In the US, almost all  
technical exams on  
electrical works are  
based on the NEC.  
However, the NEC book  
itself is a 1500+ pages  
mega size monster.  
You just won't have the  
time and energy to go  
through and memorize  
everything in there.  
Even though the exam  
may allow you to use  
the code book, looking  
up a particular item  
can be very time  
consuming and you  
may run out of time  
real quick! This is why  
we come up with this  
study product - we  
provide you with

essential knowledge  
and information that  
can be easily  
comprehended so that  
during the actual exam  
you won't need to  
browse the code book  
for answering every  
single question! In any  
case, the examination  
requires that you have  
a working grasp of the  
National Electrical  
Code NEC as well as  
the local laws and rules  
plus a basic level of  
electrical theory  
knowledge. The NEC is  
the property of the  
NFPA. The exam covers  
a wide range of  
fundamental topics but  
this study notes will  
focus on topics related  
to code compliance  
and local rules &  
regulations. There is no  
way you can pass the  
exam without having  
solid real world  
experience. Our notes  
give you knowledge,

principles and concepts. To master the topics, you must be "in the field". And you need to know how the experts get things done. To succeed in the exam, you also need to read as many reference books as possible. There is no single book that can cover everything!
