 The Olympia conference Frontiers of Fundamental Physics was a gathering of about hundred scientists who carry on their research in conceptually important areas of physical science (they do "fundamental physics"). Most of them were physicists, but also historians and philosophers of science were well represented. An important fraction of the participants could be considered "heretical" because they disagreed with the validity of one or several fundamental assumptions of modern physics. Common to all participants was an excellent scientific level coupled with a remarkable intellectual honesty: we are proud to present to the readers this certainly unique book. Alternative ways of considering fundamental matters should of course be vitally important for the progress of science, unless one wanted to admit that physics at the end of the XXth century has already obtained the final truth, a very unlikely possibility even if one accepted the doubtful idea of the existence of a "final" truth. The merits of the

Olympia conference should therefore not be judged a priori in a positive or in a negative way depending on one's refusal or acceptance, respectively, but considered after reading the actual of basic principles of contemporary science, new proposals and evidences there presented. They seem very important to us.

History has been taught in a boring way for far too long. A subject as moving and powerful as humanity's past should be inviting, and when it is told well, it is. Susan Wise Bauer succeeds in telling the captivating story of history with her best-selling history series. Parents and young readers have fallen in love with her narrative history, *The Story of the World*, and its accompanying Activity Book. Now teachers and home educators can take advantage of a new and valuable learning tool. These easy-to-use tests and answer keys, successfully used by hundreds of parents and teachers, provide an objective method for measuring retention of key facts, figures, and events from history. A combination of sequencing, matching, short-answer, and essay-style questions gives students a chance to show what they've learned. Used with the Activity Book and *The Story of the World*, the tests give educators a complete history curriculum for their elementary school students.

**What You Need to Know About Who We Are? Where We Came From? and Where We Are Heading?** Lulu Press, Inc  
Answers hundreds of questions on the most interesting of topics—planet Earth! It's right under our feet every day—Earth and all its glorious components. From fossils, rocks, and minerals to caves, earthquakes, and volcanic eruptions, *The Handy Geology Answer Book* traces the formation of the universe and the planet, investigating the layers of the planet and explaining the formation of mountains and bodies of water. Questions and answers are also devoted to physical and chemical processes, fossil fuels, the effects of global warming on glaciers, world morphological features, and even the geology of other planets. It answers nearly 1,000 of the most frequently asked questions on the complexities that shaped our planet. It is also a trivia buff's delight with the stats for Earth's deepest (the Mariana, the

deepest-known ocean trench), lowest (the shoreline of the Dead Sea), highest (Mt. Everest), the longest river (the Nile), and the largest freshwater lake (Lake Superior) along with the "how and why" of these features. Easy to understand and use, *The Handy Geology Answer Book* is invaluable for students and general science readers of all ages. With numerous photos and illustrations, this informative book also includes a resource section on educational places, government organizations, and other references, a helpful bibliography, an extensive index, and a glossary of terms, adding to its usefulness. From the microscopic formation of crystals to the titanic, eons-long processes that result in islands, volcanoes, mountains, glaciers, oceans, continents, and even planets, you'll learn about the events that created today's world and the changes that continue to affect Earth every day.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

Asenath Tannie is an actress, writer, director, producer, filmmaker, author, and owner of her own company. ATG Productions is currently shooting a 30-second commercial for a Doritos contest. The winning commercial will air on Superbowl Sunday. Asenath wrote and stars as Happy Grandma in this Doritos commercial. Asenath LOVES challenges and this is definitely a challenge. Asenath and her husband of 100 years, as she likes to say, live in Orange County, California where they raised four children. Another challenge Asenath has accomplished is that she has submitted her short film, *Billy Boy*, to several film festivals. Asenath's work is an outpouring of love

in print, film, music, and on the Internet. (See Rick's web site: [www.RickCGentry.org](http://www.RickCGentry.org)) Asenath's promise to her son, Rick, is "I will tell the whole world I love you." She intends to keep that promise. As you can see, Asenath loves a challenge. She hopes you do too. "Repeat After Me" will help you overcome many of the challenges of every day living by changing negative thinking to positive action---even if you don't believe it! That's the beautiful thing about these phrases---just repeat them over and over again, and see what happens. If you utilize this handbook every day, it can and will open a new world of exciting opportunities that perhaps you wouldn't have even dared to dream otherwise i.e., your own business, a different career, a promotion, becoming an outstanding parent, being happy, and so on. Wow. What a challenge. I dare you to meet it. Please write or e-mail me your thoughts as you use this daily handbook. I'd love to hear from you. Sincerely, Asenath Tannie

If you ever wanted to read a book that describes the history of the world, as well as the origin and evolution of humankind in a nutshell, this book is a must-read. We live in an age of information and technology, and everything we want to know about the world—whether it is related to history, philosophy, science or religion—is available at our fingertips. Yet, the more information we have at our fingertips, the more confused we seem to become. The traditional answers to the age-old philosophical questions about who we are, where we came from, and where we are heading; should be reevaluated and redefined in light of the abundance of information available at our fingertips today. This book compiles all the essential information we need to know, in order to reevaluate and redefine our deepest beliefs. The forty chapters of this book provide great insights into the origin and evolution of human civilization, by exploring the most recent scientific theories of our Modern Age. It also explores all the hallmark events of history, and analyzes those events from the point of view of science, religion and the philosophical theories that emerged throughout the ages. Each of the chapters of this book should be viewed as dots on a map that represents the journey of humankind, from the beginning of time till the 21st century. As you read through the various chapters, how you choose to connect the dots is entirely up to you. But no matter how you connect those dots, the lines that you draw should represent a framework for understanding the nature and history of this world, and our place within it.
