Published in 1817, *The Doctrines and Discipline of the African Methodist Episcopal Church* was the first definitive guide to the history, beliefs, teachings, and practices of the African Methodist Episcopal Church. Beginning with a brief history, the book moves into a presentation of the "Articles of Religion," including the Trinity, the Word of God, Resurrection, the Holy Spirit, scripture, original sin and free will, justification, works, the church, purgatory, the sacraments, baptism, the Lord's Supper, marriage,

church ceremonies, and government. Immediately following the articles is an extended four-part catechism that more fully explicates the meanings and implications of the doctrinal statements. A DOCSOUTH BOOK. This collaboration between UNC Press and the University of North Carolina at Chapel Hill Library brings classic works from the digital library of Documenting the American South back into print. DocSouth Books uses the latest digital technologies to make these works available in paperback and e-book formats. Each book contains a short summary and is otherwise unaltered from the original publication. DocSouth Books provide affordable and easily accessible editions to a new generation of scholars, students, and general readers.

The objective of organizing economic activities in any nation is the production of products and services to satisfy human wants. In the modern era, however, where division of labor and specialization are on the rise, those who produce products and services are not typically the same as those who consume or use them. Consequently, it is necessary to substitute one commodity for another. Barter required a 'double coincidence of desires'; B needed to possess both what A desired and what A could offer in exchange. This arrangement restricted the types of transactions that could be conducted, occupied additional time that could have been spent on production, and impeded the specialization of production. The limitations that the barter system placed on human ambitions lead to the evolution of money.

Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will

make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.
