Eastern and Western Approaches for Management of BPH JHU Press Do you want to be a pharmacist? Do you want to be a Physician? Why not both? This book will take you step-by-step through applying, selecting, and interviewing for medical school all while showing you how to use your pharmacy background as leverage. Pharm.D. to M.D. invites its readers to take an inside look into the medical school application process and addresses how a pharmacy student or graduated pharmacist can make the transition into medicine. Applying to medical school can be a difficult and an isolating process for students who fall in-between these two challenging professions. My goal is to highlight the uniqueness of your professional pharmacy background and

teach you how to use your advanced degree as an asset during the application cycle. Pharm.D. to M.D. uncovers the intricacies of generating a successful application while training applicants to avoid countless pitfalls along the way. This guide will serve as a compilation of resources that can be reviewed and utilized by pharmacy students at every professional grade level. If you have ever wondered if you have what it takes to get into medical school and wanted to look beyond your pharmacy degree, then this is the book for you! Written by a recently graduated pharmacist, and current allopathic medical student, Pharm.D. to M.D. offers perspective from experience and provides results that won't disappoint. Join me, along with many others, who have undertaken this difficult journey!

There are nearly 24,000 ophthalmologists in the United States, with 500 physicians newly entering the ophthalmology field each year and approximately half of those being women. Although women now represent approximately half of all ophthalmologists, gender disparities remain when it comes to certain subspecialties (e.g., surgical retina), leadership roles (e.g., department chairs), industry involvement (e.g., consultancy and advisory board positions), and even academic publications. There has been a recently heightened interest in female representation in this field which has manifested in several ways (e.g., conferences geared towards women in ophthalmology, non-peer-reviewed publications about women in ophthalmology, and mentorship programs specifically for women). This book is the first of its kind in procuring and disseminating information—pertaining to both career and life—in an organized, concrete, and enduring way. Women in Ophthalmology is a comprehensive collection of chapters primarily written by women in the field of ophthalmology. The book aims to guide others through milestones and challenges women may face during their careers, and shares sound insights into how to deal with unique issues both inside and outside the workplace. Topics that are widely applicable to all who work in ophthalmology are included, such as finding mentors, collaborating within industry, handling work-life balance, and seeking out leadership opportunities. Each chapter combines personal anecdotes with knowledge from leaders in the field which both men and women will find highly valuable.
