Disabilities and Public Health opens up a new vista and territory by drawing down a new set of tools and strategies from the public health domain to examine the social determinants of health for people with disabilities and to develop systems of health education, health literacy and organization of services to improve their health and well-being. It examines the circumstances of disability from a personal, cultural, environmental, clinical, and policy perspective and ties it together in a public health paradigm.

Adult Physical Conditions Elsevier Health Sciences

This book is a comprehensive textbook for occupational therapy students and occupational therapists working in the field of mental health. It presents different theories and approaches, outlines the occupational therapy process, discusses the context of practice and describes a wide range of techniques used by occupational therapists. These include physical activity, cognitive approaches, group work, creative activities, play and life skills. The book covers all areas of practice in the field, including mental health promotion, acute psychiatry, community work, severe and enduring mental illness, working with older people, child and adolescent mental health, forensic occupational therapy, substance misuse and working with people on the margins of society. The theory chapters are written by occupational therapists who are recognised experts in their fields and the applied chapters are written by practitioners. An innovation in this edition is the inclusion of commentaries by service users on some of the chapters. This fourth edition has been extensively revised and updated. The new structure reflects changes in service delivery and includes sections on: philosophy and theory

base the occupational therapy process ensuring quality the context of occupational therapy occupations client groups. Important new areas that are covered include mental health promotion, evidence-based practice, community development and continuing professional development. Addresses the needs of the undergraduate course - covers all the student needs for this subject area in one volume. Links between theory and practice are reinforced throughout Written by a team of experienced OT teachers and practitioners Comprehensive - covers theory, skills and applications as well as management The clear structure with the division of chapters into six distinct sections makes it easy to learn and revise from as well as easy to refer to for quick reference in the clinical situation. Provides key reading and reference lists to encourage and facilitate more in-depth study on any aspect. It is written in a style that is easy to read and understand; yet there is enough depth to take students through to their final year of education. Chapters on the application of occupational therapy are written by practising clinicians, so they are up-to-date and realistic. For qualified occupational therapists, the book includes a review of current theories and approaches to practice, with references so that they can follow up topics of particular interest. Suitable for BSc and BSc (Hons) occupational therapy courses.

The ideal resource for rehabilitation professionals who are working with or preparing to work with older adults! It describes the normal aging process, illustrates how health and social factors can impede an aging person's abilities, and demonstrates how to develop mechanisms for maximizing the well-being of

older adults.

Willard and Spackman's Occupational Therapy Springer

-- Describes specific steps students and therapists can take to achieve success as an occupational therapist -- Prepares the graduating student or clinician for the corporate world of managed health care by suggesting ways to handle change and conflict, showing how to adapt to new situations, and demonstrating the benefits of strategic planning and entrepreneurship -- Illustrates why current leaders in occupational therapy have been successful and how students and therapists can benefit from their experiences

An Evidence-Based Approach by Braveman, Brent Cram101

"This text seeks to address the common functions, responsibilities and duties of occupational therapy leaders and managers. Many of these are in common with those faced by leaders and managers in other healthcare disciplines including nursing, physical therapy, social work, case management and others. The management functions most commonly identified include (a) planning, (b) organizing and staffing, (c) controlling, and (d) directing. There are sometimes variations because some authors may pull the function of "staffing" out from that of organizing and present five rather than four categories. Nonetheless, a discussion of leadership and the basic functions of management and their relationship to leading and managing evidence-based practice is a logical place to begin"--

Occupational Analysis and Group Process John Wiley & Sons
Occupational Therapy and Stroke guides newly qualified occupational therapists (and those new to the field of stroke management) through the complexities of treating people

following stroke. It encourages and assists therapists to use their skills in problem solving, building on techniques taught and observed as an undergraduate. Written and edited by practising occupational therapists, the book acknowledges the variety of techniques that may be used in stroke management and the scope of the occupational therapist's role. Chapters span such key topics as early intervention and the theoretical underpinnings of stroke care, as well as the management of motor, sensory, cognitive and perceptual deficits. They are written in a user-friendly style and presented in a form that enables the therapist to review the subject prior to assessment and treatment planning. Complex problems are grouped together for greater clarity. This second edition has been fully revised and updated in line with the WHO ICF model, National Clinical Guidelines and Occupational Therapy standards. It is produced on behalf of the College of Occupational Therapists Specialist Section - Neurological Practice.

My aim in writing this book was to provide a guide to management for student occupational therapists and practitioners in the field. It is not intended to provide an answer to every conceivable management situation. The organization and delivery of health and social services is being subjected to relentless scrutiny and change. Hardly has one proposal been

implemented before another one is introduced. In view of this, the thrust of this book is to highlight key points to be addressed when looking at the delivery of occupational therapy services. For this reason, the book starts from the viewpoint of one who is in the early stages of an occupational therapy career through to the position of having to manage the staff in an occupational therapy department service. Following this plan, the book has been organized into two parts. Part One covers issues that an occupational therapist has to confront directly in any job situation. In this situation, she will need to know what is expected of her. Apart from knowing about the various duties, it is necessary to understand the context in which these duties are to be conducted. Hence, there are chapters that discuss professional responsibilities, self-management, standards of practice, and the structure of the two biggest employers of occupational therapists - the NHS and local authority social services departments.
