### **Motivation, Language Attitudes and Globalisation** GRIN Verlag

Offering a historical and empirical account, this book provides a comprehensive overview of the socio-educational model of second language acquisition. This approach to understanding motivational variables that promote success in the learning of a second or foreign language - distinguishing between language classroom motivation and language learning motivation - is a major one in the history of this field of research. Chapters include a discussion of the definition and measurement of motivation; historical foundations of the model; recent studies

with the International Attitude Motivation Test Battery for English as a foreign language in different countries; the implications of the model to the classroom context; and a discussion of criticisms and misconceptions of the model. The book provides graduate students and researchers with unique coverage of this research-oriented approach as well as serving as a source book for the area. It is ideal for courses on motivation in second language learning, or as a supplemental text for research-oriented courses in applied linguistics, educational psychology, or language research in general.

*Attitudes and Motivation in Second Language Learning* Multilingual Matters  
 This volume presents the results of the largest ever language attitude/motivation survey in second language studies. The

research team gathered data from over 13,000 Hungarian language learners on three successive occasions: in 1993, 1999 and 2004. The examined period covers a particularly prominent time in Hungary's history, the transition from a closed, Communist society to a western-style democracy that became a member of the European Union in 2004. Thus, the book provides an 'attitudinal/motivational flow-chart' describing how significant sociopolitical changes affect the language disposition of a nation. The investigation focused on the appraisal of five target languages - English, German, French, Italian and Russian - and this multi-language design made it also possible to observe the changing status of the different languages in relation to each other over the examined 12-year period. Thus, the authors were in an ideal position

to investigate the ongoing impact of language globalisation in a context where for various political/historical reasons certain transformation processes took place with unusual intensity and speed. The result is a unique blueprint of how and why language globalisation takes place in an actual language learning environment. The McGill Conference in Honour of Wallace E. Lambert Cambridge University Press

This book synthesises current theory and research on L2 motivation in the EFL Japanese context covering topics such as the issues of cultural identity, demotivation, language communities, positive psychology, possible L2 selves and internationalisation within a key EFL context. The studies examine L2 motivation in primary, secondary and tertiary education utilising a wide variety of research methodologies to do so.

#### **Attitudes and Motivation in Second Language Teaching** Multilingual Matters

This book examines issues that have emerged as higher education systems and individual institutions across East Asia confront and adapt to the changing economic, social, and educational environments in which they now operate. The book's focus is on how higher education systems learn from each other and on the ways in which they collaborate to address new challenges. The sub-theme that runs through this volume concerns the changing nature of cross-border sharing. In particular, the provision of technical assistance by more industrialized countries to lower and middle income countries has given way to collaborations that place the latter's participating institutions on a more equal footing.

#### **Motivation in second language**

**acquisition** Natl Foreign Lg Resource Ctr This book brings together contributions from the leaders of the language learning motivation field. The varied chapters demonstrate how Gardner's work remains integral to a diverse range of contemporary theoretical issues underlying the psychology of language, even today, 60 years after the publication of Gardner and Lambert's seminal 1959 paper. The chapters cover a wide selection of topics related to applied linguistics, second language acquisition, social psychology, sociology, methodology and historical issues. The book advances thinking on cutting-edge topics in these diverse areas, providing a wealth of information for both students and established scholars that show the continuing and future importance of Gardner and Lambert's ideas.

*A Study of the Arab Students in the*

*Intensive English Program at Indiana University, Bloomington* Routledge

"The motivated individual expends effort, is persistent and attentive to the task at hand, has goals, desires, and aspirations, enjoys the activity, experiences reinforcement from success and disappointment from failure, makes attributions concerning success and/or failure, is aroused, and makes use of strategies to aid in achieving goals. That is, the motivated individual exhibits many behaviors, feelings, cognitions, etc., that the individual who is unmotivated does not" (Masgoret & Gardner, 2003, p. 128).

A Cross-cultural Study Multilingual Matters Second language learners differ in how successfully they adapt to, and profit from, instruction. This book aims to show that adaptation to L2 instruction, and subsequent L2 learning, is a result of the interaction between learner characteristics and learning contexts. Describing and explaining these interactions is fundamentally important to theories of instructed SLA, and for effective L2 pedagogy. This collection is the first to explore this important issue in contemporary task-based, immersion, and communicative pedagogic settings. In the first section, leading experts in individual differences research describe recent advances in theories of intelligence, L2 aptitude, motivation, anxiety and emotion, and the relationship of native language abilities to L2 learning. In the second section, these theoretical insights are applied to empirical studies of individual differences-treatment interactions in classroom learning, experimental studies of the effects of focus on form and incidental learning, and studies of naturalistic versus instructed SLA.

*Attitudes, Orientations, and Motivations in Language Learning* Multilingual Matters

In this thought-provoking book, Ema Ushioda asks why we research language learning motivation, whose interests the research serves, and who ultimately benefits. Examining the major theoretical and research developments in this vibrant field from its origins to the present day, the author interrogates the goals and values driving academic inquiry, and argues for a more socially conscious and socially responsive orientation to researching language learning motivation. The book challenges this research field to contribute to critical movements in applied linguistics to address globally and locally relevant societal issues where language and motivation matter. "Ema Ushioda's compelling, authoritative and timely book re-writes the story of L2 motivation research through the ethical lens. Her

probing reflection is not meant to soothe but to ask difficult questions about why we research and for whom. It is impossible to imagine future L2 motivation scholarship that does not treat them seriously."

Maggie Kubanyiova, Professor of Language Education, University of Leeds Ema Ushioda is a Professor and Head of the Department of Applied Linguistics at the University of Warwick Oxford Applied Linguistics Series Advisers: Anne Burns and Diane Larsen-Freeman

*Bilingualism, Multiculturalism, and Second Language Learning* Multilingual Matters

This textbook offers an introductory overview of eight hotly-debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences, thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader.

*60 Years Since Gardner and Lambert (1959)* A&C Black

Understanding the way in which learners differ from one another is of fundamental concern to those involved in second-language acquisition, either as researchers or teachers. This account is the first to review at book length the important research into differences, considering matters such as aptitude, motivation, learner strategies, personality and interaction between learner characteristics and types of instruction.

**Longitudinal, Comparative and Explanatory Perspectives** LAP Lambert Academic Publishing

Seminar paper from the year 2009 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,3, University of Hildesheim (Englisch als Fremdsprache), course: Language Acquisition, language: English, abstract: This paper is about motivation in second language acquisition. First the term "motivation" will be defined and explained. Afterwards this paper will explain what different kinds of motivation exist and how they help to learn language. I will focus on the work of Rod Ellis and Robert C. Gardner as well as the works of Kimberly A. Noels. The final part of the paper will discuss motivation in the

classroom and how to improve the motivation of students as a teacher. For this part I will focus on the works of J. Brophy. Motivation is often named together with aptitude. Therefore it is vital to define the difference between aptitude and motivation. Ellis (2008:75) states while aptitude describes the "cognitive abilities that underlie successful L2 acquisition, motivation involves the attitudes and affective states that influence the degree of effort that learners make to learn an L2". So aptitude is a more or less stable component which the individual can not directly interfere with. Motivation on the other hand is a component that can change comparatively fast and can be altered by the learner himself. Gardner (2001) writes that motivation describes the driving force behind the effort of a learner. Motivation consists of three elements. The first element is "effort". A more motivated learner will put more effort in his or her studies. He will be open to do extra work in order to improve his language skills, spend more time with studying for the language and even deal with the subject on a subconscious level. [...]

*Attitudes and Motivation in Second Language Acquisition* GRIN Verlag  
The Routledge Handbook of Chinese Second Language Acquisition is the first reference work of its kind. The handbook contains twenty contributions from leading experts in the field of Chinese SLA, covering a wide range of topics such as social contexts, linguistic perspectives, skill learning, individual differences and learning settings and testing. Each chapter covers historical perspectives, core issues and key findings, research approaches, pedagogical implications, future research direction and additional references. The Routledge Handbook of Chinese Second Language Acquisition is an essential reference for Chinese language teachers and researchers in Chinese applied linguistics and second language acquisition.

*Motivation, Identity and Target Variety*  
Wiley-Blackwell

Seminar paper from the year 2020 in the subject Speech Science / Linguistics, grade: 2,3, University of Cologne, language: English, abstract: This paper will look at one important factor in mastering the acquisition of a second language - motivation. It will be argued that the development of positive attitudes and motivation has a great impact on an individual's success in second language learning. Evidence for these claims will be based on different studies, including one by Moyer (1999) on highly motivated

subjects learning German and another by Pfenninger and Singleton (2016) which compares data from motivation questionnaires and language experience essays completed by 200 Swiss learners of English at both the beginning and the end of secondary school. Various researchers believe that age is the one factor which determines whether a subject is able to master a second language to a native-like level or not. However, in this paper it is argued that other factors such as motivational matters also play a vital role in the acquisition of a second language. If indeed this is the case, different concepts of motivation need to be taken into consideration.

**Attitudes and Motivation** Springer Nature

This volume presents the results of the largest ever language attitude/motivation survey, involving over 13,000 teenage language learners in Hungary on three successive occasions: in 1993, 1999 and 2004. The results are not confined to the European environment but have wider implications concerning attitude change, motivational dynamics and language globalisation.

*A Hungarian Perspective*

Taking three different perspectives, this book looks at primary school children's language learning motivation and language attitudes. In adopting a longitudinal perspective, the book fills a research gap and provides a macro-level analysis of motivational development over time. It reveals a surprising amount of stability in primary school children's motivational and attitudinal development. The comparative perspective looks at the learners' affective dispositions with regard to English (theorized as a 'global language') and French (theorized as a 'national language'). The comparisons between global language and national language are relevant across the world, especially in situations where instruction in languages other than English struggles to get attention. The results reveal sizeable differences between the two languages, with children being substantially more motivated to learn English than to learn French. Finally, the explanatory section identifies key

antecedents of the learners' motivational and attitudinal dispositions - and thereby opens up paths for intervention relevant for those working in the field of language instruction.

**A Hungarian Perspective** Oxford University Press

*English for Specific Purposes* offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

*Motivation and Second Language Acquisition* Routledge

This collection pays tribute to Professor Wallace E. Lambert and his contributions to the fields of language and linguistics. Each chapter, written by an internationally renowned theorist or researcher, traces the currents of theory and research within the topic area to the present day, provides a state-of-the-art review of the topic, and offers an outline for future research directions. The book concludes with an overview from Professor Lambert that critically examines the impact of the ideas in each individual chapter. This volume is organized around the three areas where Professor Lambert's unique contributions are most substantial and most evident: bilingualism, multiculturalism, and second language learning. Specifically, the papers presented discuss the topics of social, psychological, cognitive, and neuropsychological aspects of bilingualism and second language learning, the psychology of inter-group relations and multiculturalism, bilingual/immersion education, and language planning. Note: Royalties earned from sales of this book will go to the Wallace E. Lambert Student Research Fund at McGill University for use by students interested in second language acquisition, bilingualism, and/or multiculturalism.

**Cultural Adaptation Processes in International Graduate Students in U.S. Universities** Springer Science & Business Media

Motivation is one of the key learner characteristics that determine the rate and success of language learning. This volume addresses motivation in language learning - motives associated with certain

features of the language, the language learner, and the learning situation. Discusses and dissects the intriguingly complex characteristic of motivation in the process of language learning. Explores recent developments and the most important research directions in the field, including a selection of data-based studies by some of the best-known motivation researchers.

**ATTITUDES, MOTIVATION AND ACHIEVEMENT IN ENGLISH AS A SECOND LANGUAGE : A PSYCHOLINGUISTIC STUDY** John Benjamins Publishing

This collection pays tribute to Professor Wallace E. Lambert and his contributions to the fields of language and linguistics. Each chapter, written by an internationally renowned theorist or researcher, traces the currents of theory and research within the topic area to the present day, provides a state-of-the-art review of the topic, and offers an outline for future research directions. The book concludes with an overview from Professor Lambert that critically examines the impact of the ideas in each individual chapter. This volume is organized around the three areas where Professor Lambert's unique contributions are most substantial and most evident:

bilingualism, multiculturalism, and second language learning. Specifically, the papers presented discuss the topics of social, psychological, cognitive, and neuropsychological aspects of bilingualism and second language learning, the psychology of inter-group relations and multiculturalism, bilingual/immersion education, and language planning.
