, human differentiation and human variation as influenced by heredity and environment.
