**California Real Estate Finance** Oxford University Press  
This book fills a gap in the existing resources available to students and professionals requiring an academically rigorous, but practically orientated source of knowledge about real estate finance. Written by a bank vice-president who for many years has practiced as a commercial lender and who teaches real estate investment at university level, and an academic whose area of study is finance and particularly valuation, this book will lead readers to truly understand the fundamentals of making a sound real estate investment decision. The focus is primarily on the valuation of leased properties such as apartment buildings, office buildings, retail centers, and warehouse space, rather than on owner occupied residential property.

**Real Estate Investment**

Oxford University Press  
This work presents a thorough overview of the law of real estate finance. It covers introductory matters, the mortgage market, real estate financing devices, the underlying obligation, mortgaged property, transfer of both the mortgagor's interest and the mortgagee's interest, and financing cooperatives and condominiums. It reviews the government involvement in the financing process. In addition, the volume provides an expansive review of rights and obligations after default and before foreclosure, priorities and foreclosure. It covers the tax consequences of the acquisition, owning and disposition of real estate. Legal principles and relevant caselaw are stated along with their underlying theories to enhance understanding of the law of real estate finance.

The novel legal problems raised by advances in technology demand that students receive early exposure to this area of law.
