This book attempts to convey some of the challenges that those wielding the law for social change purposes have faced and the successes they have achieved. By intention, it is more a studied appreciation than a critical analysis of their efforts. We asked an international team of consultants to help us document and describe how various law-based strategies have worked in very different settings, to draw out connections between those efforts, and to highlight some of the insights that emerge from grantees' experiences in law-related work. We also asked them to help us learn more about the ways the Foundation has played a role in these efforts. Known as the Global Law Programs Learning Initiative (GLPLI), this effort is not definitive, but rather suggestive. Our goal is to contribute to more serious future reflection and, ultimately, more effective programs in this field.

In July 1971, US National Security Advisor, Henry Kissinger, made a secret visit to China to meet top Chinese leaders. This inaugurated a new phase not just in US-China relations but in contemporary history. That visit and the subsequent US-China relationship, including the US decision to invest in China's economic rise and admit it into the WTO, combined to firm up the foundations of China's rise as a world power. For more than four decades, the leadership of the two countries had a secretive pact, which worked well to each other's benefit. The US helped power China's economic growth in the hope that Beijing would turn a new political leaf and adopt Western

practices (e.g. democracy). China grew economically and militarily, used its financial prowess to spread its influence across continents, as four generations of Chinese leaders built their nation at the expense of the US. Half a century after Kissinger's historic visit, the US and China are today engaged in a trade war bordering on a new Cold War.

Washington is not openly talking about 'de-coupling' from China, which has begun to challenge its global dominance, but it might very well be. China has already established itself as a dominant power across Eurasia. More worryingly, China is militarily and economically threatening its neighbours, including Japan, Korea, Vietnam, Taiwan, Australia, Philippines, Indonesia and India. This collection of critical essays examines the impact, consequences and legacy of Kissinger's first, door-opening visit to China and how it has shaped world order.

Every day, nearly 275 people are dying from opioid addiction in America. This doctor wants to stop the crisis. "I can't retire. Not until the Opioid Epidemic finally becomes a chapter in our country's history." Over the past two decades, the opioid addiction has resulted in the deaths of nearly one million people in our country. Screening and brief intervention for addictions will mean fewer people dying from illegal overdose and ensure that patients get prescription-grade pain pills or buprenorphine from the pharmacy, but doctors are not taught this in American medical schools. In 2006, after years of feeling powerless to help those addicted to opioids, benzodiazepines, and stimulants, general practitioner Dr. Arun Gupta joined the American Society of Addiction Medicine and earned his certification to treat patients with addictions. Now, in his eye-opening new book, after decades of research and first-hand experience, he tells us how to end this crisis that is destroying so many lives. Here are some hard facts: -The CDC classifies Opioid Use Disorder (OUD) and overdoses as "preventable," and yet nearly 275 are dying every day. - SAMHSA says 41.1 million people needed Substance Use Disorder (SUD) treatment in the past year, but only 6.5% received it. There are not enough addiction doctors to care for them. - Doctors are trying to comply with the literally thousands of regulations that have been thrown at them, or they face serious punitive consequences. - Respecting an addict's basic human

dignity means they must have access to treatment. If they do not, we confirm their lives are not worth saving. The medical profession is trusted to save lives. Passionate, factual, and written with truth as the only agenda, this book offers the practical solutions for the War on Drugs that American so desperately needs.

Dependence on computers has had a
 transformative effect on human society.
 Cybernetics is now woven into the core
 functions of virtually every basic
 institution, including our oldest ones.
 War is one such institution, and the
 digital revolution's impact on it has been
 profound. The American military, which
 has no peer, is almost completely reliant
 on high-tech computer systems. Given
 the Internet's potential for full-spectrum
 surveillance and information disruption,
 the marshaling of computer networks
 represents the next stage of cyberwar.
 Indeed, it is upon us already. The recent
 Stuxnet episode, in which Israel fed a
 malignant computer virus into Iran's
 nuclear facilities, is one such example.
 Penetration into US government
 computer systems by Chinese hackers-
 presumably sponsored by the Chinese
 government-is another. Together, they
 point to a new era in the evolution of
 human conflict. In *Cybersecurity and
 Cyberwar: What Everyone Needs to
 Know*, noted experts Peter W. Singer and
 Allan Friedman lay out how the
 revolution in military cybernetics
 occurred and explain where it is headed.
 They begin with an explanation of what
 cyberspace is before moving on to
 discussions of how it can be exploited
 and why it is so hard to defend.
 Throughout, they discuss the latest
 developments in military and security
 technology. Singer and Friedman close
 with a discussion of how people and
 governments can protect themselves. In
 sum, *Cybersecurity and Cyberwar* is the
 definitive account on the subject for the
 educated general reader who wants to
 know more about the nature of war,
 conflict, and security in the twenty-first
 century.
