The World Drug Report provides an annual overview of recent developments for various drug categories. Chapter one of the World Drug Report 2015 provides a global overview of the latest developments with respect to opiates, cocaine, cannabis and synthetic drugs, ranging from production to trafficking as well as consumption and the health impact of drug use. Chapter two focuses on Alternative Development, its relation to illicit cultivation, and also within the broader context of the development agenda.

A big part of Dr. Joe's job as director of McGill University's Office of Science and Society is persuading people that the pursuit of science knowledge is a potential source of wonder, enlightenment and well-being for everyone. And as a chemist, he's particularly keen to rescue chemistry from the bad rep it's developed over recent decades. There is more to chemistry than toxins, pollution, and "Don't drink that soda--it's full of chemicals." The evangelic zeal Dr. Joe brings to his day job is of course also the driving force behind his work as an author. Once again, here he is to tell that everything is full of chemicals, and that chemistry means health, nutrition, beauty products, cleaning products, DNA, and the means by which Lady Gaga's meat dress was held together. In the style established with the bestselling Brain Fuel, each section here is themed and contains a mixture of short, pithy items and slightly longer mini-essays. And as before--but never with such energy and relish--Dr. Joe goes on the attack against charlatans in the alternative health trade, naming and shaming them in a particularly entertaining and edifying section of the book called "Claptrap." You will learn whether to put broccoli on a pizza before or after baking,

whether beauty pills are worth taking, and whether the baby shampoo you're using is poisonous. You will discover but not use, please, the recipe for a Molotov cocktail. You will be enabled to enthrall fellow dinner guests with the derivation of the name Persil, and the definition of a kangarian (it's someone who only eats kangaroo meat). As ever, this torrent of entertainment is delivered in Dr. Joe's unmistakably warm, lively and authoritative voice.

A man is accused of attempted murder of a former crystal meth addict. He claims he shot in self-defense, responding to the extremely aggressive behavior the victim was exhibiting. How will this play out in court? Most likely, the prosecution and the defense will call various expert witnesses - perhaps neurologists, psychologists, pathologists - each with testimonies based on their own theoretical viewpoints, but none with a truly comprehensive knowledge of the background and effects of methamphetamine (MA) use. This will cause confusion, complexity, and their testimonies may not comply with Daubert standards. Written by a multidisciplinary team of experts, Methamphetamine Use: Clinical and Forensic Aspects examines MA use and abuse from clinical,

forensic, and criminal justice perspectives. It is the first to cover virtually every aspect, reviewing the history, pharmacology, pathology, physiology, treatment, and evidentiary value of MA and its use. It addresses Daubert considerations and victim/witness credibility, competency to confess and to stand trial, criminal responsibility, extreme emotion as mitigation to murder, and dangerousness. It also details statutes and case law to represent perspectives of both the prosecution and the defense. Growing in popularity more than any other illegal drug, methamphetamine has been shown to produce a paranoid psychotic state, which may recur months or years after use. *Methamphetamine Use: Clinical and Forensic Aspects* provides a comprehensive, critical survey of the current knowledge and policies regarding the use and abuse of this dangerous and ubiquitous substance.

"Look at daddy, sweetheart. Tell him what you want" I smiled up at him waiting to taste his flavor. Jason Okawmmay wrapped me around his finger and I couldn't get away, but the truth is that I loved it. I didn't want this forbidden love affair to end. Jason Steele Okawmmay, the Director at Forest Hospital for those with disabilities is the husband every woman wishes for, prays for, dreams of, and wants! A kind heart, protective and loyal. But, his world is turned upside down when his wife revealed her honest mistakes. For 10 years he lives with the pain and broken heart while trying to make his marriage work. With three young boys together, he faces the reality of self-love. When his best friend brings him along to an event for charity he meets a woman who takes his breath away, Ariel Vinte. With chemistry building between them, they become closer. Ariel despises those who involve themselves in other's relationships. But, her biggest nightmare has come true. She falls for Jason Okawmmay, a man with hidden secrets that nobody knows, not even his wife. Affairs are oftentimes messy and complicated, will this one turn out the same way when his wife suspects him cheating?

A handbook of survival and warfare for the citizens of Woodstock Nation A classic of counterculture literature and one of the most influential--and controversial--documents of the twentieth century, *Steal This Book* is as valuable today as the day it was published. It has been in print continuously for more than four decades, and it has educated and inspired countless thousands of young activists. Conceived as an instruction manual for radical social change, *Steal This Book* is divided into three sections--Survive! Fight! and Liberate! Ever wonder how to start a guerilla radio station? Or maybe you want to brush up on your shoplifting techniques. Perhaps you're just looking for the best free entertainment in New York City. (The Frick Collection--"Great when you're stoned.") Packed with information, advice, and Abbie's unique outlaw wisdom ("Avoid all needle drugs--the only dope worth shooting is Richard Nixon."), *Steal This Book* is a timeless reminder that, no matter what the struggle, freedom is always worth fighting for. "All Power to the Imagination was his credo. Abbie was the best."--Studs Terkel

This candid memoir traces a life-long path of erotic indulgence that brought the author to the brink of disaster. From his abuse as a child by perverted adults, to his early sexual indoctrination, to his secret adult sex life, you will see a young man influenced by pornographic material through decades until his addition led him to a life of crime. Seeking to tell his side of the story following his arrest and conviction in 2010 for the distribution of child pornography, Tom shares his deeply personal and tragic account of events in this first-of-its-kind autobiography. In an effort to shed light on his addictions to drugs and pornography, he openly discusses his federal crime and the punishment he received. Citing several scholarly books and reports, Tom explains the federal child pornography laws and how they are stricter than state laws are and how major figures in Washington want to see changes for more fair and equitable punishments. With complete candor, Tom talks about his lost friendships due to this crime, the other sex offenders he has met in prison, and the overall incarceration experience. He also discusses the plight of child porn victims and offers advice to parents on keeping their children safe on the internet. In addition, Tom shares the desperate moments that brought him to the Light of God and how the Holy Spirit helped turn his life around. The Last Taboo raises questions that aren't easily answered regarding pornography in America, addiction, and the federal justice system. Regardless of your personal opinion of these topics, this is one book that will have you thinking about the subject long after reading the last page.

A profoundly original philosophical detective story tracing the surprising history of an anecdote

ranging across centuries of traditions, disciplines, and ideas Red Sea-Red Square-Red Thread is a work of passages taken, written, painted, and sung. It offers a genealogy of liberty through a micrology of wit. It follows the long history of a short anecdote. Commissioned to depict the biblical passage through the Red Sea, a painter covered over a surface with red paint, explaining thereafter that the Israelites had already crossed over and that the Egyptians were drowned. Clearly, not all you see is all you get. Who was the painter and who the first teller of the tale? Designed as a philosophical detective story, Red Sea-Red Square-Red Thread follows the extraordinary number of thinkers and artists who have used the Red Sea anecdote to make so much more than a merely anecdotal point. Leading the large cast are the philosophers, Arthur Danto and Søren Kierkegaard, the poet and playwright, Henri Murger, the opera composer, Giacomo Puccini, and the painter and print-maker, William Hogarth. Strange companions perhaps, until their use of the anecdote is shown as working its extraordinary passage through so many cosmopolitan cities of art and capital. What about the anecdote brings Danto's philosophy of art into conversation with Kierkegaard's stages on life's way, with Murger and Puccini's la vie de bohème, and with Hogarth's modern moral pictures? The book explores narratives of emancipation in philosophy, theology, politics, and the arts. What has the passage of the Israelites to do with the Egyptians who, by many gypsy names, came to be branded as bohemians when arriving in France from the German lands of Bohemia? What have Moses and monotheism to do with the history of monism and the monochrome? And what sort of thread connects a sea to a square when each is so purposefully named red?

This celebration of the Second Amendment makes the point that if one's ammunition is made useless, what one has is then the de facto repeal of the Second Amendment. This repeal would have disastrous consequences, as shown by many historical examples given in the text wherein the disarmament of the civilian population was the prelude to mass homicidal or genocidal slaughters. In the text, I detail which types of ammunition are suitable for use against body amor clad intruders, and then I proceed to give in great detail how to increase their usefulness by coating the projectile with a layer of teflon. Coating details are given for both commercially available ammunition, and for home turned solid steel projectiles.

Vest Busters Little Brown & Company

The definitive book on the impact of methamphetamine on individuals, communities, and society by two of America's leading addiction and criminal justice experts. In recent years, the media have inundated us with coverage of the horrors that befall methamphetamine users, and the fires, explosions, and toxic waste created by meth labs that threaten the well-being of innocent people. In *Methamphetamine: Its History, Pharmacology, and Treatment*, the first book in Hazelden's Library of Addictive Drugs series, Ralph Weisheit and William L. White examine the nature and extent of meth use in the United States, from meth's early reputation as a "wonder drug" to the current perception that it is a "scourge" of society. In separating fact from fiction, Weisheit and

White provide context for understanding the meth problem by tracing its history and the varying patterns of use over time, then offer an in-depth look at: the latest scientific findings on the drug's effects on individuals the myths and realities of the drug's impact on the mind the national and international implications of methamphetamine production the drug's impact on rural communities, including a case study of two counties in the Midwest issues in addiction and treatment of meth. Thoroughly researched and highly readable, *Methamphetamine* offers a comprehensive understanding of medical, social, and political issues concerning this highly impactful drug. Written for professionals and serious lay readers by nationally recognized experts, the books in the Library of Addictive Drugs series feature in-depth, comprehensive, and up-to-date information on the most commonly abused mood-altering substances.

Is there a way to end North America's opioid epidemic? In *The Age of Fentanyl*, Brodie Ramin tells the story of the opioid crisis, showing us the disease and cure from his perspective as an addiction doctor working on the front lines. We meet his patients, hear from other addiction experts, and learn about the science and medicine of opioid addiction and its treatments. He shows us how addiction can be prevented, how knowledge can reduce stigma, and how epidemics can be beaten. Dr. Ramin brings the hopeful message that just as patients and health care workers rallied together to fight HIV one generation ago, a coalition of patients, advocates, scientists, doctors, and nurses is once again finding solutions and making plans to stem the overdose deaths, block the spread of fentanyl, and end the epidemic.

The Death and Life of an American Small Town Multnomah

I am beginning to realize that taking the self out of our essays is a form of repression. Taking the self out feels like obeying a gag order--pretending an objectivity where there is nothing objective about the experience of confronting and engaging with and swooning over literature." -- from "Heroines" "On the last day of December, 2009 Kate Zambreno began a blog called "Frances Farmer Is My Sister," arising from her obsession with the female modernists and her recent transplantation to Akron, Ohio, where her husband held a university job. Widely reposted, Zambreno's blog became an outlet for her highly informed and passionate rants about the fates of the modernist "wives and mistresses." In her blog entries, Zambreno reclaimed the traditionally pathologized biographies of Vivienne Eliot, Jane Bowles, Jean Rhys, and Zelda Fitzgerald: writers and artists themselves who served as male writers' muses only to end their lives silenced, erased, and institutionalized. Over the course of two years, "Frances Farmer Is My Sister" helped create a community where today's "toxic girls" could devise a new feminist discourse, writing in the margins and developing an alternative canon. In "Heroines," Zambreno extends the polemic begun on her blog into a dazzling, original work of literary scholarship. Combing theories that have dictated what literature should be and who is allowed to write it--from T. S. Eliot's *New Criticism* to the writings of such mid-century intellectuals as Elizabeth Hardwick and Mary McCarthy to the occasional "girl-on-girl crime" of the Second Wave of feminism--she traces the genesis of a cultural template that consistently exiles female experience to the realm of the "minor," and diagnoses women for transgressing social bounds. "ANXIETY: When she experiences it, it's pathological," writes Zambreno. "When he does, it's existential." By advancing the *Girl-As-Philosopher*, Zambreno reinvents feminism for her generation while providing a model for a newly subjectivized criticism. *A Technical Manual for Independent Contractors* University of California Press "Joe has a beautiful house, a great job, no commitments--and he likes it like that. All he needs is a quiet house sitter for his rambling old place by the sea. When Tess turns up on his doorstep, he's not sure she's right for the job. Where has she come from in such a hurry? Her past is blank, and she's a bit of an enigma. But there's something about her--even though sparks fly every time they meet. And it looks like she's here to stay..."--P. [4] of cover.

Crystal Meth : the Biography of North America's Deadliest New Plague United Nations

The best book ever written in the field of clandestine chemistry has just gotten better in a new 8th edition. I have trained the champions of the field of clandestine chemistry for over 20 years, and this book gives the new techniques required for this constantly evolving field. I have uncovered a very easily done and supplied method for cooking your own ephedrine and pseudoephedrine from health food store and hardware store materials. This completely eliminates the need to show ID and buy adulterated and expensive pills containing these materials. I have also reconfigured older recipes to make use of the weaker or polluted materials now commonly found on hardware store shelves. This 8th edition shows the futility of politically motivated attempts by pandering politicians to regulate the private lives of individuals.

The American prison system has grown tenfold in thirty years, while crime rates have been relatively flat: 2 million people are behind bars on any given day, more prisoners than in any other country in the world — half a million more than in Communist China, and the largest prison expansion the world has ever known. In *Going Up The River*, Joseph Hallinan gets to the heart of America's biggest growth industry, a self-perpetuating prison-industrial complex that has become entrenched without public awareness, much less voter consent. He answers, in an extraordinary way, the essential question: What, in human terms, is the price we pay? He has looked for answers

to that question in every corner of the "prison nation," a world far off the media grid — the America of struggling towns and cities left behind by the information age and desperate for jobs and money. Hallinan shows why the more prisons we build, the more prisoners we create, placating everyone at the expense of the voiceless prisoners, who together make up one of the largest migrations in our nation's history.
