 Self Consciousness John Updike
 John Updike's memoirs consist of six chapters in which he writes of his home town, his psoriasis, his stuttering, his discomfort during the Vietnam war, his Updike ancestors, and his religion and sense of self. These essays together give the inner shape of a life, up to the age of fifty-five, of a relatively fortunate American male.

 Updike, John. Self-Consciousness
 Self-Consciousness opens with the author's protest that his reason for writing this memoir was that he had heard that 'someone' wanted to write his biography, 'to take my life, my lode of ore and heap of memories' from him. This disingenuous apology for writing is merely an excuse for self-indulgence (like all memoirs) and probably the most dishonest thing in the book.

 John Updike's Self-Consciousness | Psychology Today
 John Updike's memoirs consist of six Emersonian essays that together trace the inner shape of the life, up to the age of fifty-five, of a relatively fortunate American male. The author has attempted, his Foreword states, "to treat this life, this massive datum which happens to be mine, as a specimen life, representative in its odd uniqueness of all the

oddly unique lives in this world."

 In the service of this metaphysical effort, he has been hair-raisingly honest, matchlessly precise, and self-effacingly humorous. He takes the reader beyond self-consciousness, and beyond self-importance, into sheer wonder at the miracle of existence.
