New Series Oxford University Press

In 1996 a series of exquisite Roman mosaic floors was accidentally uncovered during highway construction in the modern Israeli town of Lod. The mosaics featured elegant and superbly crafted animals, fish, birds and other creatures, dating to around AD300. They probably belonged to a private house and served as a series of reception or audience halls, where visitors would have been met and entertained. The mosaic will shortly be returning from a world tour to its new home at The Shelby White

and Leon Levy Lod Mosaic Archaeological Center in Lod, Israel. Published with the Israel Antiquities Authority to celebrate the new museum's opening, this lavishly illustrated volume will be the only book on this exceptional archeological find. Featuring sumptuous photography and an accessible and informative text, this captivating volume will be essential for all those interested in Roman mosaics and the fascinating history of the region." David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always

backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Oxford, the home of lost causes, the epitome of the world of medieval and renaissance learning in Britain, has always fascinated at a variety of levels: social, institutional, cultural. Its rival, Cambridge, was long dominated by mathematics, while Oxford's leading study was Classics. In this pioneering book, 16 leading authorities explore a variety of aspects of Oxford Classics in the last two hundred years: curriculum, teaching and learning, scholarly style, publishing, gender and social exclusion and the impact of German scholarship. Greats (Literae Humaniores) is the

most celebrated classical course in the world: here its early days in the mid-19th century and its reform in the late 20th are discussed, in the latter case by those intimately involved with the reforms. An opening chapter sets the scene by comparing Oxford with Cambridge Classics, and several old favourites are revisited, including such familiar Oxford products as Liddell and Scott's "Greek-English Lexicon", the "Oxford Classical Texts", and Zimmern's "Greek Commonwealth". The book as a whole offers a pioneering, wide-ranging survey of Classics in Oxford.

The Oxford Handbook of Music and World Christianities

investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions, music and religious utopias (and other oppositional religious communities), music and conflict, music and transnational flows, and music and everyday life. The volume as a whole, then, approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate (and change) between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious, moral, and cultural values in a long history of intercultural and transnational encounters.

*The Oxford Dictionary of Science Fiction* McGraw-Hill Education  
The mosaics in the collection of the J. Paul Getty Museum span the second through the sixth centuries AD and reveal the diversity of compositions found throughout the Roman Empire

during this period. Elaborate floors of stone and glass tesserae transformed private dwellings and public buildings alike into spectacular settings of vibrant color, figural imagery, and geometric design. Scenes from mythology, nature, daily life, and spectacles in the arena enlivened interior spaces and reflected the cultural ambitions of wealthy patrons. This online catalogue documents all of the mosaics in the Getty Museum's collection, presenting their artistry in new color photography as well as the contexts of their discovery and excavation across Rome's expanding empire—from its center in Italy to provinces in southern Gaul, North Africa, and ancient Syria. Reflecting the Getty's commitment to open content, Roman Mosaics in the J. Paul Getty Museum is available online at [www.getty.edu/publications/romanmosaics](http://www.getty.edu/publications/romanmosaics) and may be downloaded free of charge in multiple formats. For readers who wish to have a bound reference copy, this paperback edition has been made available for sale. The publication of this online catalogue is issued on the occasion of the exhibition, Roman Mosaics across the Empire, on view at the Getty Villa from March 30 through September 12, 2016.

Paradise Lost Asia ELT College/Adult General Course

La Universidad se encuentra en pleno progreso desde su tiempo cero; de hecho, halla su carta de naturaleza en la necesidad de mejorar el medio que la nutre y por y para el que existe: la

sociedad. Rompiendo las viejas membranas de la enseñanza imperante hasta el siglo XX, las nuevas (r)evoluciones de contenidos y fórmulas, como lo fuera el EEES (o Plan Bolonia) o las TIC, suponen la respuesta a esas actualizadas necesidades docentes y curriculares. Las Humanidades, las Artes, las Ciencias sociales y la Docencia se reescriben, hibridando, gracias a los nuevos lenguajes y herramientas, contenidos otrora lejanos. La nueva Academia es poliédrica, ínter y multi disciplinar, dialógica y colaborativa. En este estado de cosas la colección Herramientas universitarias se erige como atalaya para agrupar bajo su égida al más amplio conjunto de autores internacionales que iluminen, con sus investigaciones, la panoplia de contenidos que conforman el mundo científico donde nace el futuro. La calidad intelectual queda refrendada mediante la rigurosa implantación del habitual proceso garante, basado en la revisión o arbitraje por pares ciegos (peer review) de estos capítulos, sin renunciar a la más antigua tradición universitaria que obliga al opositor de lo publicado, a soportar el peso de la prueba. Este doble modelo de evaluación, a priori y a posteriori, garantiza la calidad del contenido de los textos de esta colección. Pertenecer a la Academia, y en ello radica orgullosamente su valía, supone que todos sus miembros responden a una ambición irrenunciable: mostrar que el conjunto de sus trabajos conforma la vanguardia científica internacional. El texto que aquí se presenta está auspiciado por el Fórum Internacional de Comunicación y Relaciones Públicas (Fórum XXI), la Sociedad Española de Estudios de la Comunicación Iberoamericana (SEECI), la Asociación cultural Historia de los Sistemas Informativos y el Grupo Complutense (nº 931.791) de Investigación en

Ours is an age of offense, a time of reactionary shock--always received, never given. Ours is an age that has forgone cultural narratives, a time of individualism--wherein personal identities trump the collective spirit. Ours is an age of failing earth, a time of ecological collapse--yet the consumption of global capitalism continues to run amok. But don't fear. You have the correct worldview, the best solutions. It's not your fault these things are happening. It's the president's, the immigrant's, and the Islamicist's. Or perhaps It's the socialist's, the tree hugger's, and the baby killer's. But it's not your fault. Never yours. For the world

exists as you see it--in an echo chamber lined with golden pixels. Do I still have your attention? Then join me. Within the covers of *Narrativizing Theories*, I dive into ambiguity and aesthetics to depict how clashing worldviews exist side by side yet remain mutually incompatible. I examine how cultures distinguish between acceptable and unacceptable beliefs, embodiments, and identities. And I outline an aesthetic theory of ambiguity that highlights--through the twists and turns of literature--the provisionality of knowledge and the narrativization of reality.

In this book author Cathy Benedict challenges and reframes traditional ways of addressing many of the topics we have come to think of as social justice. Offering practical suggestions for helping both teachers and students think philosophically (and thus critically) about the world around them, each chapter engages with important themes through music making and learning as it presents scenarios, examples of dialogue with students, unit ideas and lesson plans geared toward elementary students (ages 6-14). Taken-for-granted subjects often considered beyond the understanding of elementary students such as friendship, racism, poverty, religion, and class are addressed and interrogated in such a way that honours the voice and critical thinking of the elementary student. Suggestions are given that help both teachers and students to pause, reflect and redirect dialogue with questions that uncover bias, misinformation and misunderstandings that too often stand in the

way of coming to know and embracing difference. Guiding questions, which anchor many curricular mandates, are used throughout in order to scaffold critical and reflective thinking beginning in the earliest grades of elementary music education. Where does social justice reside? Whose voice is being heard and whose is being silenced? How do we come to think of and construct poverty? How is it that musics become used the way they are used? What happens to songs initially intended for socially driven purposes when their significance is undermined? These questions and more are explored encouraging music teachers to embrace a path toward socially just engagements at the elementary and middle school levels.
