Changing Conceptions of Psychological Life is an interdisciplinary look at personal constructions of self. This book is a product of the 30th Annual Meeting of the Jean Piaget Society. The contributing authors constitute the original cast invited to speak on the theme of how individuals come to construe psychological lives--their own and others. Their concerns are how our sense of ourselves emerges developmentally, culturally, and historically, and the implications such constructions have for personal, social,

and political change. Together, the authors compose an international and interdisciplinary group of scholars well regarded for their work on topics as diverse as adolescence, language, aging, romance, and morality. Creating a level of discourse about selves and mind--and how they have been and should be studied--the volume is broken down into four parts; Part I includes work that is principally concerned with elevating the position of our experience of ourselves in constructing who we are. The next section focuses on the corrections presumed to exist between the conceptions of self and the conceptions of mental life. Each chapter offers additional information on the dynamics of temperament, attachment, personality, and regulation. Part III is

concerned with cultural contexts that frame developing conceptions of self and mental life. Finally, the last section situates conceptions of mental life directly and dramatically in the social contexts of their making. Readers will find in these pages a programmatic effort variously attuned to selves and minds as dynamic and structured, present and represented, felt and known, non-linguaged and storied, and embodied and theorized. The volume is suitable for certain upper-level undergraduate and graduate seminars dealing with clinical, cognitive, cultural, and developmental matters and sought out by active researchers and practitioners in the field.

Drawing on Indigenous peoples' struggles against settler colonialism, *Theft Is Property!* reconstructs the concept of dispossession as a means of explaining how shifting configurations of law, property, race, and rights have functioned as modes of governance, both historically and in the present. Through close analysis of arguments by Indigenous scholars and activists from the nineteenth century to the present, Robert Nichols argues that dispossession has come to name a unique recursive process whereby systematic theft is the mechanism by which property relations are generated. In so doing, Nichols also brings long-standing debates in anarchist, Black radical, feminist, Marxist, and postcolonial thought into direct conversation with the frequently

overlooked intellectual contributions of Indigenous peoples.

Narrative Analysis SAGE

Narrative Analysis is organized around three approaches or "readings." Literary Readings focus on aesthetic, metaphorical, and other literary qualities inherent to narrative approaches. Social-Relational Readings build upon the idea that narrative discourse is personal but also echoes political, economic, and other material relationships in the environment. Readings through the Force of History explain how narrators come to know themselves and their worlds in terms of and in spite of the received explanations of time and place. Working in a range of ethnic, geographic, generational, class, and institutional communities, the authors

demonstrate how they have used narrative inquiry to explore development in challenging social contexts.

Child Maltreatment, Third Edition, by Cindy Miller-Perrin and Robin Perrin, is a thoroughly updated new edition of the first textbook for undergraduate students and beginning graduate students in this field. The text is designed to provide a comprehensive introduction to child maltreatment by disseminating current knowledge about the various types of violence against children. By helping students understand more fully the etiology, prevalence, treatment, policy issues, and prevention of child maltreatment, the authors hope to further our understanding of how to treat child maltreatment victims and how to prevent future child maltreatment.

This popular textbook has long been acclaimed for its authoritative chronological exploration of how the lives of children are shaped by biological and cultural factors. Lead author Cynthia Lightfoot builds on the legacy of original authors Michael and Sheila Cole, offering a lively, engaging, and always accessible examination of child development as a process involving the whole child within multiple, mutually influencing contexts. Throughout, the emphasis is on how the interaction of biology and culture contributes both to the universal pathways of development shared by all children and to the diverse developmental patterns that unfold in the lives of individual children. This is an

accessible introduction to Developmental Psychology for students taking courses that focus on child and adolescent development.

Macmillan Higher Education

This book explores the central importance of adolescents' own activities in their development. This focus harkens back to Jean Piaget's genetic epistemology and provides a theoretically coherent vision of what makes adolescence a distinctive period of development, with unique opportunities and vulnerabilities. An interdisciplinary and international group of contributors explore how adolescents integrate neurological, cognitive, personal, interpersonal and social systems aspects of development into

more organized systems.

The Case for Marriage Rowman & Littlefield

The stars shine brightest out of the deepest dark . . ." A child is imprisoned in a house by her reclusive, religious parents. Hester Wakefield has never spoken to another child, nor seen the outside world. Her one possession is an illustrated children's Bible, and its imagery forms the sole basis for her capacity to make poetic, real-life connections. Her companions at home are Cat, Spoon, Door, Handle, Broom, and Tree, and they all speak to her, sometimes telling her what to do. One day she takes a brave Alice in Wonderland trip into the forbidden outside, at the behest of Handle, and this overwhelming encounter with light

and sky and sunshine is a marvel to her. From this moment on, Hester learns that there are some things she cannot tell her parents, and she keeps this secret to herself. Hester buries it among her other secrets, the ones that take place in the shadowy corners of her insular world, and she keeps them all locked inside her as they multiply and grow, waiting until she can find other ways to be free. *One Foot Wrong* challenges the boundaries of right and wrong, sanity and madness, love and justice, poetry and life. The story told by Hester is often dark and harrowing, but the affecting impact of her distinctive voice and her way of seeing the world illuminates every page and makes this novel an exhilarating, enlightening and, ultimately, an uplifting and transformative experience.

The Wall Street Journal called him “a living legend.” The London Times dubbed him “the most famous art detective in the world.” In *Priceless*, Robert K. Wittman, the founder of the FBI’s Art Crime Team, pulls back the curtain on his remarkable career for the first time, offering a real-life international thriller to rival *The Thomas Crown Affair*. Rising from humble roots as the son of an antique dealer, Wittman built a twenty-year career that was nothing short of extraordinary. He went undercover, usually unarmed, to catch art thieves, scammers, and black market traders in Paris and Philadelphia, Rio and Santa Fe, Miami and Madrid. In this

page-turning memoir, Wittman fascinates with the stories behind his recoveries of priceless art and antiquities: The golden armor of an ancient Peruvian warrior king. The Rodin sculpture that inspired the Impressionist movement. The headdress Geronimo wore at his final Pow-Wow. The rare Civil War battle flag carried into battle by one of the nation's first African-American regiments. The breadth of Wittman's exploits is unmatched: He traveled the world to rescue paintings by Rockwell and Rembrandt, Pissarro, Monet and Picasso, often working undercover overseas at the whim of foreign governments. Closer to home, he recovered an original copy of the Bill of Rights and cracked the scam that rocked the PBS series Antiques Roadshow. By

the FBI's accounting, Wittman saved hundreds of millions of dollars worth of art and antiquities. He says the statistic isn't important. After all, who's to say what is worth more --a Rembrandt self-portrait or an American flag carried into battle? They're both priceless. The art thieves and scammers Wittman caught run the gamut from rich to poor, smart to foolish, organized criminals to desperate loners. The smuggler who brought him a looted 6th-century treasure turned out to be a high-ranking diplomat. The appraiser who stole countless heirlooms from war heroes' descendants was a slick, aristocratic con man. The museum janitor who made off with locks of George Washington's hair just wanted to make a few extra bucks, figuring no one would miss what he'd

filched. In his final case, Wittman called on every bit of knowledge and experience in his arsenal to take on his greatest challenge: working undercover to track the vicious criminals behind what might be the most audacious art theft of all.

Like children themselves, development is dynamic. In the chronologically organized *Child and Adolescent Development in Context*, award-winning author Tara L. Kuther frames development research in real-life contexts, including gender, race and ethnicity, socioeconomic status, and more. Kuther presents highly relatable examples, vivid cross-cultural stories, and case studies of real individuals,

consistently prompting students to reflect on chapter content with What do you think? questions. The book emphasizes three core themes: the centrality of context, the importance of research, and the applied value of developmental science; students will come away with an understanding of these themes that they will immediately be able to apply to their own lives and future careers. A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. *The Case for Marriage* is a critically important intervention in the national debate about the future of family. Based on the

authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more

wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of The Book of Virtues "Makes the absolutely critical point that marriage has been misrepresented and

misunderstood." -- The Wall Street Journal www.broadwaybooks.com

Research on the topic of parent beliefs, or parent cognition, has increased tremendously since the original publication of this volume in 1985. For this revised second edition, the editors sought to reflect some of the new directions that research on parent cognition has taken. By offering a greater variety of topics, it gives evidence of the intellectual concerns that now engage researchers in the field and testifies to the expanding scope of their interests. Although a unique collection because it reflects the diversity that exists among major researchers in the field, it evinces a

common theme -- that the ideas parents have regarding their children and themselves as parents have an impact on their actions. This emphasis on parents' ideas shifts the focus on sources of family influence to ideas or beliefs as determinants of family interactions. The implication of this way of thinking for practitioners is that it suggests the shift to ideas and thoughts from behavior and attitudes.

School consultation is a process for
providing psychological and educational
services in which a specialist
(consultant) works cooperatively with a
staff member (consultee) to improve the
learning and adjustment of a student
(client) or a group of students. During
face-to-face interactions, the consultant
helps the consultee through systematic
problem solving, social influence, and
professional support. In turn, the
consultee helps the client by selecting,
implementing, and evaluating school-

based interventions. In all cases, school
consultation serves a remedial function
and has the potential to serve a
preventive function. In this volume, the
authors offer a systematic approach to
school consultation that differs from
those that have been published
previously. Specifically, the authors
combine the most useful and/or
empirically validated principles from
mental health and behavioral
consultation with practices shown to be
effective in contemporary consultation
research (i.e. behavior analysis, social
influence, and implementation support).
In so doing, the authors describe for the
first-time consultant when and how to
apply these principles in response to a
wide range of consultee and client
needs, and offer a thorough discussion

of the realities inherent in providing services within a school organizational context. This second edition also includes expanded coverage on the following topics: -implications of the 1997 IDEA Amendments for school consultation; - empirically validated approaches to the support and development task; - methods for conducting a functional

behavioral assessment; -a listing of instructional interventions; -teacher shortage, recruitment and retention issues; -prereferral intervention teams and programs; -strategies to increase teacher skill transfer and maintenance; and -inclusion of new research studies that inform the effective practice of school consultation.
